

# Typical Vaccinia

(FROM PHOTOGRAPH)

A. B., male aet. 20, inoculated with PARKE, DAVIS & COMPANY'S ASEPTIC VACCINE Oct, 25, 1901; examined Nov. 1, 1901.

Although thousands of persons have been vaccinated with our Virus not a single death nor any serious after effects have been attributed to its use.

*It protects against smallpox.*

*It does not infect the patient,*

WRITE US FOR LITERATURE.
