stock which is the cheapest and latest in the Dominion.

**Young's Improved
PULLEY STILE HINGE**
For Box Frame Windows.

SHUT — (to take out sash) — OPEN

WITH the above hinges the ordinary double hung window sashes can be taken out of the frames for cleaning, etc., without disturbing the stops or parting beads, and are the result of long experiment, to insure strength and perfect action. The parting beads are cut to mitre, and slide in with the pockets H, to clear the check of sash—thus the sash recedes in at one side, and clearing the opposite parting bead is taken out, the pulley boxes are in the pockets H, and the lines are held in a lock plate on inside of sash by means of a knot on the end of the line, which is released and run up to the pulley box in taking out the sash. The attention of architects and builders is called to these hinges. For further information and price apply to the inventor,

J. H. YOUNG,
117 KING ST. WEST, - HAMILTON, ONT.
AGENTS WANTED.

— THE —
Sanitas Water Closet

THE SANITAS PATENT WATER CLOSET

Has the simplicity of the Short Hopper, all the sanitary advantages and conveniences of the best improved modern closets, and offers peculiar to itself, in being anti-siphonic, quick-acting, self-sealing, free from splattering or waste of water, and, when properly set, almost noiseless in operation.

The supply pipe between the cistern and the closet stands permanently full of water, and, discharging below the level of the standing water in the bowl, the action is instantaneous and the noise of flushing is deadened, so that when properly set and with the cover down and toilet-room door closed, no sound can be heard from without. The water is held in the supply pipe by atmospheric pressure, and will instantly restore the trap seal should it at any time be lowered by evaporation or siphonage.
