Country." This organization is strictly non-political, and has as its aim the removal from its meetings of all creed, church or social distinction. One strong feature is combined in the improvement of home and national life, for in the love of home the love of country has its rise.

Annual Meetings

It is again time for the Institutes to begin to plan for their annual meeting, and it is advisable that arrangements be made at the April meeting, for the annual meeting in May or early June.

If there are any accounts outstanding in the Institute, these should be paid, if there is money to meet the same, so that the books may be properly closed at the end of the Institute year.

It is important that the annual report of each branch should be sent promptly to the district secretary. The work of the district secretary is very often delayed because of the neglect of perhaps one branch secretary.

The district officers might also at this time begin to plan for their annual meeting, and should urge that each branch in the district be represented at the said meeting. The department will be glad to make suggestions regarding district annual meetings.

If any branch secretary has not already done so, she should at once send paid members for 1911-12 to the district secretary, or where there is no district secretary, direct to this office, in order that all members may receive the annual report for 1911.

Nobleton Joint Meeting

THE Women's Institute of Nobleton held their joint meeting with the Farmers' Institute at Nobleton, January 18th, in the basement of the Methodist Church. The first exhibition of cooking and butter took place, and was a decided success, notwithstanding the unfavorable weather. Judging from the number of entries, there being sixty-two in all, a live interest is shown in Institute work in Nobleton, and the branch is only a year old.

The following is a list of prizes given:

Cake, Dark Layer—1st, Mrs. J. A. McCutcheon; 2nd, Mrs. Jeffry.
Tarts, one dozen Lemon—1st, Mrs. W. Snider; 2nd, Mrs. H. Snider.
Pie, Plain Apple—1st, Miss M. McCutcheon; 2nd, Miss Ella Fry.
Pie, Fancy—1st, Miss E. Stewart; 2nd, Miss A. Ballard.
Fruit, 1 quart Preserved Pears—1st, Mrs. W. Snider; 2nd, Mrs. A. Hill.
Jelly—1st, Mrs. S. Hill; 2nd, Mrs. A. Campbell.
Marmalade—1st and 2nd, Mrs. H. Snider.
Cucumber Pickles—1st, Mrs. H. Snider; 2nd, Mrs. S. Davis.
Catsup—1st, Mrs. H. Thompson; 2nd, Miss Flo. Fry.
Bread—1st, Mrs. W. Snider; 2nd, Mrs. George Hill.
Butter—Mrs. S. Davis won the first special given by Mrs. J. W. Larkin. Mrs. John Mitchell was successful in winning Mrs. H. Pringle's special.
Butter, Institute Class—Three-pound prints, 1st, Mrs. H. Snider; 2nd, Mrs. Dew.
Cake, White Layer—1st, Miss Ella Fry; 2nd, Miss Dobson.

Proceeds from selling prize articles were \$6.35.

After judging competition, meeting was addressed by delegate, Miss S. Campbell, Brampton, subject, "Housekeeping and Home-making." Miss Campbell congratulated the ladies on their display and said she did a great deal of judging at fall fairs, and this was as good a specimen of articles as she had judged at many places in the agricultural buildings. "Progress" was the word for Institute workers, and Miss Campbell hoped to hear of more competitions in future. Housekeeping was a fine art, and if the young ladies were taught this art, how many happy homes we would have in future. The Farmers' Institute members came in and an auction sale of articles took place.

Tea was served to all and the gentlemen made happy with the good cup of coffee and nice dainties. Prize articles were sampled. Joint meeting was held in the evening, when a large number were present. Nobleton is to be congratulated on the success of their meetings owing to the systematic management of the ladies.

Any Edison dealer will demonstrate to you how Thomas A. Edison doubled the entertaining capacity of

The Edison Phonograph

when he invented

Edison Amberol Records

—the record which plays twice as long

Then you will understand why so many good songs, so much good music or every character never appeared in record form until the Amberol Record was perfected.

Then you will understand how, when you own an Edison Phonograph, you can now have all of the very best entertainment of every kind.

Then you will understand how this one advantage alone makes the Edison Phonograph the greatest sound-reproducing instrument as well as the greatest musical instrument—even if it had no other advantages. But it has: the sapphire reproducing-point, that does not scratch or wear the record and lasts forever—no changing

needles; exactly the right volume of sound for your home; home recording—the ability to make and reproduce your own records in your own home.

Any Edison dealer will demonstrate these great Edison advantages to you.

BRITISH RECORDS FRENCH RECORDS

In addition to our regular monthly list of Edison Standard and Edison Amberol Records, we issue regularly a number of British and French Records. Our British and French record catalogs contain the complete list of these selections, published in record form. Be sure to get them from your dealer when you go to buy your Edison Phonograph—and ask to have the new Record Supplements mailed you free every month.

There are Edison dealers everywhere. Go to the nearest and hear the Edison Phonograph play both Edison Standard and Edison Amberol Records. Get complete catalogs from your dealer or from us. Edison Phonographs, \$16.50 to \$240.00. Edison Standard Records, 40c. Edison Amberol Records (play twice as long), 65c. Edison Grand Opera Records, 85c. to \$2.50.

A SMALL CROP IS A WARNING

A small crop is proof that your land is run down—it is a warning to fertilize promptly.

Manure is the ideal fertilizer because it contains the very elements that crops have extracted from the soil. To get 100 per cent value from the manure you spread, you must use a good manure spreader. The pitchfork method is wasteful, entails hard, disagreeable work, and takes too much time.

When buying a spreader, be sure you get one that will last. You can make sure of the quality, efficiency and durability, by investing in one of the

I H C Spreaders

Corn King Cloverleaf

These spreaders are used on thousands of farms. Their strength, simplicity, and durability are matters of record. Why not look into the matter?

When investigating, remember that the power transmitting mechanism used on I H C machines is the most durable used on any line of spreaders. This results from the fact that the beater gears are held in a single casting which prevents them from springing out of alignment and cutting the teeth. The teeth are long and chisel-pointed to insure positive pulverizing of all manure. There is no wedging of manure against the beater bars. The teeth do not rim the bars.

The beater is large enough in diameter so that it does not wind. You will find many other striking advantages which will convince you of I H C superiority. Why not see the I H C local agent at once? I H C spreaders are made in different styles, in many sizes for every need. If you prefer, write nearest branch house for catalogues and full information.
