

KIDNEYS, LIVER AND URINARY ORGANS There is only one way by which any disease can be cured, and that is by removing the cause—wherever it may be. The great medical authorities of the day declare that nearly every disease is caused by deranged kidneys or lives. To restore these therefore is the only way by which health can be accured. Here is where WARARE'S SAFE. Outed has achieved its great reputation. It acts directly upon the kidneys and liver and by lacing them in a healthy condition drives disease and pain from the system. For all Kidney, Liver and lyingery troubless for the distressing disorders of women; for malaria, and physical treables generally, this great remedy has no equal. Ecware of impostors, imitations and concections said to be just as good.

Kidney Complaints

TESTIMONIAL om Squire Robertson, who for many years was Reeve of the Township of Normanby, a high-ly respected resident of that part of On-tario, having lived in that Township for the past 20 years:—

N. SUTHEBLAND, Niagara Falls, Ont., May 17:

DEAR SIR,—My daughter has been a great sufferer from Rheumatism. She has been obliged for years now to carry her arm in a sling, and her hand was beginning to wither. During these years she has tried all the many cures that have been advertised, without any result. Seeing your advertisement in the papers, giving testimonials from trustworthy people, I determined to procure some "Rheumatine" for her, and purchased four bottles of it from Mr. A. Jamison, Druggist. of Hount Forest, which she took strictly according to directions, with this result, that her arm is now completely restored. I cannot praise your medicine too highly indeed it is worth its weight in gold to all who suffer from Rheumatism, and it is with pleasured that I come foregard to say so. I ample amend that I come foregard to say so. I ample amend that I come foregard to say so. I ample amend that I come foregard to say so. I ample that I come foregard to say so. I ample that I come foregard to say so. I ample that I come foregard to say so. I ample that I come foregard to say so. I ample that I come foregard to say so. I ample that I come foregard to say so. I ample that I come foregard to say so. at I come forward to say so. I am

SOLD BY ALL DRUGGISTS.

Various Causes-

Advancing years, care, sickness, disappoint operate to turn the hair grey, and either of them inclines it to shed prematurely. AYER'S HAIR VIGOR will restore faded or grey, light or red hair, to a rich brown or a deep black, as may be desired. It softens and cleanses the scalp, giving it a healthy action. It removes and cures dandruff and humours. By its use falling hair is checked, and a new growth will be produced in all cases where the follicles are not destroyed or the glands decayed. Its effects are beautifully shown on brashy, weak, or sickly hair, on which a few applications will produce the gloss and freshness of youth. Harmless and sure in its results, it is incomparable as a dressing, and is especially valued for the soft lustre and richness of tone it imparts.

AYER'S HAIR VIGOR is colourless, contains white cambric; yet it lasts long on the hair. and keeps it fresh and vigorous, imparting an

It excites expectoration and causes the lungs to throw off the phiesem or mucous; changes the secretions and purifies the blood; heals the first tated parts; gives strength to the digestive organs; brings the liver to its proper action, and imparts strength to the whole system. Such is the inmediate half and imparts of the strength to the whole system. Such is the immediate half and the whole system. Such is the immediate half and the whole system such is the immediate half and the work time, if not of the last strength of the work in the most confirmed cases of Consumption! It is varranted not to produce costiveness (which is the case with most remedies), or affect the head, as if contains no opium in any form. It is warranted to be periectly harmless to the most delicate child, although it is an active and powerful remedy for restoring the system. There is no real necessity for so many deaths by Consumption, when Allen's Lune Balsam will prevent it if only taken in time. Physicians having consumptive patients, and who, having falled to cure them with their own medicine, we would recommend to give Allen's Lune Balsam i trial. Sold by all Bruggists.

The celebrated DR. H. HOLLICK, of London as established an agency in Toronto for the same into model of the sure cure of all nervous seases, arising from whatever cause. Enclose amp for pamphlet, which will be sent in seale welope to all who address to

There is no advantage in turning in oattle of any kind on a barley stubble to gather the gleanings. The beards on barley repel all kinds of animals, and the loose heads on the ground should be turned under quickly, so that may grow before wheat seeding time. that may grow before wheat seeding time.

Mr. Ferguson, Kinnochtry, Scotland, has sold to Mr. Whitfield, of the Government Model Farm, Rougemont, Can., twenty polled buil calves of this year, of his own breeding, at the price of £60 per head, put free on board steamer at Glasgow in the autumn. The calves, aged from two to six months, of the Coupar-Angus, Keillor Favourites, Kinnochtry Princesses, Baronesses and Emilys, Tillyfour Prides and Daisys, Glenbarry Victorias, and Castle Fraser Minas, and are a very good lot, as might be expected from their ancestry.

Sheep shearing is an art that is not easily Sheep shearing is an art that is not easily sarned, and the work cannot well be done by nachtnery, as there can be no guarantee that he sheep will lie still while the operation is eing performed. In the far West where the performed in the far West where the performed in the sheep are kept by the thousand the demand or shearera is always in excess of the supply. The lack of good shearers is loudly complained of this spring in Texas, and as the clip of cool is light and prices low it will lessen the

preen to know that the best antidote to the poison is iron rust. There are preparations of 1 iron in liquid form which should be kept in farmers' houses wherever this popular insect poison is used. Of course, the poison should be got from the stomach by emetics wherever possible. Cases of accidental poisoning from Paris green are frequently reported in the daily papers.

Paris green are frequently reported in the daily papers.

It is very important that stubble land intended for seeding with wheat should be ploughed as early as possible. Only thus can the soil be made compact enough to insure a good seed bed. Besides, on the newly-ploughed land the rains that come soak into the soil, while on stubble they run off and leave the seed bed dry and hard when the time far seeding arrives. An early ploughed stubble has nearly as many advantages for killing weeds as most summer fallows.

Mulching Winter Wheat.

Mulching Winter Wheat.

The Elmira Farmer's Club discussed this subject a few years' cropping. In starting a garden on an ordinary piece of ground, which has not before been used for this purpose, two or three years are required to get it pulverized and enriched sufficiently to produce a first-class crop, hence the necessity for retaining the same piece of ground for gardening purposes. This can be done by adopting a proper system of rotation. It is a good plan to make a diagram of the plot used for a garden, and have it marked off into divisions of suitable proportions for the vegetables required. Each division should be numbered, or, what is just as good, the name of the vegetable raised the sar Howev made, and the same proportions for the vegetable raised the sar that by referring to them, one could ascertain but reported to get it pulverized and enriched sufficiently to produce a first-class crop, hence the necessity for retaining the same piece of ground for gardening purposes. This can be done by adopting a proper system of rotation. It is a good plan to make a diagram of the plot used for a garden, and have it marked off into divisions of suitable proportions for the vegetables required to get it pulverized and enriched sufficiently to produce a first-class crop, hence the necessity for retaining the same piece of ground for produce a first-class crop, hence the necessity for retaining the same provent as good plan to make a diagram of the proportions for the vegetables a

Rotation of Garden Crops

plaints are made. A very bountiful crop will no doubt be reaped, with the general yield over an average.

OATS.—The extent to which oats has been sown as compared with that of last year shows an average increase of fifty-eight per cent. In a great many localities the spring was backward, and oats sown late were injured by frosts in the early part of June. Serious injury, however, is only reported in a very few places. Grubs or worms are also spoken of as working destruction in some localities. The great majority of reports speak confidently of a good average crop, and no fears are expressed of any failure or scarceness.

BARLEY.—Though not grown to nearly so great an extent as wheat or oats, barley shows an average increase in acreage of thirty-six per cent. over 1882. This grain seems, too, to have suffered to a considerable extent from the early June frosts and also from worms. However, very encouraging remarks are made, and a good fair average crop will be general. The dampuess of the ground in the early part of the season and the want of rain later on has caused the straw to be short, but reports generally speak of barley as Have you not frequently noticed that some men change their garden spots every few years? If you ask them why they do so, they will tell you that vegetables don't seem to do well there after a few years' cropping.

sionary was able to make a

TRANSLATION OF THE FOUR GOSPELS
into the Tukudh tongue; and also of the three epixtles general of John, and portions of the prayer-book. These translations he took with him to England in the beginning of 1833, and they were printed by the British and Foreign Bible Society. The Tukudh language is used by the Indians who are accustomed to assemble at Fort Yukon and at Peel river, the whole number of whom is about 500. Mr. McDonald returned from England in May, 1873, having arrived there at the end of the preceding January. He reached Winnipeg on his way back before the end of May, and left in June to continue his journey to his station at Peel river. His stay in England was too short to admit of the completed in the course of the following summer and forwarded to Winnipeg, whence they reached Fort Simpson on the Mackenzie in autumn of the following year. It was not until the next year (1875), two years from the time of the author's visit to England, that the books were received at Peel river. Since that time nearly all the young mea and women and some of the others
