

"Medusa" Waterproof Compound

makes Concrete Impervious to Water, Prevents Discoloration and Efflorescence

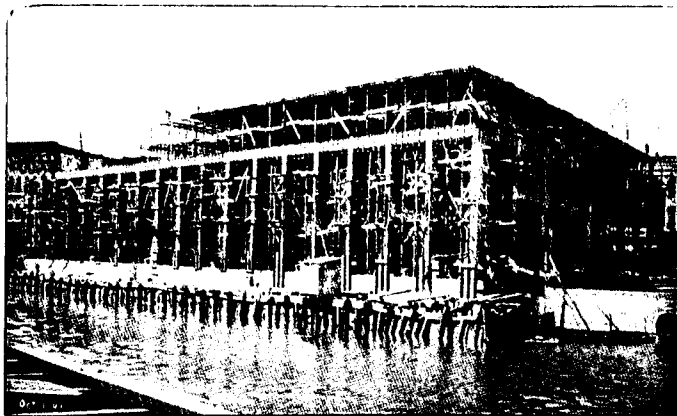

"MEDUSA" has been used on all kinds of engineering works for years, and stood the test.

Let us help you on your Water-proofing Problems. Write us for particulars.

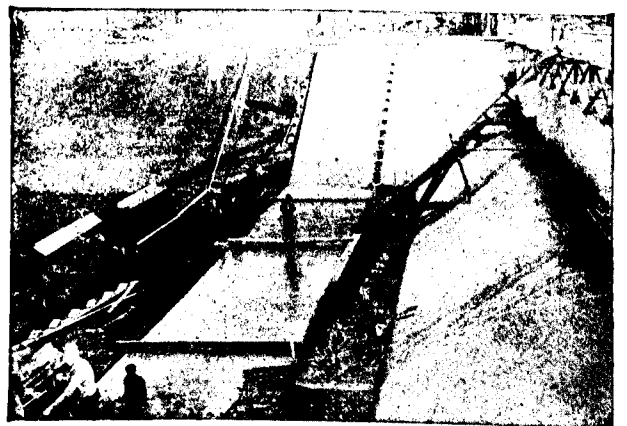

St. Louis Auditorium, the largest swimming pool in the world, contains over one million gallons of water. "Medusa" Waterproofing used throughout.

"MEDUSA" gives absolutely permanent results. Will not affect strength, setting or color of Portland Cement. It is a dry powder, to be thoroughly mixed with dry cement before sand and water are added, thus becoming an inseparable part of the concrete.

Bostwick-Brown Hardware Co. Building, Toledo, Ohio. Walls and floor are 20 ft. below water level. "Medusa" Waterproofing used in basements.

Made
in
Canada

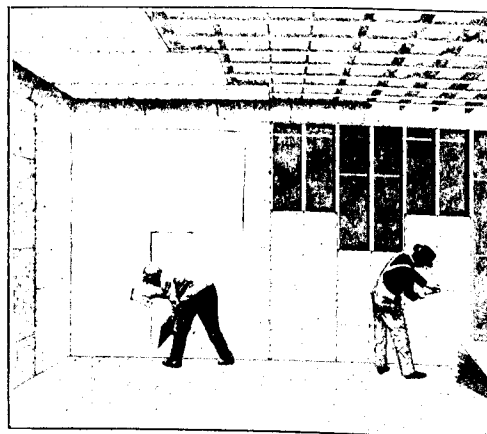

Oil City Works Reservoir, being waterproofed throughout with "Medusa" Waterproofing.
