Sir Arthur W. Currie,
McGill University,
Montreal, Canada

My dear Dr. Currie:

Thank you very much for your cordial invitation to give a lecture at McGill University on "Industrial Health from the Standpoint of Tuberculosis". I would be very happy to give such a lecture on one of the Fridays of your course and I would appreciate very much if you could let me know whether February 16th or March 9th or 16th would be satisfactory. I will have to be absent for several days the last week in February and this would make it difficult for me to be there the 23rd of February or 2nd of March. You were very kind to ask about remuneration, but I would be glad to give the lecture if you could pay my actual traveling expenses.

Sincerely yours,

Linsley R. Williams, M.D.,
Managing Director
