LIBRARIAN

December 11th.
1923.

Dear Colonel Bovey:-

I return herewith the letter from Mr. Dunlop of the University of Toronto regarding the British Empire Exhibition.

I. I am strongly in favour of having McGill send over a suitable exhibit if this is at all possible, for the following reasons:

1. McGill is so well known in England that its omission from the educational exhibits would cause comment.

2. If Toronto is sending an exhibit McGill ought to do so also.

3. The cost involved would not be expensive advertising in view of the quite unusual opportunity for publicity at such an exhibition.

4. The patriotic duty of the University in showing the educational resources of the country, which are at least as important in their way as the grain fields, farm-lands, forests and water-power that are sure to be represented in the exhibition.

II. The material available might be of the following nature:

1(a) A bird's-eye view of the grounds from the top of the Maxwellton Apartments.

(b) A similar view from the architect's drawing showing proposed buildings.

2. A large poster showing the Faculties and affiliated colleges.
