BIG METEOR SEEN NEAR HYDE PARK

[Special to The Advertiser.]

Hyde Park, June 11.-A good deal of speculation is taking place among local people over the appearance recently of what is believed to have been a meteor. On Friday afternoon about 3 o'clock, a number of farmers while out plowing noticed a ball of fire about four inches in diameter with a long tail of smoke behind it. The tall extended for many yards. About three minutes after the ball went by a terrific report was heard, which sounded like very heavy thunder, and jarred the windows until they rattled. The smoke remained visible during this time and for about ten minutes after the report.

On Saturday, the Advertiser had a special story from Kinregarding a similar phenomenon, which was witnessed at 2:12 o'clock by Mr. William Welsh as he was out driving.
