## **Vegetable Prospects**

The secretary of the Ontario Vegetable Growers' Association states that reports received from the branches of the Association at Oshawa, Toronto, Berlin and Brantford indicate that the tomato plants sown this year suffered from cold weather and are somewhat damaged by the cut worm. The acreage is about the average. Onions are slightly on the increase as far as acreage is concerned, and the conditions of the crop fair, although some damage is reported from root maggot. Early cabbage and cauli-flower are slightly damaged by cut worm and injured by cold.

Reports from Eastern Ontario, from the branches at Ottawa, Kingston, Belleville and Picton showed that there is an increased acreage of tomatoes with prospects good. Potatoes are an average acreage and onions show a slight increase in acreage with the plants looking well. In the Eastern district onions are nearly all transplanted. With the early cabbage and cauliflower the acreage sown is about the same as last year, but the crop is suffering from cold.

In Western Ontario, at Sarnia, St. Thomas, Stratford, Woodstock and London the tomato crop shows a slight increase in acre-

## FRUIT LANDS

SALMON ARM, Shuswap Lake, B. C., has the finest fruit and dairy land in B. O. No irriga-tion necessary, mild winters, moderate sum-mers; no blizzards, or high winds; delightful climate; enormous yields of fruit, vegetables and hay: good fishing; fine boating amidst the most beautiful scenery, and the Salmon Arm fruit has realized 25 cents per box more than other fruit in B. C. Prices of land moderate, and terms to suit. Apply to F. O. Haydock, Salmon Arm, B. O.

Salmon Arm, B. C. GROW APPLES AND GROW RICH — 10 acres in British Columbia's finest fruit growing district will support a family in comfort. Prize fruit, enormous crops, high prices, big profits=\$200 to \$500 per acre. Established settlement, no iso-lation, plenty good neighbors, best transporta-tion, good markets, grand scenery, hunting, fishing, shooting; school, church, stores, post office, hotel; daily trains. Splendid climate; fine summers, mild winters; high winds and low temperatures unknown. Prices right. Easy terms. Proofs, plans, particulars.—Fruitvale, Limited, Land Dept., Nelson, B. C.

age, although the planting was late. The potato and onion acreages are also slightly larger than last year and the condition of the crops good. Early cablage and cauli-flower are showing a larger acreage than formerly and Sarnia reports a large excess in the growing of the sugar beet for beet sugar factories.

sugar factories. The Southern district, as reported on by the branches at Hamilton, Dunville, Ojib-wa and Tecumseh show that the tomato acreage is about as usual, with the excep-tion of Hamilton, which is 25 per cent. less with the planting completed. In the potato crop the acreage is much the same as last year, but early planting damaged by wet weather; second planting doing well. In onions Hamilton reports an increased acreage, Dunnville same as last year and Ojibwa age, Dunivine same as last year and Ojiowa an increase. Early cabbage and cauliflower are doing well in this section but the season is late and some fields are slightly damaged by cut worm. The lettuce and radishes are a good crop.

#### Manitoba Conditions Geo. Batho, Winnipeg

So far this has been a very unusual season. March was remarkably fine; April and May were frosty, windy, dry and backward; and June for the most part has averaged very hot.

The effects of the numerous frosts in April and May were disastrous to nearly all kinds of fruits, although a little of the late bloom escaped destruction. Even the maple and elm trees had all their seeds de-stroyed by frost in this locality.

There is developing quite a large trade in There is developing quice a large trade in this city in bedding stock, and sales have been large this year. Some lines were well sold out some time before the demand had ceased. There are not as many of our gar-deners as there should be who have learned the value of perennials and the effective the value of perennials and the enective use of shrubbery. Many of the perennials do exceedingly well here—even better than in warmer climates—but as yet great reliance is placed on annuals.

There has been a very big sale of straw-berries in the city of Winnipeg this year. For more than two months this fruit has been selling in large quantities, coming first been setting in large quantities, confing first of all from Louisiana, then later from Cali-fornia, Oregon, Washington and perhaps a very few from British Columbia. Apricots are now in the store windows. It is expected here that there will be a big supply of fruit from the Pacific Coast country this season.

Trees and plants set out this spring have done well and everything is looking at its best.

### New Zealand Apples for English Market

The first trial consignment of apples was sent from New Zealand recently to the English market. According to reports received, the fruit was packed in an approved style and carefully inspected before shipment.

It is contended that New Zealand will be in a better position than Tasmania to send fruit to the English market, as their season fruit to the English market, as their season is generally a fortnight earlier. This year it is, in fact, four or five weeks ahead, which means that this consignment from New Zealand would arrive at a time when the English market was almost depleted of enplose. In view of the seasons being the the English market was almost depleted of apples. In view of the seasons being the reverse, the advent of this new contributor of supplies to the British market will not conflict in any way with the increasing quantities of Canadian fruit which reach Great Britain during the winter months.
