A number of special attractions, which should prove of interest to every fruit grower, have been secured for the Lambton County Horticul-tural Exhibition, which takes place in Sarnia, on October 27, 28, 30. Several firms, well known in Canada, have already applied for space in which to exhibit appliances conmected with the fruit and vegetable growing industry. These exhibits, will include potatce machinery, spray outfits, spray materials, fertilizers, pruning tools, nursery stock and other materials of interest to fruit men.

Among the educational exhibits, of which several have been secured from various Departments, none will prove more interesting than an exhibit of market packages. This exhibit was a feature of the Government display at Toronto Exhibition. The exhibit will be in charge of F. C. Hart, Director of the Co-operation and Markets Branch of the Ontario Department of Agriculture. Other educational features will include an exhibit of insects pests and fungus diseases attacking fruit and vegetable crops. A large poultry exhibit, featuring model poultry houses, incubators, feeding devices, etc., will be on display. Also an exhibit in charge of S. C. Johnson, Provincial Vegetable Specialist, illustrating progressive culture.

An exhibition of representative manufactured products of Lambton

County will be held in the Arena

# CASTORIA

For Infants and Children In Use For Over 30 Years Miways bears

the Lambton Fruit Growers' Association. It is with the purpose of bringing to the notice of the general public the products and methods of manufacture of a number of Lambton's manufacturing industries, and encouraging the use of articles made

Red Cross Tea Room in the Exhibition Building for the purpose of raising money for the Red Cross Fund. An orchestra will be in attendance each evening and every person is invited to make the Red Cross Booth their social gathering place during the Exhibition.

### Some Northwest Grain Yields

The Grassy Lake correspondent of the Lethbridge Daily Herald says: Here are the yields reported for the threshing done since last week which prove that the crop is turning out far better than was anticipated—they are not just the best yields picked out but a fair indication of how the grain is running. Andrew Volk had 56 acres of wheat that avaraged 50 bushels per acre.

Gus. Schmidt had over 9000 bushels of pure Red Fife wheat off 260 acres. His oats yielded better than 100 bushels per acre by weight.

Ed. Johnston's oats yielded at the rate of 95 weighed bushels per acre.

of 95 weighed bushels per acre.
Berlins will have over 10,000 bushels of wheat from 300 acres, and some of the crop looked very light.
Walter Gwilliam threshed 5100 bushels

off 130 acres, and a 50 acre field that was disked in on stubble produced at the rate

of 22 bushels.

Hart Bros., in the Sherburne district, got.5100 bushels from a hundred-acre field of wheat.

For Burns and Scalds.—Dr. Thomas' Eclectric Oil will take the fire out of a burn or scald more rapidly than any other preparation. It should be at hand in every kitchen so that it may be ayailable at any time. There is no prevaration required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

There Is an Infinite Variety of Materials Used.

LEATHER, WOOL, SILK, LINEN.

The Use to Which You Will Put the Room Will Influence Your Choice of Fabric For Your Scheme of Furniture

There is such an infinite variety of materials for furniture covering that it is almost impossible to include all types in a brief discussion. Leather, wool, silk, linen and cotton are all used. Leather is dignified looking, and the good qualities are durable, but in the cheaper grades the surface tends to wear off and crack, and it is often rather stiff and uncomfortable. Silk materials are appropriate in certain places, but are too expensive for common use, except perhaps for cushion covers, hangings and possibly for the covering of a choice piece of furniture. Cotton is inexpensive and does not wear through quickly, but often it does not hold its color well and also catches dirt easily. Nevertheless it is frequently used in cretonnes, chintzes and similar printed goods and in low priced velours, tapestries, etc.

It is worth noting that mercerizing and some of the other new methods of treating cotton during its manufacture have improved its appearance and also its wearing qualities. Linen is oc-casionally used in materials similar to chintzes, but its most common use in furniture coverings and draperies is in velours, a sort of heavy velvet material which is also made in cotton, but which is more durable in linen,

Except for the fact that moths and buffalo beetles are so likely to damage it, wool is probably the most satisfactory fiber for upholstery. It is more durable than silk or cotton, does not catch the dirt as easily as the latter, and holds its color excellently. It is made into a great variety of materials—damasks, tapestries, plushes,

The use to which the room is to be put influences the selection of materials in furniture coverings and draperies. Gay, light chintzes or cretonnes are appropriate for a bedroom, which one wishes to have clean and airy looking, whereas for a living room substantial looking material like velours or tapestry would be more suitable.

# PILES FOR FIFTEEN YEARS

Cured By Zam-Buk

To those who suffer from this painful malady the following letters will be of deep interest. Mr. J. McEwen, of Dundas, Ont., writes: "For firteen years I suffered with piles and could get no permanent cure until I tried Zam-Buk. After

manent cure until I tried Zam-Buk. After having given Zam-Buk a fair trial I found I was getting better, and in the end it completely cured me."

Mr. James Ruddy, of Killaloe, Ont., says: "I suffered greatly from piles. The pain from these, as anyone who suffers from them will know, was at times almost unbearable. I tried first encouraging the use of articles made in Lambton, that this feature of the Exhibition has been undertaken by the Sarnia Board of Trade, believing and commenced with the treatment. To that it will prove of great interest to every visitor.

The ladies of Sarnia will operate a Red Cross Tea Room in the Exhibition and commenced with the treatment. To my great jov. after perseverance, I obtained relief from the agonizing pain of the pills. Having been cured by Zam-Buk I heartily recommended the balm to large see from piles.

Buk I heartily recommended the baim to all sufferers from piles."

Why not end your suffering? Take the advice of the hundreds who have done so and give Zam-Buk a fair trial. This marvellous remedy quickly relieves the suffering, it soothes and heals the inflamed, irritated hemorrhoid veins, and perseverance with Zam-Buk effects permanent cures.

perseverance with Zam-Buk effects permanent cures.

Every home needs Zam-Buk—accidents will happen, and Zam-Buk is the best "first aid." It quickly takes the sting out of a cut, the fire out of a burn or scald, the soreness from a bruise. Blood-poison or other complication cannot creep in where Zam-Buk has been applied. It is a sure cure for piles, eczema, ulcers, children's scalp sores, varicose veins, cold cracks, chapped hands, etc. 50c. at all druggists and stores, or post-paid from Zam-Buk Co., Toronto, for price. Refuse substitutes and harmful imitiations.

### CHOP STUFF.

John E. Adair, a resident of Carodoc since boyhood died at Strathroy last week of heart trouble, aged 74 years.

A local intelligence office has been opened in Strathroy to furnish information regarding the local labor situation and give information to those wanting work or hav-ing work for someone to

Petrolea has organized an Automobile Club with an initial membership of 24. One of the objects of the club is to exert an influence for better roads, and to advocate a reasonable regard on the part of motorists for the rights of others using the highways. the highways.

There is some talk of Hydro Power being installed in Euphemia. A number of the influential farmers are looking into the conditions to secure it, and, no doubt, before spring that municipality will be lit up with natures energy.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot in-jure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worn infant.

#### EGGACTLY

(By Mary Ann)

The other day I was present when a conflag took place between a farmer and his far better half -as to what a stale egg really is, or eggs suitable for sale at the store. The argument waxed fat and furious (of course she would have the last word) and he to prove that an egg was fresh and good for dyspepsia within the twenty-one day limit smashed one on the floor, and dear oh dear the atmosphere changed suddenly The air was so thick it seemed as if a dozen of those black and white animals so fond of chicken were out for recess. He coughed, she cough ed and I excommunicated myself out the back door. It is needless to say he looked sick. The point was exploded. That egg was not good for dyspepsia by any means, still that husband would make his wife send such eggs to the store in exchange for clean goods. From a financial standpoint that man had a head on like a tack, but morally speaking he was a sinner who needs lot of prayers. There, are a lot of just such eggs put in the market basket that should be kept out. I contend that farmers would make a higher market by selling strictly fresh eggs, which could be done by testing. The wholesaler would soon advance the price to the merchant and the merchant to the farmer. There should be a heavy fine imposed on the seller of bad eggs, whether he be producer or dealer. Thousands of dollars are spent, annually by wholesale houses testing which could chiefly be avoided at home, and you bet farmers pay

## Women's Suffrage

At the beginning of the war some people thought women's suffrage would be one of the issues which would drop out of sight for some time. As a matter of fact, however. the movement is gaining ground rapidly.

The Alberta government has an nounced that a women's suffrage bill will be introduced at the coming session. A similar bill will also be introduced at the first session of the Norris government in Manitoba and the issue is becoming a very keen one in Saskatchewan with prospects

of some action very soon. When the women of the three prairie provinces have full provincial rights of voting and when, as is likely, this will extend to votes in the federal elections, for provincial lists are used in both contests, a great impetus will be given to the movement for women's suffrage in the provinces where success at present does not seem near, for the women of one part of the country will not want to be discriminated against compared with women in other provinces, in the field of federal as well as provincial politics.

Since last April the remount depot, now located in Ojibway, has handled 70,000 horses on route for the battle-fields of Europe. Last week 6,700 horses were handled. Since removing the depot to Ojibway there has been a marked falling off in the percentage of sick animals, due, in a large measure, to the improved conditions obtaining, and the excellent drainage system installed.

One-third of all the persons employed

One-third of all the persons employed in modern industry in China are women and children.
