

INVALIDS' HOTEL SURGICAL INSTITUTE

No. 663 Main Street, BUFFALO, N. Y.

Not a Hospital, but a pleasant Remedial Home, organized with

A FULL STAFF OF EIGHTEEN PHYSICIANS AND SURGEONS,

And exclusively devoted to the treatment of all Chronic Diseases.

This imposing Establishment was designed and erected to accommodate the large number of invalids who visit Buffalo from every State and Territory, as well as from many foreign lands, that they may avail themselves of the professional services of the Staff of skilled specialists in medicine and surgery that compose the Faculty of this widely-celebrated institution.

A FAIR AND BUSINESS-LIKE OFFER TO INVALIDS.

We carnestly invite you to come, see and examine for yourself, our institutions, appliances, advantages and success in curing chronic diseases. Have a mind of your own. Do not listen to or heed the counsel of skeptical friends or jealous physicians, who know nothing of us, our system of treatment, or means of cure, yet who never lose an opportunity to misrepresent and endeaver to prejudice people against us. We are responsible to you for what we represent, and if you come and visit us, and find that we have misrepresented, in any particular, our institutions, advantages or success, we will promptly refund to you all expenses of your trip. We court honest, sincere investigation, have no secrets, and are only too glad to show all interested and and add people what we are doing for suffering humanity.

NOT ALWAYS NECESSARY TO SEE PATIENTS.

the our original system of diagnosis, we can treat many chronic obscuses just as successfully without as with a personal consultation. While we are always glad to see our patients, and become acquainted with them, show them our institutions, and familiarize them with our system of treatment, yet we have not some one person in five hundred whom we have cured. The perfect accuracy with which scientists are enabled to deduce the most minute particulars in their several departments, appears claust minute particulars in their several departments, appears claust minute out it in the light of the early ages. Take, for example, the electro-imagnetic telegraph, the greatest invention of the age. Is it not a marvelous degree of accuracy which enables an operator to exactly locate a fracture in a submarine cable nearly three thousand miles long? Our venerable "clerk of the weather" has become so thoroughly familiar with the most wayward elements of nature that he can accurately predict their movements. He can sit in Washington and foretell what the weather will be in Florida or New York as well as if several hundred miles did not intervene between him and the places named. And so in all departments of modern science, all science, discusses have certain unmistakable signs, or symptoms, and by reason of this fact, we have been enabled to originate and perfect a system of determining, with the greatest accuracy, the nature of chronic diseases, without seeing and personally

examining our patients. In recognizing diseases without a personal examination of the patient, we claim to possess no mirraculous powers. We obtain our know-alse of the patient's disease by the practical application, to the practice of medicine, of well-established principles of modern science. And it is to the accuracy with which this system has endowed us that we owe our almost world-wide repatation of skillfully treating lingering or chronic affections. This system of practice, and marvelons success which has been attained display certain phenomena, which, being subjected to scientific analysis, furnish abundant and unmistakable data, to guide the judgment of the skillful practitioner aright in determining the nature of diseased conditions. The most ample resources for treating lingering or chronic diseases, and the greatest skill, are thus placed within the easy reach of every invalid, however distant he or she may reside from the physicians making the treatment of such affections a specialty. Full particulars of our original, scientific system of examining and treating patients at a distance are contained in "The People's Common Sense Medical Adviser." By R. V. Pierce, M. D. 1000 pages and over 300 colored and other illustrations. Sent, post-paid, for \$1.50. Or write and describe your symptoms, inclosing ten cents in stamps, and a complete treatise, on your particular disease, will be sent you, with our terms for treatment and all particulars.

OUR FIELD OF SUCCESS.

BISEASES OF Diseases of the Diseases of the Diseases of the Diseases of the Disease which does not exist. Our Complete Treatise on Diseases of the Disease o

ERIGHT'S DISEASE, DIABETES, and kindred madades, have been very largely treated, and cares effected in thousands of cases which had been pronounced beyond hope. These diseases are readily diagnosticated, or determined, by chemical analysis of the urine, without a personal examination of patients. who can, therefore, generally be successfully treated at their homes. The study and practice of chemical analysis and microscopical examination of the urine in our consideration of cases, with reference to correct diagnosis, in which our institution long ago became famous, has naturally led to a very extensive practice in diseases of the urinary organs. Probably no other institution in the world has been so largely patronized by suffers from this class of mahadies as the old and world-famed World's Dispensary and Invalids' Hotel. Our specialists have acquired, through a vast and varied experience, great expertness in determining the cract nature of each case, and, hence, have been successful in nicely adapting their remedies for the cure of each individual case. ten cente in postage stamps.

These delicate diseases should be carefully treated

These delicate diseases should be carefully treated by a specialist thoroughly familiar with them, and who is competent to ascertain the exact condition and stage of advancement which the disease has made (which can only be ascertained by a careful chemical and microscopical examination of the urino), for medicines which are curative in one stage or condition are known to do positive injury in others. We have never, therefore, attempted to put up anything for general sale through deuggists, recommending to cure these diseases, although possessing very superior remedies, knowing full well from an extensive experience that the only safe and successful course is to carefully determine the disease and its progress in each case by a chemical and microscopical examination of the urine, and then adapt our medicines to the exact stage of the disease and condition of our patient.

WONDERFUL
To this wise course of action we attribute the marvelous success attained by our specialists in that important and extensive Department of our institutions devoted exclusively to the treatment of diseases of the kidneys and bladder. The treatment of diseases of the urinary organs having constituted a leading branch of our practice at the Invalids' Hotel and Surgical Institute, and, being in constant receipt of numerous inquiries for a complete work on the nature and curability of these maladies, written in a style to be legsily understood, we have published a large Illustrated Treatise on these diseases, which will be sent to any address on receipt of ten cents in postage stumps.

CESS. These are fully treated of in our illustrated pampilet on urinary Diseases. Sent by mall for ten's in stamps.

STRICTURE:

STRICTURE:

TULE.—Hundreds of chese of the worst form of strictures, many of new greatly aggravated by the carcless use of instruments in the hunds of indexperienced physicians and surgeons, causing fulsy to the skill of our specialists have achieved extraordinary success. Sent by mall for ten'cents in stamps.

STRICTURES AND UBLNARY FISSTRICTURES and UBLNARY FISSTRICTURES and surgeons, causing fulsy inassages, urinary fistule, and other complications, annually consult us for relief and cure. That no case of this class is too difficult for the skill of our specialists is proved by cures reported in our illustrated treaties on these maladies, to which we refer with pride. To intrust this class of cases to physicians of small experience is a dangerous proceeding. Many a man has been ruined for life by so doing, while thousands annually loss their lives through unskillful treatment. Send particulars of your case and ten cents in stamps for a large, illustrated treaties containing many testimonials.

Epileptic Convulsions, or Fits, Paralysis, or Palsy, Lecometor Ataxia, St. Vitus's Dance, Insomnia, or inability Debility, arising from overstudy, excesses, and other causes, and overy variety of nervous affection, are treated by our specialists for these diseases with unusual success. See numberous cases reported in our different illustrated

HERNIA (Breach), or EUPTURE, no RADICAL CURE matter of how long standing, or of what size, is promptly and permanently cured by our specialists, without the kulfe and without dependence upon trusses. Abundant references. Send ten cents for

Illustrated Treatise PILES, FISTULE, and other diseases effecting the lower howels, are treated with wonderful success. The worst cases of pile tumors are permanently cared in litteen to twenty days. Send ten cents for illustrated Treatise.

DELIGATE
Organic weakness, notices debility, premature decline of the manty powers, involuntary vital losses, impaired memory, mental anxiety, absence of will-power, melancholy, weak back, and kindred affections, are speedily, thoroughly and permanently cured.

To those acquainted with our institutions, it is hardly necessary to say that the Invalids' Hotel and Surpical Institute, with the branch establishment located at No. 3 New Oxford Street, London, England, have, for many years, enjoyed the distinction of being the most largely patronized and widely celebrated institutions in the world for the treatment and cure of those affections which arise from youthful indiscretions and permicions, solitary practices, we, many years ago, established a special Department for the treatment of these diseases, under the management of come of the most skillful physicians and surgeons on our Staf, in order that all who apply to us might receive all the advantages of a full Council of the most experienced specialists.

Council of the most experienced specialists.

We offer no apology for devoting so much attention to this replected class of discases. Ho Apology.

We offer no apology for devoting so much attention to this replected class of discases believing no condition of humanity is too wretched to merif the sympathy and best services of the noble profession to which we belong. Many who suffer from these terrible discases contract them innocently. Why any medical man, intent on doing good and alleviating suffering, should show such eases, we cannot understand; and yet of all the other maladies which afflict mankind there is probably rone about which physicians in general practice know so little. We shall, therefore, continue, as herefore, to treat with our best consideration, sympathy, and skill, all applicants who are suffering from any of these delicate diseases.

Our Dat Home. distance just as well as if here in person.

A Complete Treatise (130 pages) on these diseases sent scaled,

A Complete Treatise (130 pages) on these diseases sent scaled, in plain envelope, secure from observation, on receipt of only ten

SURGICAL

PRACTICE.

Hundreds of the most difficult operations known to modern surgery are annually performed in the most skillful manner, by our Surgeon-specialists. Large Shones are safely removed from the Bladder, by crushing, washing and pumping them out, thus avoiding the great danger of cutting, when needed. Many Ovarian and also Fibroid Tumors of the Uterus are arrested in growth and cured by electrolysis, coupled with other means of our invention, whereby the great danger of cutting operations in these cases is avoided.

Especially has the success of our improved operations for Varicucelly, Hydrocele, Fistulæ, Ruptured Cervix Uteri, and for Ruptured Perineum, been alike gratifying both to ourselves and our patients. Not less so have been the results of numerous operations for Stricture of the Cervical Canal, a condition in the female generally resulting in Barrenness, or Sterility, and the cure of which, by a safe and painless operation, removes this commonest of impediments to the bearing of offspring.

A Complete Treatise on any one of the above maladies will be sent-on receipt of ten cents in stamps.

Although we have in the preceding paragraphs, made mention of some of the special allments to which particular attention is given by the specialists at the invalids Hotel and Surgical Institute, yet the institution abounds in skill, facilities, and apparatus for the successful treatment of every form of chronic allment, whether re-

GRATEFUL-COMFORTING

EPPS'S COCOA. BREAKFAST:

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills: It is by the judicious use of such articles of diet that a constitution may be gradually built up strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a proporty nourished frame." — Civil Service Grazette." Service Gazette."
