LATEST SEALING NEWS.

THE FIRST SEALER HOMEWARD
BOUND—GULF STEAMER PASSED
CHANNEL AT 6.30 LAST
EVENING—APPARENTLY WELL
PACKED—STEAMER SUPPOSED
TO BE SOUTHERN CROSS OR
TERRA NOVA, BUT TOO FAR OFF
TO IDENTIFY.

Last evening matters were astir in sealing circles, when the news was currently reported that a steamer had passed out of the Gulf loaded. Just after tea a large concourse of people assembled near the General Post Office, where word was received that a Gulf steamer was homeward bound and deeply laden. Many conflicting messages were posted up as to what steamer was coming. The only official message was received at 7 o'clock last night by Mr. Stott, Postal Telegraph Superintendent from the operator at Port aux Basques, and read as follows:—

"Steamer passing out of the Gulf, distant, supposed to be Southern Cross or Terra Nova; flags flying; looked well fitted."

The general opinion is that the reported steamer is the Southern Cross while a great many hold that it is the Terra Nova, on account of the latter ship being reported for 24,000 five days ago, while the catch of the "Cross" was not reported for the spring, though she was mentioned as doing well. As the names and hulls of both vessels are so different that it would be an easy matter for the operator at Port aux Basques to say definitely what steamer passed, the fact of the word "distant" used in the message to Mr. Stott and the hour the message came are assurances enough that the ship was too far off to identify; besides this it was dark. However, it is only a matter of a few days when the doubt will be removed. If it is the Terra Nova she would reach here about Wednesday evening, and if the Southern Cross she should arrive at Harbor Grace about the same time, assuming that favorable weather prevails and considering that either vessel is well fitted.

Since we went to press on Saturday, the subjoined messages were received but nothing of an encouraging character:

From Beothic to Job Bros.
Saturday Night—"Pierce morning, wind N. and snowing; can see one boat and seven pans; think the rest are taken and beaten up; took 900 young yesterday."
From Nascopie to Job Bros.
Sunday—"Steamed 50 miles today, saw only a few seals. Adventure, Beothic in company."
From Stephano to Bowring Bros.
Sunday—"Butting all day for less than 20 miles; no sign on board and stowed down 18,000."
From Fitzgibbon to Bowring Bros.
Sunday—"Nothing new to report."
From Eagle to Bowring Bros.
Sunday, 6.15 p.m.—"Nothing new

TO BUILDERS AND PAINTERS.

We have just received a large shipment of Window Glass, Paint, Varnish.

Earles to Close Business at Twillingate.

The sensation of this week has been the announcement that Earle, Sons & Co. have decided to close out their business on the South Side and gradually realize on the whole property there. This decision has been arrived at partly on account of the unsatisfactory nature of that premises from the standpoint of shipping facilities, inaccessible as it is to our coastal steamers and making it necessary to transport all goods, but more especially cask fish, by schooner or lighter to some more convenient place for shipment. This added expense, together with the fact that the company has already a plant at Fogo, which is adequate to handle all the fish they need, are chief reasons which have caused them to take this step. The property will not be immediately closed down, but will still run on for a year or more while the stock is gradually disposed of, and some of the hands will continue on for a while yet—Twillingate Sun.

Household Notes

Whites of eggs should be cold if you want to beat them very stiff. It improves prunes to add a little cider to the water in which they are cooked. Steel knives can be very well cleaned by a paste made of emery powder and oil.

Muslins must be ironed wet. If allowed to get dry, they will have a rough appearance.

All muslins should be starched wet. If they are starched dry, they never took so clean.

Always use cotton instead of silk when mending gloves. The cotton will not pull the kid.

Fruit jars can be easily opened if you will take hold of the top with a piece of sandpaper.

In starching colored muslins, do not allow the starch to be too hot; it will destroy the color.

Food for late comers can be kept hot by covering it tightly and placing it in a pan of hot water.

Scissors are excellent to shred lettuce; they are much more convenient than using a knife.

It is good economy to save the flasting threads. Wind them around a spool as you take them out.

Stains on mirror glasses can be removed with a flannel cloth dampened with spirits of camphor.

A little flour sifted into the fat before frying mush will prevent the fat from spluttering and flying.

Cream soup is improved by adding a spoonful of whipped cream to the top of each cup before serving.

When beating butter and sugar to a cream a perforated spoon will be found more convenient than a fork.

A piece of wire screen cut to fit and put in the bottom of the oven will prevent it from burning things on the bottom.

The s.s. Morwenia reached Halifax at 10.30 a.m. to-day. She is set down to leave New York again on April 4th.

The s.s. Talisman is scheduled to sail from New York again on the 15th of April.

CLEARED FOR OPORTO.—On Saturday the s.s. Little Gem cleared from Marytown for Oporto, with 2,783 qtls. of fish.

This Bond Yields 6 3-4 p.c.

—which is quite an unusual yield for a Canadian Public Utility Bond of equal standing and one warranting investigation of the various other investment factors necessary to make this Bond a desirable purchase.

We have prepared for limited circulation a few copies of a report dealing fully with the Sherbrooke Railway & Power Company—the issuing corporation behind this Bond.

Compiled from official sources it impartially covers every phase affecting the security, income, and marketability of this Bond issue. Would you like to have us send you a copy?

Lord Murray in Witness Box.

London, March 25.—Lord Murray, of Elibank, was in the witness box yesterday during the House of Lords inquiry into the Liberal party fund investments in American Marconi shares. He answered all the questions put to him slowly and deliberately, very rarely losing his calm.

Only once did he seem to hesitate with a reply, and that was when it was suggested that he come home from abroad to give his evidence before the House of Commons committee, and Lord Halsbury, keen and alert, in spite of his many years, said: "There is no good beating about the bush. Did you want to avoid coming before this committee or not?"

Lord Murray made ready no reply and then paused. After a few seconds he said: "I was quite ready to give my evidence before the committee, but I did not volunteer any evidence, because I was in hopes that it might not be necessary for the transaction with party funds to be made public. I think now that was neither wise nor correct."

"I was quite ready to give my evidence before the committee, but I did not volunteer any evidence, because I was in hopes that it might not be necessary for the transaction with party funds to be made public. I think now that was neither wise nor correct."

Spalding's Base Ball Guide.

The thirty-eighth annual number of the Spalding Official Base Ball Guide has made its familiar and seasonable appearance. Since the death of Henry Chadwick, the "Father of Base Ball," who was its editor for many years, John B. Foster, a former newspaperman and now the secretary of the New York National League Base Ball Club, has occupied the position. Mr. Foster's experience of thirty years well qualifies him as an authority, his connection with base ball being coincident with the most critical periods in the life of the national game.

The contents of the Guide include the usual editorials on important subjects connected with the game, an account of the recent tour around the world of the Giants and White Sox; the world's series of 1913, reviews of the season in the National, American (the latter by I. E. Sanborn of Chicago) and leading minor leagues, and a very instructive article on the art of batting. More alterations in the playing rules have been made this year than for many seasons past and deserve a careful study by all players.

"Since its earliest days the Guide has made a specialty of pictures of leading players and this year's issue surpasses all previous ones in the extent of illustrations, full page groups being shown of all the National and American League clubs and over one hundred and fifty action pictures of leading players of both organizations, in addition to scenes taken during the world's series and the playing season of both leagues. Group pictures of many prominent minor league clubs are also shown.

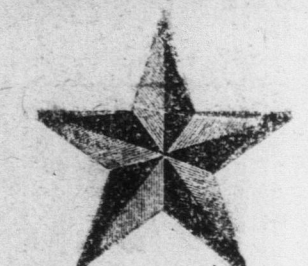

The Guide will be sent to any address in the world on receipt of 10 cents by the publishers, the American Sports Publishing Company, 21 Warren Street, New York City.

WATERMAN IDEAL FOUNTAIN PEN.

PEN 21 YEARS OLD; STILL WRITES

Below is the copy of a letter recently received by the New York office of the L. E. Waterman Company:

"In 1892 I bought a fountain pen in San Francisco.

"That pen was my companion through Princeton College, and was used to take notes in a thousand lectures.

"I went with it to the theological seminary and it helped me out in a thousand more lectures. It was my faithful friend during nine years in the pastorate.

"It has been in my hands through six years of editorial work. I presume that at least seven million words have been written with it.

"It has never failed me, never leaked and never balked. The cap was lost, and once the dealer supplied a new barrel when the pen was sent to be fixed.

"But the pen is still on duty. Twenty-one years old, but not retired yet! For I am writing this letter with it now.

"Very truly yours,

(Signed) "JOHN T. PARIS.
