

Learn why the FRICTIONLESS EMPIRE runs easier than others

If you've ever used any other make of separator you'll marvel when you turn the Frictionless Empire. So nearly frictionless that it almost runs itself. Will run for half an hour after you've finished skimming, unless you stop it with our brake.

The Frictionless Empire is the only separator with ball bearings at top and bottom of bowl-spindle. Other makers would jump at the chance of using our Ball Neck Bearing and Three-Ball Bottom Bearing. But our patents prevent others using these friction-eliminating, easy-running, long-life features.

These ball bearing features, together with the lighter bowl, fewer closed bearings, more easily cleaned skimming devices, etc., make the Frictionless Empire the one really good cone separator.

Years of service prove their worth. Empire quality in every machine, and a guarantee as good as a gold bond.

Some day you'll own an Empire. In order to hasten that day we want you to read our new 25c. book. It tells the truth about the two standard methods of cream separation. Gives valuable dairy pointers.

We will send you one copy free, provided you tell us the number of cows you keep. Also name of this publication. Don't miss this book. Send for it immediately. Extra copies 25c. Ask for book No. 22

The EMPIRE Line of Cream Separators

consists of a full range of sizes in both Frictionless Empire (cone method) and Empire Disc. The choice of either cone or disc method, and the size of machine, rests entirely with you.

HOW THE VERY LIFE IS EATEN OUT OF MOST ROOFING.

Not two Roofings in a hundred can withstand the slow, secret, dangerous attacks of acid—a deadly enemy to most Roofing. Because few Roofing makers care to spend the extra money necessary to make such Roofing. Acids are caused by green or damp hay, or the cattle in your sheds. These cattle sweat, producing vapor which contains acids and gases destructive to most Roofing. These enemies attack the underside—which is weak in most Roofing—and does its ruinous work where you cannot see it, till too late. The first you know that it is not what the fellow claimed is the startling sight of a million "pin-holes" all over. Examine the Roofing of your barn now—you'll likely find this defect. This is caused by weak insides, which should be the strongest part, but the portion hopelessly slighted by most makers because you won't test it. Nearly all Roofing, except Brantford, has as a foundation wood pulp, jute, cotton cloth, etc., which cannot absorb sufficiently. It possesses nothing to hold it together, and is coated with cheapest covering obtainable: animal fats, greases, oils, tar, or some other refuse. These dangerous coatings are so weak that they are readily at the mercy of the acids. And the foundation! It has no barrier! It has already wilted. No amount of supposedly preventatives can save this Roofing. It is bound to go to pieces sooner or later and just when you least expect. Most Roofing makers will try to avoid the issue if asked to show insides of their Roofing. But we encourage tests of Brantford Asphalt Roofing. There are no secrets, nothing that you shouldn't know. The foundation of Brantford Asphalt Roofing is long-fibred, evenly condensed pure wool. Asphalt is forced into wool, soaking every fibre. It is heavily coated with special waterproof coating into which Silica Sand is rolled under pressure. Brantford Asphalt Roofing is wear resisting, fire, water, weather, acid and smoke-proof. Rain or snow can't freeze or crack it; heat of sun cannot melt it. Its pliability prevents cracking or opening at seams. There are many other Brantford Roofing superlatives. Our Big Roofing Book with Brantford samples is free. Write us or your dealer now.

Good dealers desired in Unoccupied Canadian territory.

Please Remember to Mention "The Farmer's Advocate" When Writing

GOSSIP.

Young Holstein bulls, bred from superior producing cows, and sires with extra-good backing, on producing lines, are advertised for sale in this issue by E. F. Osler, Bronte, Ont.

A. W. SMITH'S SHORTHORN SALE.

The announcement in our advertising columns by A. W. Smith, M.P., of Maple Lodge, Middlesex Co., Ont., that on March 24th he will sell by auction, at his farm, 30 head of Shorthorns, should interest breeders and farmers who favor the dual-purpose class of cattle. While many of the animals to be sold are of desirable Scotch families, a considerable number are of extra-good milking strains of English foundation, and there is probably no herd of Shorthorns in Canada that has a better record of milk production than the Maple Lodge herd. The animals to be sold are mostly young, the heifers one to three years, and the young bulls a very attractive lot. Note the date, and send for the catalogue.

J. A. CASKEY'S HOLSTEIN SALE.

The dispersion sale of the noted Holstein herd of 40 head, property of J. A. Caskey, Madoc, Ont., to take place on March 25th, should attract a large attendance of breeders and dairymen. The animals included in the sale are bred on producing lines, and the females old enough have been bred to the richly-bred bull, Sara Jewel Hengerveld's Son, whose dam has a record of 28.12 lbs. butter in seven days. There will also be about twenty calves in the sale, sired by this great bull. The G. T. R. runs into Madoc. Stages connect with the C. P. R. at Ivanhoe, and the C. O. R. at Eldorado, and will deliver intending purchasers at the farm.

Geo. Amos & Sons, Moffat, Ont., write: "We have sold all our young Shorthorn bulls and surplus stock, thanks to 'The Farmer's Advocate.' We are pleased to say we have had the most inquiry for stock, and made the most satisfactory sales of any year we ever had. Circumstances, we think, point to improved live-stock industry becoming one of the leading agricultural pursuits of the farmers throughout the country. We are not at the present time witnessing a boom, but a natural development. Have recently purchased Waverley, one of the best sons of Mildred's Royal, for one of our stock bulls, to assist Lancaster Floral, by Old Lancaster, and Scotland's Crown, by Imp. Ben Lomond, out of Imp. Scottish Queen, the dam of Pleasant Valley Jilt, which makes the most promising herd bulls we have had for some time.

In changing their advertisement, W. G. Pettit & Sons, Freeman, Ont., write: We wish to state that business has been very good, and, in addition to our contribution to the Toronto Shorthorn sale, we have recently sold the following: To J. S. Snyder, Bridgeport, Ont., a ten-months' Duchess of Gloster bull. This is a thick, fleshy fellow, and will make a good one. To John McCurdy, Vesta, Ont., a very nice 11-months-old bull, sired by Prime Favorite (imp.). Wm. B. Grant, Dumblane, Ont., purchased a very smooth, red 10-months-old bull, from an imported Lustre dam. To Lewis Smith, Lower Coverdale, N. B., we shipped a good yearling bull. John Gowland, Elfrida, Ont., bought a 12-months' bull that should get some good stock. To Jay Moss, Moulinette, Ont., we shipped a very promising 4-months' bull calf of the Marr Roan Lady family, also two heifer calves, and a cow with a heifer calf at foot. The eight bulls we are offering are a splendid lot, and are in prime condition. They are all of the herd-heading kind, and among them are some strong show propositions. The 20 cows and heifers are a valuable lot, and include many that we would prefer to keep, but as the increase of our herd during the past few years has been somewhat in excess of the demand, it is now necessary for us to make considerable of a reduction in order that our stabling may accommodate the herd without too much crowding. Some of these cows are imported, and the others are nearly all direct from imported stock, and all have calves at foot, or safe in calf to our two choice imported bulls. Interested parties will find it to their advantage to see our stock before making selections elsewhere.

Blood Was Bad.

From impure blood comes Pimples, Boils, Ulcers, Tumors, Abscesses, Festering Sores, Rashes, Constipation, Head-aches, etc.

Get pure blood and keep it pure by removing every trace of impure morbid matter from the system by using

BURDOCK BLOOD BITTERS.

Mrs. Fred. Biggs, Kingston, Ont., writes:—"I was completely run down, my blood was out of order, and I used to get so weak I would be compelled to stay in bed for weeks at a time. I could not eat, was pale and thin; every one thought I was going into consumption. I tried everything and different doctors until a friend advised me to use Burdock Blood Bitters. I did not have one bottle used when my appetite began to improve. I used six bottles. I gained ten pounds in two weeks. When I began to take it I only weighed ninety-three pounds. It just seemed to pull me from the grave as I never expected to be strong again. I will tell every sufferer of your wonderful medicine."

For sale by all dealers.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

GRAND TRUNK RAILWAY SYSTEM

SETTLERS' (ONE-WAY) EXCURSIONS

TO Western Canada

MARCH 8th, 15th, 22nd and 29th
APRIL 5th and 12th

POTATO PLANTER

1909-10, No. 3, MODEL.

With or without fertilizer attachment, opens the trench, drops the seed, covers it, and marks for the next row all in one operation. Does not bruise or mar the seed in any way. One man and team can plant from 4 to 6 acres per day. Write for catalogue.

CANADIAN POTATO MACHINERY CO.
Limited
145 Stone Road, Galt, Ont.

EUREKA Glass Tank Sprayer

Solution tank is a quart Crown glass jar. If broken, it can be easily replaced for a few cents. Solution tubes are brass. None of the liquid used can be drawn back into the pump chamber, thus the chamber and valves are uninjured.

This is the easiest operated and the most effective small sprayer on the market. Inquire of your hardware dealer.

Write for our complete catalogue of Sprayers and Garden Tools.
