## Silage Produces Milk, Beef and Mutton Cheaper Than Any Other Feed

IF YOU erect a silo, you will at once find a decided increase in your profits. It does not matter whether you feed dairy cows, beef cattle or sheep, your stock will produce greater profits and thrive better than they would on any other feed.

When corn is put into the silo the full feeding value of the crop is conserved and the fodder and grain converted into a rich, succulent feed that is in every respect equal to the very best pasturage.

Silage, because of its economy and high feeding value, is recommended by every authority on stock feeding, and its many advantages have been proved by the experience of hundreds of thousands of farmers.

Many careful tests have been made of its feeding value; and these, without exception, have proved that silage produces more milk, beef or mutton at less cost than dry fodder or hay. The Vermont Experiment Station found that a certain amount of corn made into silage produced nearly one thousand pounds more milk than the same amount of corn fed as dry fodder.

## Ideal Green Feed Silos

are being used by thousands of Canadian farmers who are making bigger profits than before they erected a silo.

An Ideal Green Feed Silo will pay for itself over and over during the many years' service it will give you. Don't look upon it as an added expense and put off buying. It is an improvement that is absolutely necessary to prevent expense and waste on your farm.

Silo filling time will be here almost before you know it, so you should not delay getting your order in at once. Bear in mind that it takes a little time to erect a silo and that it costs less to do the work if you have plenty of time and do not have to go to the expense of hiring extra help to rush the work through. There is nothing to be gained by delay, and much to be saved by prompt action.

Ask for prices, terms and complete information. Our silo catalogue, which will be gladly sent on request, shows every detail of the Ideal Green Feed Silo and explains fully why this silo gives you more for your money than any other silo you can buy.

## GET ALL THE CREAM

THE best cream separators often fall below expectation because they are not properly lubricated. As you can't use tractor oil on a sewing machine, neither can you expect the best results when you lubricate your separator with ordinary farm oils.

### Standard Hand Separator Oil

perfectly lubricates finely adjusted and close fitting separator bearings because it is made for just that kind of work. It gives you the highest percentage of cream and the lowest percentage of repairs. There is nothing "just as good."
