The making the presentation to St. Mary's, Hon Mr. Veniot remarked that he had gone in for rowing while residing interested in the races. He expressed the hope that New Brunswick, Nora Scotia and P. E. Island would gain in to decide annually the rowing cham-pionships of the maritime provinces. He characterized Shediac harbor as one of account of the still water and the god climate. Hearty cheers were then given for Hilton Belyea and the St. Mary's ... Many of the 804 Shediac heroes were then presented with suiver watch fobs and would be likewise remembered on pre-senting themselves to the committee.

who is intimately acquainted with the great oil fields of Kansas, Oklahoma and Texas . Mr. Tobias has owned a large number of oil properties, including leases and oil wells, and at present has holdings in both Texas and Oklahoma.

The directors of the Royal Oil Wells Company have thoroughly investigated the character and standing of our general manager, both through the mercantile agencies and the banks. Reports from all sources are such as to justify our confidence in his ability as well as his business integrity.

Oil pers

(Assistant Publisher of The Morning Telegraph.)
When I boarded the train for Texas about a month ago I was somewhat skeptical about the reports of the fabulous wealth which was coming to oil investors in Texas. I was prepared to meet a lot of smooth-talking, silvery-tongued oil stock salesmen. To say the least, I expected that the oil men that I was to meet would show me the bright side of the oil business and put their best foot forward. Thus I was prepared to discount about 80 per cent. of what they told me and take what I saw with a grain of salt.
After having spent this month in going over the oil fields, my greatest worry is that if I tell the actual truth—the bare, cold facts—I will be considered a candidate for the presidency of the Ananias Club, or speaking in the vernacular, the best liar east of the Mississippi.
I am told that in the town of Ranger a year ago there was hardly a man in the town who had a bank account of \$5,000. Today there are probably twenty-five who have a bank account of \$5,000,000. Million-aires are so common that nobody thinks anything about them.
Everybody seems to have plenty of money, even drillers making \$12 and \$15 per day.
Men and women have gone to sleep at night only to wake in the morning to find themselves multi-millionaires, because they have struck oil.
With modern machinery consuming an ever increasing amount of oil, and with England, France and Italy and all foreign nations calling upon us for more and more oil, the demand is sure to exceed the supply for a long time to come. Texas today is the Aladdin of the world and opportunities there are greater than ever before.

than ever before. Frankly, I must confess, that I expected to find a lot of crooks in the oil business. All my early train-ing had taught me to shun an oil investment as I would a snake. However, I must say that in my opinion the great majority of Western companies are absolutely on the level. I never met a finer class of people in my life than the men who are putting out these Western companies. There is no need for an oil company to be crooked. There is an inexhaustible supply of oil in Texas and there is so much money to be made by simply being fair and square that it is not worth while to be dishoned while to be dishonest.

vestors who wish to invest in amu smaller than are being accepted by the larger companies in which the writer is

I have been organizing companies for several years and I HAVE NEVER

YET PROMOTED A FAILURE. Royal Qil Wells will be my best effort. I take full personal responsibility for Royal Oil Wells, and tender you my personal guarantee that we will produce oil and pay dividends. No effort will be spared to make the company a whirl-

wind success. Respectfully, GLENN CRAIG TOBIAS,

President-General Manager

Jump on a train and go down and see for yourself, as I did, the wonderful opportunities which are open in every line of business in Texas towns adjoining the oil fields. Talk with the farmer boy of a month ago, who today is a multi-millionaire. Talk with the immigrant woman who invested \$300 and today is worth over a million and owns her own oil well and is getting richer every

A man goes out and buys a lease in territory in which geologists have told him he should strike oil. He needs twenty-five to fifty thousand dollars to erect a derrick and drill a well, depending on the depth to which he must dig before he strikes oil. In some sections the oil lies in shallow fields, and in other sections he must dig much deeper. Barring accidents, such as drilling a crooked hole and having a cyclone destroy the derrick, delay in getting materials because of lack of transportation, within about thirty to sixty days he knows whether he srikes oil or has a dry hole. It doesn't take much brains to drill a well right next to another well which is a producer, and strike oil, and if the company's holdings are in a producing territory where geologists state there is oil, the investor has more than an even change to make a fortune.—From The New York Telegraph.

FACTS AND FIGURES. WHAT THE DRILLING RECORDS SHOW.

When an oil man decides to change operations into a field that is new to him, the first thing he does is to study the drilling records, the averages as supplied to the new field. When you put your money into the oil business you should know the drilling records, what the percentages of the business are—for and against you. Records for the entire United States for the month of March, show that there were 2,584 wells drilled. Only 408 were dry. In April there were 2,900 drilled—only 467 were dry. In the Mid-Continent fields, including Kangas, Oklahoma and North Texas, month of May, 1,504 wells were drilled—279 only were dry. In June, 1,417 were drilled with only 262 dry. In North Central Texas alone, 401 wells were drilled in the month of June. Of these 70 were dry. In May there were 283 wells drilled in North Texas with only 57 dry holes. Do you call that a gamble? Yet one good oil well will pay for a dozen dry holes. What matter if you do get were dry. In May there were 283 one dry hole to every four oil wells?

MILLIONS IN OIL---GET YOUR SHARE NOW

FIVE WELLS TO BE DRILLED --- FIVE CHANCES FOR A GUSHER IN THE HEART OF THE PROVEN OIL FIELDS

ROYAL OIL WELLS WILL DRILL FIVE WELLS IN THE DEEP SAND PROVEN OIL FIELDS. EVERY WELL WILL BE DRILLED RIGHT UP AMONG THE LARGEST PRODUCERS IN THE FIELD. NO WILD-CATTING, NO EXPERIMENTING, NO GAMBLING ON TRENDS OR STRUCTURES.

EVERY WELL, ABSOLUTELY WITHOUT EXCEPTION, WILL BE DRILLED WITHIN 250 YARDS OF A PROVEN, PRODUCING OIL PROPERTY.

THIS POLICY IS AN IRON-CLAD GUARANTEE FOR YOUR PROTECTION, AND THE FIRST ASSURANCE OF ITS KIND EVER OFFERED INVELT-ORS.

50% FOR DIVIDENDS

Royal Oil Wells is permanently pledged to the policy of substantial dividends—not 5 p. c. or 4 p. c. or 10 p. c., but a full half—50 p. c. of every dollar's worth of oil produced. Do you realize what this means to you? Oil companies frequently earn a full 50 p. c. on the capital invested in the short period of 30 days, many of them have earned 100 p.c. in 30 days. But the stockholder don't get it. Royal Oil Wells will be conducted on a different basis. When the money is earned it is yours. Royal Oil Wells proposes to give it to you and give it to you promptly. Thirty days after a well is drilled in you will begin receiving dividends from the oil produced. If our first well is a thousand-barrel well, 500 barrels a day or \$1,000 a day, will/go to our stockholders. There will be no set dividend rate. The earnings of each month will be split, 50-50 p. c. for dividends—50 p. c. monthly, 36 p. c. quarterly or 144 p. c. a year on every dollar in On the basis of one-half of our stock outstanding a daily production of 1,000 barrels would net you approximately 12 p. c. monthly, 36 p. c. quarterly or 144 p. c. a year on every dollar in-vested. We can't guarantee you that you will go directly into oil operations—the purchase and drilling of the very choicest locations to be had IN THE HEART OF THE PROVEN, PRODUCING OIL **PIELDS OF TEXAS AND OKLAHOMA**.
