Brockville's Greatest Store

Superior Window Shades

You'll find every kind of window shade in this stock. If there's any peculiar size that is not in stock we can make it in a few minutes. An important fact is-we sell no inferior roller shades. There are too many poor grades on the market, and this store positively refuses

to handle this grade of goods. We use only the best Hartshorn spring rollers and are prepared to stand right back of our shades.

Opaque window shades, lace rimmed, two cclors, size six cet x 37 inches, price each... 50c

Opaque window shades, very best quality, in a great variety of lace and insertion trimings, from 75c each up to....2.00

THE TELEPHONE QUESTION

The local telephones recently put in are working very satisfactorily, and the advisability of putting in a switch board is being considered. It now seems probable that the government will take over and operate all trunk lines, and when this takes place those owning phones will be able to connect at once with the government system; so the local switchboard proposition will be held in abeyance, awaiting

The telephone commission appointed by the Dominion Government is now collecting evidence in relation to the workings of local and general systems.

Dr. Doan, of Harrietsville, in Middlesex County, gave some interesting information. He said that 19 miles of ingle wire was put up in 1901 with 19 phones in use. Now there are 26 miles with 58 subscribers. The rental of phones is \$9 a year, and on the first four months of the association's busi ness a dividend of 4 per cent was declared. He sees no reason why farmers in any average township in Ontario should not have telephone communication at \$10 a year.

organized in his neighborhood four ion's future expansion by public and years ago, with 15 subscribers; they private Corporations. per year. W T. Onghred of Wolfe County,

Que., told of a local company which has 550 subscribers, with a rate of \$12 for house and \$15 for business phones. The system cost \$45 a mile, and they have paid 5 per cent dividends for years up to last year.

CASSIDY-BRENNAN

Prescott lost one of her prettiest daughters on Wednesday by the marriage of Miss Nellie Brennan, daughter The ceremony took place at 9.30 o'clock, the church being decked with Easter lilies and masses of greenery. The pastor, Rev. Father Masterson, officiated, the bride being given away by her father. Appropriate music was rendered by the choir during the The bride was attended by Miss Bertha Slack, Charleston, and the groom by his brother, William Cassidy. The bride looked lovely in a gown of dove-colored silk with white silk yoke and belt. She wore a white hat and gloves. The bridesmaid also looked charming in a dress of brown with white hat and gloves. After the eremony, the bridal party repaired to having decided to close the Grand the home of the bride's parents where an elegant wedding breakfast was partaken of. decorated with hot house flowers, carnations and vines. About fifty guests were present. The remainder of the was raised. Upon the report of an

The bride received many useful and costly presents. Among them were silver, china, cut glass, etc., showing the esteem in which she is held. We extend congratulations.

DAIRY PROSPECTS

By Prof. Ruddiel

The actual cost of manufacturing butter and cheese has increased considerably during recent years, and one very important item. that of labor, is likely to increase still more. It would advance the business if patrons of fac-tories were to realize that it would be to their interest to pay slightly more for manufacturing. In order to keep pace with the advancment in the arts of cheese and butter making, better equipment and better buildings are required, and it seems to be inevitable that the price for manufacturing must be slightly increased. It would certainly pay the patrons of factories to give a little more for having their cheese and butter manufactured and

then demand a better service in return. A considerable amount of interest is being shown in the matter of testing individual cows, and this work is likely to have a very marked influence on the productiveness of dairy herds in Canada. It is estimated that the average yield of milk per cow in Canada is not over 8,000 pounds annually. I have had an opportunity of examining records of over 150,000 cows tested in Denmark during 1904 and as near as I can make out, the average yield per ow is between 6,000 and 7,000 pounds year. The Danes have followed this work of testing individual cows for several years, and have proved that while they have increased the productiveness of their herds, they are able to produce the larger quantity of milk, as neaply and in some cases more cheapy than before the improvement in ield was affected.

On the whole, I think the outlook was never better for Canadian dairying than it is at the present moment. Cheese factory and creamery managers should, however, bear in mind that we are beginning the season with high These prices will, in all probability, sag considerably as the season advances. It is during a falling market that we hear most complaints about quality. There is very little complaint concerning quality, no matter what it may be, as long as the dealer is making money on his transactions.

The Canadian Rubber Company of Montreal

The extension of the manufacturing field in many Canadian industries has been a noteworthy feature of the last few years. This has been brought about in a measure by the rapid access Mr. Macdonald of Riguaud, Que., said that a local system had been of the great possibilities of the Domin-

> be growth of the rubber industry in Canada up to a score of years ago, was of a very slow nature, but during more recent years the great demand for rubber goods of all kinds has impelled an extension of the manufacturing facilities in this as in many other industries.

Over fifty years ago. The Canadian Rubber Company of Montreal commenced operations on the banks of the St. Lawrence River, Montreal, each year increasing the size of their plant and the variety of their product.

It may be mentioned that during the year 1904, over \$240,000.00 was of Mr. and Mrs. Martin Brennan, to spent by the management on additions Mr. John Cassidy of Kalmurah, N.Y.

The statement is now given out by Mr. D. Lorne McGibbon, General Manager of the Company, that during the year 1905, no less a sum than \$250,000.00 has been allocated by the Directors for the purpose of not only improving the present plant in the way of additional machinery, etc., but in the erection of new factories for the manufacture of many lines of goods being handled in a restricted way-but for which there is a great possibility in this country.

Brockville will have no play house on and after June 1, the Town Council Opera House, which is corporation The table was tastefully A bout the time of the Iroquois Theatre day was very pleasantly spent, at the close of which the happy couple departed for Kalmurah amid showers of rice and best wishes from a host of and though the house has been used continuously since, patrons have been in dread of accidents. Public opinion has been strongly opposed to the place being kept open, and the Town Conn-cil has at last acted.—Record,

We're Waiting to Show You Our New
