

Don't Back Down

This picture, made from an actual photograph, shows the oiling of the Sharples Dairy Tubular Cream Separator. The gears and the single frictionless ball bearing supporting the bowl are all enclosed in a dust proof case. Once or twice a week, you lift the gear case lid and pour a spoonful or two of oil down among the gears. When running, the gears spray this oil over themselves and the bearings. The lubricating of Tubulars is perfect, easy, never neglected. You must go after other separators with an oil can every time they are used.

When you understand why Sharples Dairy Tubular Cream Separators are simplest and best, why even think of taking some other make just to please some fellow with some other machine to sell? What if he does want your money—want it so badly that he will even try to confuse you with talk and change your mind from right to wrong?

Don't back down. Stick to your decision to buy a Tubular. No talk can lessen the superiority of the Tubular over every other separator, or overcome the disadvantages found in every separator except the Tubular. By sticking to your decision now—by getting a Tubular and no other—you will save yourself constant regret, later on, that you did not follow your own good judgment.

Tubulars are Different

Tubulars are strictly modern separators, built on the latest scientific discoveries. These discoveries are patented and can not be used in any machine made by other manufacturers. You thus understand why all other manufacturers make separators that are old style, out of date and undesirable as compared to Tubulars.

The manufacture of Tubulars is one of Canada's leading industries. Tubulars have been on the market ten years, 1908 sales, throughout the Dominion, far exceeded 1907—were way ahead of any other make, if not all other makes combined.

Better hurrah with your neighbor, now, for the Tubular than envy your neighbor his Tubular later on. Write to-day for Catalog No. 193.

The Sharples Separator Co.

Toronto, Ont. Winnipeg, Man.

Sharples Dairy Tubulars have the lightest, simplest, cleanest skimming, most durable, easiest washed bowl in existence. It is only half as heavy as others. It is made in three simple pieces—the bowl itself, the bowl bottom closing the lower end of the bowl, and the tiny smooth dividing wall that goes inside. Other separators contain many parts—some as high as 40 or 50.

Why This MOWER Beats Any Other ON EARTH

WHETHER you think of buying a mower now or might buy one ten years from now, we want to tell you how good a mower we've got for you. The Dain Vertical Lift Mower is the smoothest working, lightest running, easiest pulling machine on the market. You can thoroughly understand it at once and see its vast advantages of build. The high drive wheels, for instance, insure lightest possible draft and enormously increased traction. The cutting apparatus, carried on the wheels, by means of an adjustable coil spring, uses every bit of power, reduces useless friction and lessens pull for the team.

The long chassis gives a smooth, strong, unshaking stroke. The gearing is all on the left wheel where it offsets the weight of the cutting-bar, altogether doing away with side draft. Many other desirable, exclusive features help make the

DAIN Vertical Lift MOWER

easiest to run, surest in results, most perfect in construction, most durable. Altogether most satisfactory and so simple a boy can handle it easily.

Built with utmost care, entirely of selected materials, withstands hardest wear and tear and sticks right to business all the time. The name "DAIN" on a mower or any other hay tool is your guarantee of highest excellence. It is backed up by the perfected result of a quarter century's successful experience. Ask your dealer about this Dain Vertical Lift Mower, or write us for interesting descriptive booklet.

MONTREAL.

No Water to Freeze. A MARVEL OF SIMPLICITY.

The "Goes Like Sixty" Engine is always ready for work. Splendidly adapted for operating all light farm machinery, such as pump, churn, separator, wood saw, feed cutter, grinder, etc. Positively guaranteed. Free trial. Ask for catalogue. All sizes. **Gilson Mfg. Co., Ltd., 650 York St., Guelph, 1428**

AIR-COOLED GILSON ENGINE

Soak it, Kelly!!

We mean soak the water into your milk. Of course, we mean thro' the cows—sure. Our

WOODWARD Water Basins

enable you to do this, causing greater flow of milk, and prevent your cows swilling, which is detrimental. Once installed, you need worry no more, for your stock will always be watered automatically. **SOON PAY FOR THEMSELVES.** Prevent disease contagion by water. **REMEMBER, THERE IS ONLY ONE "WOODWARD."** Others imitate them.
