## The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—In Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

Advertising.—The Transcript covers a wide section of territory in Western Ontario, and its readers are the leading farmers and townspeople. It is a first-class advertising medium. Rates on application.

Job Printing.—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc.

A. E. Sutherland, Publisher.

### VALUE OF FALL FAIRS

It is not only in the prizes won that the local fair is beneficial. Nor should the winning of prize money be the chief incentive to exhibitors. All through the year should the influence of the fair be felt by the whole district, in the improvement of agricultural conditions generally.

When an agricultural society neglects or overlooks the educational features it is not fulfilling its greatest object. And if the members of the society do not take full advantage of the opportunities afforded they are missing the best reason for the organization. At the fall fairs opportunity is given for a comparison of farm and garden products, and this should be accompanied or supplemented by comparison of cultural methods, as well as of the goods themselves.

The successful exhibitor is not necessarily the one who takes the greatest number of prizes, but the one who can show the greatest improvement from year to year in the quality of his exhibits and who can show his neighbors how to better their methods and products.

In order to encourage and simplify bookkeeping on the farm the Dominion Experimental Farms System has published an extremely simple farmer's account book, which will adequately serve all necessary purposes and should prove to the general farmer one of the most useful publications issued from the Experimental Farms for some time. It is obtainable from the Publications Branch of the Department of Agriculture, Ottawa, at a nominal charge of ten cents. No postage need be placed on letters of application.

The Dominion Department of Agriculture Fruit and Vegetable Crop Report for September states that indications are that in Ontario the total commercial apple crop will be slightly less than that of last year. In Middlesex county the total apple crop will be 125 per cent. of that of 1922, but in some sections the fruit is undersized owing to continued dry weather. Throughout Ontario the commercial acreage of potatoes is approximately the same as that of last year, with the early varieties showing a slight decrease. The late varieties have been injured to some extent by drouth but recent rains will be of considerable benefit. The tomato crop although late will be good and approximately 100 per cent. of that of 1922.

Make your entries for the fair in advance. It will save both your time and that of the secretary.

### LOCAL FALL FAIRS

Glencoe	Sept. 26-27
Melbourne	Oct. 11
Strathroy	Sept. 17-19

Ridgeway	Oct. 8-9
Rodney	Oct. 1-2
Thamesville	Oct. 2-3

### THE BANKING BUSINESS

To the Editor of The Transcript: We have been reading a great deal during the last few days regarding our banking institutions being perfectly safe for depositors—as one man puts it, "As safe as the hills themselves." What a comfort it would be to the public if they could have every confidence that this is the case. In the closing of the doors of the Home Bank of Canada its customers were placed in very trying circumstances as well as being the means of forcing some business places to close, as all of their deposits were in that institution. It came like a bolt from the blue sky, especially after the statement regarding the bank's financial standing in June, 1923.

When the bolt came and the depositors who considered that they were perfectly safe were told that it was very doubtful if they would receive 100 cents on the dollar, the people lost their confidence. Is it any wonder?

It may be true that the banks of Canada have a common interest in keeping the business free and open. But to many people that remains to be seen if this is the case. Why did they not come to the rescue of the Home Bank of Canada before the doors were closed, and keep the confidence of the people? It would appear that our banking business is being tested out and it will only be when the depositors receive full returns for the money they placed in the Home Bank of Canada that the confidence of the people will be secured. A CANADIAN.  
Melbourne, Ont.

### OH, YOU HUNTERS!

Clean up your guns, trim up the dogs, get out your traps and we will furnish you with complete information "Where to go" to obtain the finest hunting in the land. The great north country of Ontario, so near at hand, is a veritable game preserve, the home of the moose and red deer, as well as other game animals.

Get in touch with your nearest agent of the Canadian National Railways for full particulars.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting through their action in an unclean stomach, but this is only a manifestation of their cleansing power, no indication that they are harmful. They can be thoroughly depended upon to clear worms from the system.

## HANDLING THE HARROW

An Implement Often Neglected By Farmers.

Smoothing, Disc, and Spring Tooth Harrows Described—Keep the Bolts Tight and the Wearing Parts Clean—The Implement Shown.

(Contributed by Ontario Department of Agriculture, Toronto.)

The iron smoothing harrow, being a rather clumsy implement to handle, is apt to be neglected to the extent of bolts working loose and teeth falling out. A small wrench should always be at hand, preferably strapped to the adjusting lever, with which all bolts could be tightened and kept in proper adjustment. The teeth should be kept sharpened if the harrow is to do its best work with the least expenditure of horse or tractor labor. The harrow sections should be tested for uniformity of set frequently, by lining up the teeth and seeing that all are cutting the same depth. Loosening, shortening, or dulling the teeth reduce the efficiency of this implement. When not in use the harrow should be piled in sections out of harm's way. In storing away after seeding it is a good practice to dash a little machine oil or grease on the bright portion of each tooth, using a brush or cloth to do so. If any parts, such as bolts or teeth have been lost, make note of it on a card, tying the card to the section so that repairs will be made before the harrow is required for use again. The rusty harrow tooth will ball up, collecting grass roots and soil particles in moist ground, reducing the efficiency of the work. It pays well to keep the harrow teeth bright and sharp. The place in the implement shed for harrows where such will be out of the way is up on the side walls. Long pegs or spikes that will hold two sections can be driven in the studs or boarding, and the harrow sections hung thereon high, dry and easy to get when wanted.

This harrow generally suffers more from neglect to oil than any other farm implement. Lifting and dropping the soil on its own bearings, it has been difficult for manufacturers to make a bearing that is dust or sand proof. Frequent and careful oiling right from the start is the only practice that will save the bearings of the disc. If the bearings become loose or worn, the draft is greatly increased and the work not as well done. The harrow must always be at hand and oil should be applied every hour. A 16-inch disc will turn 660 times an hour at ordinary field speed. The bearings of the harrow must be oiled in two directions on the bearings. Oil can not be expected to last very long, and it does not, so oil often or your disc will squeak and the horse tired. This harrow must be kept tight if it is to do its best work. The wrench should always be on hand and used when needed. If the discs are free from rust, well burnished and smooth, they are not apt to clog. The rusty disc may cause long delays in the early spring. The discs should be dry and clean when put away, and a little rub with a soft cloth will aid with machine oil will keep the wearing parts bright and always ready for the field.

### The Spring Tooth Harrow.

The spring tooth harrow is a rather simple implement to keep in order than the disc harrow. With large wheels twice a day oiling will suffice. The keeping of the bolts tight and the wearing surfaces clean and bright are the principal needs leading to efficient working of this implement. Steel points must be renewed or sharpened when required. The wearings parts should be kept bright and clean; this is best done with kerosene and a dry cloth and then following with an oil soaked one. The moving parts in the elevating mechanism require and should get sufficient working of this implement in condition to move freely. Both shelter and painting when needed to protect the iron and wood parts and keep the wheels tight are very important. This harrow must be kept tight if it is to do its best work. The wrench should always be on hand and used when needed. If the discs are free from rust, well burnished and smooth, they are not apt to clog. The rusty disc may cause long delays in the early spring. The discs should be dry and clean when put away, and a little rub with a soft cloth will aid with machine oil will keep the wearing parts bright and always ready for the field.

### The Implement Shed.

Shelter for tools and implements is absolutely necessary during the period when such are not in actual use. The weathering elements will soon destroy the wood or metal used in implements, perhaps not fast enough to excite the indolent farmer into action, but nevertheless, slow, sure and steadily the wood will decay and the metal will rust, until the implement becomes too weak to stand the strain of use. A good roof over a floor that is always dry, and ample space for the implement and tool storage requirement of the farm is all that is needed. A palatial building is not needed. Posts set in cement, a frame strong enough to support roof and wall is all that is required if a special building must be erected.—L. Stevenson, O. A. C., Guelph.

### Orchard May Be Pruned in Winter.

Fruit growers do not need to wait until spring to prune their orchards. There is little or no difference in the growth and maturity of the wood when pruning has been done any time between November and May.

If the trees are taken to make the cuts close to the main trunk or branches, no stubs will be left to die and decay, though the covering of wounds with a white lead and oil paint or with common grafting wax warmed to the consistency of cold molasses will give added protection.

The boy and girl should be made to see that they are a main factor in the maintenance of a farm, and not a slave or servant to do little errands for the parents.

## From Bed to Work in Three Weeks

Dreco helps put Wm. Walker on his feet and enables him to return to work.

"For the past year my husband has been a sufferer from ulcers of the stomach," says Mrs. Wm. Walker, of 158 Eileen Ave., Toronto. "His food lay in his stomach and would not digest and he frequently had severe vomiting spells. He was on a diet most of the time. This resulted in his entire system becoming run-down. He had chronic constipation and was very restless and nervous."

"About three and a half weeks ago I brought him home a bottle of Dreco. He tried it and said that the first dose seemed to give him relief and eased his stomach of the terrible pains that gripped him. His bowels became more regular."

"We are both greatly pleased with the benefits Dreco has already produced. My husband's system is improving generally and after the severe trouble he has just passed through he was able to return to work in three weeks' time."

"Mr. Walker is feeling very much stronger and I want him to continue this good medicine, as it is the first medicine we have found that goes right to the root of his trouble."

Dreco's beneficial action on the organs of digestion is remarkably quick and thorough. No matter how severe the case or how long standing, Dreco will help. This remedy contains no mercury, potash or habit-forming drugs. It is made solely from herbs, roots, bark and leaves and has established an enviable reputation, earned only by genuine merit.

Dreco is being specially introduced in Glencoe by P. E. Lumley, and is sold by a good druggist everywhere.

### PUBLIC SCHOOL PROMOTIONS

S. S. No. 5, Moss

The following report gives the names of the pupils who were successful in their final midsummer examinations. Those passing from junior to senior were promoted on their term record.

Entrance—Ida Duckworth, Barbara Taylor, Howard Thompson.

II. to IV.—Bramwell Gardner, Robert Brooks, Lila Read.

Jr. III. to Sr. III.—Minnie Moore, Willie Sayre.

II. to III.—Bessie Duckworth, Donald Taylor, Mary Taylor.

Jr. II. to Sr. II.—Dorothy Mitchell, John Taylor, Norman Read, Pearl Wilson.

I. to II.—Orlie Read, Orval Read.

Sr. I.—Billie Wilson.

A to L—Frank Taylor.

B to A.—Dan Taylor.

C to B.—Lloyd Tunks, Lizzie Mitchell, Jennie Wilson.

Edith Duckworth, Teacher.

### THE SAVING HABIT

Anything which will encourage the habit of saving in this extravagant age is a blessing. The temptations on every hand are so alluring that it is very difficult for a young man of ordinary self-control to resist them and to save his money. Thousands of young men who are receiving good salaries, some of them very large, never think of laying up a dollar for a rainy day. They never see anything in their salaries but "a good time," and they never develop the habit of saving. You ask them how they are doing and they will say "Oh, just getting along." "Just making a living." "Just holding my own." Just making a bare living is not getting on. The difference between what you earn and what you spend is power. It often measures the distance between success and failure. In many minds the economy faculties are not developed, or are so weak that they are no match for the passion of spending for pleasure.

Don't use the steam in your whistle that should be used in your cylinder. That Chicago professor who tried to modernize the New Testament has received so much adverse criticism, it seems as though he would be unable to make gifts of the book to his friends.

A Scotchman visiting in America stood gazing at a fine statue of George Washington when an American approached. "That was a great and good man, Sandy," said the American; "a lie never passed his lips." "Weel," said the Scot, "I presume he talked through his nose like the rest of ye."

## See the New MASSEY - HARRIS CORN BINDER

Knotter adjusted from seat to tie 15 to 30 inches from butts without raising pan; no packers to knock off ears; pole inside of large drive wheel; no side draft or neck-weight; gets all the corn, down or up, straight or tangled, long or short; can be used in any field where corn is 30 inches apart.

### THE ONTARIO RAILWAY AND MUNICIPAL BOARD

In the Matter of the Application of the Municipal Council of the Corporation of the Township of Ekfrid in the County of Middlesex for an Order relieving the said Corporation from the obligation to rebuild the bridge over the creek on the River Road through Lot Number Seventeen in the Third Range South of the Longwoods Road in the Township of Ekfrid in the County of Middlesex.

The Applicant hereby applies to the Board for an Order relieving the Corporation of the Township of Ekfrid from the obligation to rebuild the bridge over the creek on the River Road through Lot Number Seventeen in the Third Range South of the Longwoods Road in the Township of Ekfrid in the County of Middlesex, on the grounds that the said bridge is no longer required for public convenience and that the rebuilding of it would entail a larger expenditure than would be reasonable having regard to the use that would be made of the bridge if it were rebuilt.

This Application is made by John Campbell Elliott, of the City of London, in the County of Middlesex, Solicitor for the Applicant.

DATED at London this twenty-fourth day of August, A. D. 1923.

J. C. ELLIOTT,  
Solicitor for the Applicant.

TAKE NOTICE That The Ontario Railway and Municipal Board has appointed Tuesday, the 18th day of September, 1923, at the hour of ten o'clock in the forenoon, at the Town Hall in the Village of Glencoe in the County of Middlesex, for the hearing of the Application of the Municipal Council of the Corporation of the Township of Ekfrid from the obligation to rebuild the bridge over the creek on the River Road through Lot Number Seventeen in the Third Range South of the Longwoods Road in the Township of Ekfrid in the County of Middlesex, and all interested parties will then be heard.

DATED at London this 24th day of August, A. D. 1923.

J. C. ELLIOTT,  
Solicitor for the Applicant.

### VOTERS' LISTS, 1923

Municipality of the Township of Moss, in the County of Middlesex

Notice is hereby given that I have transmitted or delivered to the persons mentioned in Section 9 of The Ontario Voters' Lists Act the copies required by the said section to be so transmitted or delivered of the list, made pursuant to said act, of all persons appearing by the last revised assessment roll of the said municipality to be entitled to vote in the said municipality at elections for members of the Legislative Assembly and at municipal elections, and that the said list was first posted up at my office in Moss on the tenth day of September, 1923, and remains there for inspection.

And I hereby call upon all voters to take immediate proceedings to have any errors or omissions corrected according to law.

C. C. McNAUGHTON,  
Clerk of the Municipality of Moss.

### THE ONTARIO RAILWAY AND MUNICIPAL BOARD

In the Matter of the Application of the Municipal Council of the Corporation of the Township of Ekfrid in the County of Middlesex for an Order relieving the said Corporation from the obligation to rebuild the bridge over the creek on the River Road through the South Half of Lot Three in the Fifth Range South of the Longwoods Road in the Township of Ekfrid, and the North Half of Lot Three in the Sixth Range South of the Longwoods Road in the said Township, and the road allowance between said Lots.

The Applicant hereby applies to the Board for an Order relieving the Corporation of the Township of Ekfrid from the obligation to rebuild the bridge over the creek on the River Road through the South Half of Lot Three in the Fifth Range South of the Longwoods Road in the Township of Ekfrid, and the North Half of Lot Three in the Sixth Range South of the Longwoods Road in the said Township, and the road allowance between said Lots, on the grounds that the said bridge is no longer required for public convenience and that the rebuilding of it would entail a larger expenditure than would be reasonable having regard to the use that would be made of the bridge if it were rebuilt.
