On Friday last a special Grand Trunk train left Toronto en route for the Philadelphia Exhibition. It consisted of the engine and 14 cars containing about fifty-four horses sent by Ontario exhibitors. The animals were all magnificent specimens, and the agricultural and heavy draught horses will compare favourably with any that can be produced by other countries. Of the fifty-four horses, twenty-seven were collected in Toronto and twenty-seven in Paris. Their total value is estimated at \$86,000, an average of nearly \$1,600 apiece. It might be mentioned that a fine pair of iron grey geldings weighing 4,100 lbs. were sent from Toronto by Mr. W. Boyd, and attracted great attention.

The train will run through in express time, and it is expected will reach Philadelphia on Sunday. At Buffalo a break in the journey has been arranged for, so as to give the horses a beneficial rest. Every care has been taken to secure the comfort and well-being of the animals, each of which is provided with a well-constructed stall, thoroughly padded, so as to reduce the chances of injury in transit to a minimum. Mr. Mc-Dougall, the Commissioner for Ontario, has been indefatigable in his exertions to secure complete arrangements in every detail connected with their transit and exhibition.—*Globe*.

'RESERVING TOMATOES.—In order to preserve tomatoes through the year, it is not necessary to resort to the expense of canning them. If stewed in the ordinary manner, but without butter or crackers, only a little salt and sugar, they can be put into jugs—two quart or gallon, according to the size of the family—and if corked up tightly will keep for a year. To make assurance doubly sure, some melted wax may be poured around the corks. Tomatoes may also be dried easily. Skinned and prepared with a little sugar they make a good substitute for figs, and are sold under the name of tomato figs.

MR. DICKSON, on the Gibbs farm, near Oshawa, cut forty acres of wheat, and from the whole forty acres does not get enough wheat to make a loaf of bread. The rust completely blighted it.

It will be interesting to the consumers of whortleberries to know that in Michigan the Indians gather the fruit in their boots.
