

BARGAINS

The happy times have come at last and anticipation has passed into realization. To those who were married in June, July, August and September are settling down to the business of home-making it might be pointed out that in order to have everything running smoothly, and as it should be, it is necessary that the "Timepieces" should be in perfect order. If yours is not, we shall be pleased to put them in order, or we will sell you a new one, up-to-date, and oneepest in the city.

CLARIFIED AND BOTTLED MILK

To clarify and bottle milk is the only sanitary and up-to-date way to handle such an important product of the dairy as milk for while it is one of the best and most necessary foods we use if properly cared for, it is certainly one of the most dangerous if neglected or carelessly handled, and should never be exposed to street dust, as is done in the ordinary way of peddling milk from large cans with open measures. The Steam Turbine Machine used to clarify all the milk sold from the

Maple City Creamery

will certainly take all the impurities out of the milk, thereby removing the danger of many cases of sickness, especially among children, that can be traced directly to the milk supply. Don't take such chances. This hot dry weather when you can get

FOR WINTER EVENINGS.

Identification a Good Game for Fiction Readers.
A good game for a company of fiction readers is called Identification. It is easily arranged and never fails to "take" with intelligent people.

When the amusement is about to begin the hostess distributes among her guests large cards or strips of cardboard on which are the names of fifty characters, male and female, extracted from standard or popular novels. Who most is identified.

This is done by writing opposite the name of the character the title of the novel in which it figures. Each player may have a separate list, or one list may be given to each pair of partners who work together to complete it.

When preparing a set of characters avoid selecting those which fill title roles or who are too familiar to the reader.

A good beginning for such a list would be:
Babbie ("The Little Minister").
Dinah Morris ("Adam Bede").
Nydia ("The Last Days of Pompeii").
Kate Hardcastle ("She Stoops to Conquer").
Adam Moss ("A Kentucky Cardinal").
Little Eve ("Uncle Tom's Cabin").
Blanche Amory ("Pendennis").
Rosemund Lydgate ("Middlemarch").
Sir Lucius O'Trigger ("The Rivals").
Josephine March ("Little Women").
Sancho Panza ("Don Quixotte").
Edward Fairfax Rochester ("Jane Eyre").
Miss Euphemia Dundas ("Theodorus of Warsaw").
Noddy Boffin ("Our Mutual Friend").
Mrs. Malaprop ("The Rivals").
Lady Teazle ("The School for Scandal").
Quilp ("Old Curiosity Shop").
Eugene Marchbanks ("Candida").
Lucy Dashwood ("Charles O'Malley").
Phineas Fletcher ("John Halifax").
A popular or standard novel would make a good choice in prizes, to be awarded for the longest list of correct answers.

BEDS AND BEDMAKING.

Many False Notions on This Important Subject Explored.
Many people used to have an impression that to sleep on a soft bed had a spice of wickedness in it and that the harder the mattress the greater the virtue of the sleeper.

This arose in great part from the fact that feather beds were generally condemned as unhealthy, and the ignorant at once seized the idea that they were unhealthy because soft, whereas they are unhealthy because they do not permit of proper ventilation.

More and more we learn that the foundation of health lies in an abundant supply of fresh air and that the root of many a disease is in the want of it. In health many of us spend a third of our time actually in bed, and in sickness much more, so it is of the greatest importance that the bed and everything connected with it should be thoroughly ventilated.

It goes without saying that the bedroom must itself be airy and the fresh air have free access to it.

From the point of view of health it is a matter of indifference whether the bedstead be of wood or of iron, but the most comfortable and at the same time healthy are those fitted with chain spring mattresses. These mattresses may be bought separately and fitted to any bedstead.

Montreal Live Stock.

MONTREAL, Oct. 21.—At the Montreal Stock Yards (west end market), the receipts of live stock for the week ending Oct. 21 were 333 sheep, 483 calves, 462 hogs and 73 calves. Supplies this morning for local consumption consisted of 1292 cattle, 250 sheep and 1000 hogs and 400 calves. Owing to the colder weather and the fact that the offer of cattle was small, the demand from local butchers and jobbers was good and an active trade was done and several calves were sold at prices higher, and the prospects are that still higher figures will rule later on. There were several calves, one or two head smaller than a week ago, a firmer feeling developed in the market and prices for some grades were 50c to 75c higher, and the prospects are that still higher figures will rule later on. Three Quebec calves, 275 to 350 lbs. each, were sold, one at \$5, one at \$4.50 and one at \$4.25. Receipts, 1000 head; active and steady, 25 to 27.5c.

BUILDINGS DEMOLISHED

Earthquake In Central Asia Causes Great Damage

LONDON, Oct. 22.—Prolonged earthquake shocks beginning at 5 o'clock yesterday morning and lasting for several hours have been recorded on the instruments on the Isle of Wight, and the disturbance is estimated to cover over 3,000 miles. Telegrams received here from St. Petersburg report earth shocks in Central Asia, at Lattajurgan, Samarakand, Khokand, and elsewhere, which caused the injury or collapse of many buildings. At Samarakand the shocks lasted intermittently from early morning until yesterday afternoon. Two women were killed by falling houses, and the population of Samarakand is now camping out.

TO UPSET THE FINE.

Standard Oil Co. Counsel Preparing to Appeal.
Chicago, Oct. 22.—Plans for the tremendous effort that will be made by attorneys for the Standard Oil Co. to have the \$29,240,000 fine imposed by Judge Landis wiped out by the United States Circuit Court of Appeals were discussed yesterday.

The principal argument is that the Government attorneys failed to inform the defence of the Alton immunity agreement. 2. That the Elkins Act, under which the conviction was cured, was unconstitutional. 3. That as the Elkins Act was passed before indictments were returned, prosecution under the provisions of the Elkins law was illegal. 4. That Judge Landis did not compute the number of violations correctly. 5. That the Standard Oil Co. accepted the rates in question with the understanding that they were authorized rates.

CHINESE LABORERS RIOT.

Stoned Police, Who Opened Fire on the Crowd—Man Killed.
Johannesburg, Oct. 22.—The Chinese laborers at New Modderfontein mutinied Sunday night, and had to be dispersed by the police. The Chinese barricaded their compound and destroyed the offices. When the police first appeared on the scene, they were vigorously stoned.

They were finally obliged to open fire on the mutineers, with shotguns, but they fired low and only one Chinese was killed. Nineteen were wounded and many were arrested. The trouble is alleged to have arisen because labor agitators have been assuring the Chinese that they were not obliged to work Sundays.

Governor Brady Penitents.

Seattle, Oct. 22.—John Green Brady, three times governor of Alaska, whose faith in H. D. Reynolds led him to invest the savings of a lifetime in Reynolds' Alaskan schemes, will go back penitential to his old home at Sika.

Instead of realizing a competence, everything I have is gone," he said yesterday. "I have been earnest in my efforts to build the Alaska-Nome Railway, and I believed what I told my friends would succeed that I continued to put my money into it until the last."

Suit Against Pharmacy Company.

Ottawa, Oct. 22.—The Pharmaceutical Association of the Province of Quebec have instituted proceedings against the Modern Pharmacy Co. of Hull for \$10,500.

They claim that as the company have been selling drugs without the authorization of the association, these sales are illegal, and allege that the company have been employing unlicensed clerks, as well as making sales of certain drugs without keeping records.

Keir Hardie's Fallacy.

LONDON, Oct. 22.—Mr. Morley, in the course of a firm speech on Indian affairs at Arbroath, said that Keir Hardie's recent statement at Calcutta, "If self-government is good for Canada it will be good for India," was the grossest fallacy in all past ages, and he would never lend his name to that doctrine.

Hold Up Stage.

Salt Lake City, Utah, Oct. 22.—The Murray stage, used for the conveyance of passengers on the line between Bingham Junction and Sandy was held up by masked robbers at Leo Oldah.

The bandit took a place alongside the driver, sitting on secreted money, and rode with the party to the end of the stage line, where he escaped.

Lustania Speeding Eastward.

New York, Oct. 22.—The Canada liner Lustania, which passed Sandy Hook Lightship at 5:45 p. m. Saturday, was 975 miles from Sandy Hook at 10 a. m. yesterday, according to a wireless message received by the line by way of Cape Race. At that time the steamer was making 24.58 knots per hour in a southeast wind and rough sea.

Fatal Football.

Chicago, Oct. 22.—W. G. Albrecht, 20 years old, died Sunday night of injuries sustained in a football game Saturday.

A wise man doesn't wait for opportunity to come along; he goes after it.

LIGHTING UP NIAGARA

FAVORABLE FALLS ABLAZE WITH COUNTLESS HUES BY NIGHT

Magnificent Spectacle—Electric Plant Illumines Scene Hitherto Shrouded After Sunset—Huge Searchlights of Many Colors Enhance Beauty of Nature's Great Show—Thousands View It.

All the folks of Niagara Falls crossed the river into Canada on a recent evening to see their great water falls illuminated by 1,115,000 candle power. The figures sound big, but they are accurate and in keeping with all the other statistics concerning Niagara, says a Niagara Falls correspondent of The New York Post.

The procession over the border was led, at least figuratively, by Anthony C. Douglas, mayor of the city of Niagara Falls. He brought about the illumination as an experiment. If his people approve the New York town will buy the plant for \$100,000 and will maintain it as a municipal enterprise at a cost of about \$3,000 a year. To be perfectly frank, it is to be a great spectacular advertisement for Niagara Falls and the nearby places on the Canadian side.

W. D.A. Ryan, the illuminating engineer of the General Electric Co., is the man who has done this thing. He evidently anticipated objection and explained that he had never lost sight of Niagara as it is and hadn't for one moment thought he could improve upon it. He simply sought to continue nature's great show after dark. He promises, and so does Mayor Douglas, that no brand of whisky or patent medicine shall ever be flashed upon the cascade of water, and that no colored lights upon the clouds of mist. So, after all, the illumination does not cheapen America's great Niagara. It merely cheats the night by turning it into day all up and down the gorge. It gives wonderful tints to the falls themselves and to the vapor above them. The sensational feature of the night light is that it is concentrated on the foaming waters of the American and Canadian falls, making them stand out dazzlingly distinct against the blackness of the grim rock cliffs between and on the either side.

MISERLINESS.

Starving and Saving For Others to Spend When Yours Dead.
"I'm not opposed to a man saving money," remarked the undertaker, lighting a fresh cigar, "but I can't help feeling that it is wrong for one to die by meanness and by denying oneself comforts. It is because I see so much of this that I feel this way."

"Whatever is the reason I must say that in my observation the usual result is that when one has saved up money by this self-denial the ones who receive the money after death usually waste it.

"To illustrate this let me tell you of a specific case. A few years ago an elderly woman died in our city. I was called to care for the remains. I assure you that the room into which I went was one of the barest and most desolate places I ever saw. There was none of those little things which go to make a room comfortable and cheerful. I couldn't help thinking that the poor woman's life had been a dreary one. In a way I still think so."

"She was a maiden lady about seventy. In the town was one woman who had been her friend. She sent word to me to bring the remains there. No one supposed the deceased had a cent in the world. When we were about to remove the body the people of the house called my attention to a small box which they said contained all the effects of the dead woman.

"When we opened that box we found that it contained \$5,000, the old lady's savings of a lifetime. I assure you that she had gone without comforts and necessities; had denied herself every little luxury. What for? Answer it if you can, I can't."

"A relative, the nearest one and the only heir, came from a middle Atlantic state and took the remains home with her for burial. She also took the money. On the day of the funeral she had several packs at a cost of \$15 each, then she made the driver of each pack a present of \$5, gave the driver of the hearse the same sum and each of the two men who dug the grave \$5 and spent \$2,500 for a monument. The rest of the \$5,000 she blew. At the end of six months every dollar of it was gone.

"And that old lady had gone without necessities of life to accumulate it. And, my friend, that is but one of several cases—yes, of scores of them—that I could recite to you did I have the mind."—Lewiston Journal.

Following instructions.
"Here, my poor man," said a kind old lady, "here is a shilling for you. Now don't go and spend it in vile drink."

"Thank you, ma'am," answered the tramp heartily, "I'll not. I suppose you was a-refferring to the wretched stuff they 'as at the Dun Cow, mum? Ah, but I'll go to the Black Bull. They keep the right sort there!"—London Spectator.

If you cannot realize your ideal, idealize your real.

"Peerless" Oven Damper Gives Absolute Control.
Most oven dampers have only two positions. They are either wide open or tight shut.

The "Peerless" dampers are adjustable. If the oven is too hot, you can open the damper and keep on adjusting until you get the proper temperature.

This means economy in fuel consumption. With the ordinary oven damper to keep the oven from getting too hot, the heat must be all thrown up the chimney. Then the drafts have to be turned on again, because the temperature drops too rapidly.

Ask your dealer to show you this special damper. Also the "Peerless" Drop Oven Door, Daylight Oven, and Duplex Grates. These points of advantage over other stoves, are exclusive. Write for catalogue.
