

THE LINN LOGGING TRACTOR

Hauling Approximately 9000 ft. of Hardwood—Doyle's Rule

The best Hardwood is each year becoming further distant from mill or railroad and is consequently greatly increasing in cost. In many cases very valuable wood cannot be touched, because horses cannot haul it the necessary distance.

The Linn Logging Tractor, pictured above, was designed exclusively for Winter Log Hauling in the North Country. It was developed and perfected in actual logging operations in the North Woods.

At best, and under very easy conditions, a good team cannot haul more than 1,000 ft. —and a good team will seldom walk faster than two miles an hour.

The Linn Logging Tractor solves this difficulty

Travelling, as it does, at six miles an hour—operating without difficulty down steep sandhills and up stiff grades—and over river and lake ice—hauling such loads as above pictured.

By its use the operator is enabled to place his logs at the Mill for very low cost.
