

# SUNSHINE FURNACE

NO BENDING DOUBLE AND POKING AROUND THE ASH-PIT WITH A SHOVEL TO GET THE ASHES OUT OF THE SUNSHINE.

The Sunshine is furnished with a good, big ash-pan. All you have to do is to grasp two strong, firmly attached, always-cool, bale handles and the large, roomy ash-pan easily comes out.

A minute or two is all it takes to perform the operation. All the ashes are in the pan, too.

Because they are guided into it by means of ash-chutes attached immediately below the fire-pot.

Sunshine is the simplest, easiest-managed, cleanest kind of a furnace. You don't have to wear overalls and a smock when attending to the Sunshine.

If your local dealer does not handle the "Sunshine" write direct to us for FREE BOOKLET.

### IF WATER NEVER FROZE.

There Would Be Several Startling Changes in the World.

The whole economy of nature would undergo a startling change if water never froze. The world's climates would be revolutionized. The icebound polar seas would cease to exercise their chilling influences, and consequently the currents of the ocean might either cease or be turned aside in different directions.

Thus the Gulf stream would seek other shores than those of Britain, and the climate there might be subject to the extremes of heat and cold noticed in other countries of the same latitude. The icebound rivers of the north, notably those of Russia and Siberia, would be open for navigation, and Russia's activity as a sea power and a commercial nation might alter the whole world of commerce.

Canada would become another country altogether. An immense tract of land would be available for cultivating hardy plants, and Greenland might be what its name indicates. The absence of icebergs off the coast of Newfoundland and Iceland would result in a much warmer climate in those islands, where now the crops often fail. Ice, too, plays an important part in the economy of nature. Thus, if water never froze, snow, hail and hoarfrost would cease. The loosening of soils and the disintegration of rocks by the frost and many other now vital effects would be lost—in short, the absence of ice would be on the one hand an incalculable disaster, on the other hand a great boon.—London Globe.

Straight character cannot come out of crooked living.

## The Cough of Consumption

Your doctor will tell you that fresh air and good food are the real cures for consumption. But often the cough is very hard. Hence, we suggest that you ask your doctor about Ayer's Cherry Pectoral. We publish the formulae of all our preparations. Lowell, Mass.

## These 800 Acres Were The First Claims Staked In The Rich Larder Lake Field

Last summer, before any staking had been done in the Larder Lake region, our experts located TWENTY gold-bearing claims, amounting to eight hundred acres, two miles north of Wilson's Bay of Larder Lake. (You can have a map of the property for the asking.) On some of the claims there are wide reefs that assay from \$7.50 to \$18 a ton. We have assay on file that show as much as \$1,800 a ton. There is no richer property in the country—and Larder Lake is as RICH AS THE FAMOUS RAND OF South Africa. All our holdings are in ONE BLOCK, which means economy in working the claims. The ore on these properties is FREE-MILLING.—We have our own water-power on the property. We have an abundance of wood and water—every item that counts in the economical operation of gold mines. Our expenses will be far lower, and our assays are higher than those of mines which have paid seventy million in dividends—and our ore will grade far better. We have nothing to hide, nothing to lie about. We ask you to learn the simple facts, and we are ready to put them before you and to prove to you that

## Empire Larder Lake Gold Mining Company, Limited

is a solid and worthy investment at Twenty-five Cents a Share, Five Dollars One Dollar. Authorized Capital, One Million Dollars, in shares of One Dollar Par Value each. No personal liability. ### FACTS ABOUT BUTTER.

How This Delicious Substance is Produced From Milk.

Butter is a delightful, almost indispensable, substance, without which bread and some other things would lose their attractiveness. For most of us, but not one person in a hundred can tell exactly what it is and how it is produced from milk.

Here is the whole thing briefly told: Butter is the fatty part of milk. It consists of minute globules covered with albumen. When the milk is allowed to stand for about twenty-four hours, these globules rise to the top, and form what we call cream.

Once upon a time, we don't know exactly at what epoch, a camel was carrying milk in bottles made of skin. When the caravan or procession or whatever it was halted for a rest and a lunch, it was found that the milk had turned partly to butter, though that is not the name they gave to the mass. The man or men that made this discovery were able even in that early age of the world to put two and two together and make four.

The plain English of this is that the discoverers of this new substance or commodity concluded that it was formed by the jolting given to the milk by the camel's gait, and that is the origin of our modern churning process.

To make butter, therefore, we take the cream that forms on the top of the milk, put it into a churn and shake and agitate it until the albumen that covers the globules of fat is broken. When the albumen breaks, the fatty globules come together as one mass, and that is butter!—Chicago News.

### The Blind Man's Wand.

This is another way of playing blind man's bluff and is thought by many to be an improvement on that game.

The player who is blindfolded stands in the center of the room with a long paper wand, which can be made of a newspaper folded up lengthways and tied at each end with string. The other players then join hands and stand around him in a circle.

Some one then plays a merry tune on the piano, and the players dance round and round the blind man, until suddenly the music stops. The blind man then takes the opportunity of lowering his wand upon one of the circle, and the player upon whom it has fallen has to take hold of it.

The blind man then makes a noise, such as, for instance, the barking of a dog, a street cry, or anything he thinks will cause the player he has caught to betray himself, as the captive must imitate whatever noise the blind man likes to make.

Should the blind man detect who holds the stick, the one who is caught has to be blind man. If not, the game goes on until he succeeds.

### Riddles.

Why is a bee like a spectator? Because it is a beeholder (beholder). Why are blind persons compassionate? Because they feel for other persons.

When does a lady think her husband a Hercules? When fond of his club. Why are young ladies bad grammarians? Because so few can decline matrimony.

Which are the two most disagreeable letters if you get too much of them? K. N. (cayenne).

### Why Flowers Are Colored.

The beautiful colorings and perfumes of the various flowers have more object than prettiness, as the existence of the plant itself depends upon them. The colors and perfumes attract the various insects best fitted to bring about the cross fertilization of the plant.

### The Birthday Cake.

What does it take to make the birthday cake? "Sugar and spice and everything nice" And snow white frosting as smooth as ice And little pink candles all round the edge! Oh, who wouldn't like a generous wedge Of the wonderful birthday cake?

How many candles all eight Must stand on the cake to make it right. To make it a regular birthday cake? Two of pink and two of blue And one little shining white one, too. Right on the beautiful tip tip tip Of the wonderful birthday cake!

When does it take to eat this cake? Father and mother and Grandma Gray And Bobbie and Rosie and Eleanor May And the dear little girl next door, And a piece for teacher in basket small And a piece for Noreen—I think that's all Who eat the birthday cake?

There's a little gold ring inside the cake, And, strange to say, it is Eleanor May Who wins the piece with its golden prize. For Eleanor May is five today. And the birthday cake with its little surprise Was made and trimmed by Grandmother Gray—The beautiful birthday cake!

Very small and as easy to take as sugar. FOR HEADACHE. FOR DIZZINESS. FOR BILIOUSNESS. FOR TORPID LIVER. FOR CONSTIPATION. FOR SALLOW SKIN. FOR THE COMPLEXION. CURE SICK HEADACHE.

### Don't Be An Awful Shock.

The deputy stage manager at the Theatre Royal, Dublin, at one time was a little man named Linders, who had a strange dislike of the ladies of the ballet and treated them rather harshly. He wore a wig, but the fact was not generally known. On one occasion, however, an enraged coryphe seized him by the hair, and off came the wig, exposing a shiny expanse of cranium. He at once dashed off to complain to Mrs. Harris, the manager's wife, but the good lady could only gasp in stupefied tones, "Good gracious, Mr. Linders, why, you are bald!" To which Linders instantly replied: "No, madam, no. My hair became loose with horror!"

### What Do They Cure?

The above question is often asked concerning Dr. Pierce's two leading medicines, "Golden Medical Discovery" and "Favorite Prescription." The answer is that "Golden Medical Discovery" is a most potent alterative or blood-purifier, and tonic or invigorator, and acts especially favorably in a curative way upon all the mucous lining surfaces, as of the nasal passages, throat, bronchial tubes, stomach, bowels and bladder, curing a large per cent. of catarrhal cases whether the disease affects the nasal passages, the throat, larynx, bronchial tubes, stomach (as catarrhal dyspepsia), bowels (as mucous colitis), or the uterus or other pelvic organs. Even in the chronic or ulcerative stages of these ailments it is often successful in effecting a cure.

"The Favorite Prescription" is advised for the treatment of all diseases—those of the female system, such as catarrh of the uterus, leucorrhoea, etc.—it is a powerful yet gently acting invigorating tonic and nerve. For weak worn-out, over-worked women—no matter what has caused the trouble—this Favorite Prescription "will be found most effective in building up the strength, regulating the womanly functions, relieving pain and inducing a healthy, vigorous condition of the whole system."

A book of particulars wraps each bottle giving the formulae of both medicines and extracts of the roots of native American medicinal forest plants. They are both sold by dealers in medicine. You can't afford to accept as a substitute for one of these medicines of known composition, any secret nostrum.

Dr. Pierce's Peppermint, small, sugar-coated, easy to take as candy, regulate and invigorate stomach, liver and bowels.

### The Utilitarian Age.

The more picturesque the country the more inevitable it appears to be that its beauty must be menaced and in most instances eventually much impaired by the erection of a hideous line of telephone posts, with their relentless reminder that we live in an age in which the beautiful has constantly to be sacrificed to the useful.

## Cured her Father's Drunkenness by a Simple Remedy.

Saves her father from a drunkard's grave. Free sample of Samaria Tonic Prescription checks his drinking and leads to a complete cure.

"It seemed hopeless to keep father from drinking, and we all felt the disgrace. When things were at their worst a friend advised me to try Samaria. I saw that you offered a free sample treatment and that the remedy was tasteless and could be given secretly. I determined to try it, and have been glad every day since. The full treatment, which I gave him in his tea, cured him, and I am pleased to say he never touches whiskey now. How glad I am that I have saved him from a drunkard's grave! I think that's all I have to say for Samaria."

Free Package and pamphlet giving full and price sent in plain sealed envelope. Correspondence secretly confidential. Address: F. R. SAMARIA, REMEDY CO., 17 Jordan Chambers, Jordan St., Toronto, Canada.

## WORLD-FULL OF ROGUES

BERNARD SHAW'S SEVERE CRITICISM OF THE IDLE RICH.

His Sermon on Socialism—Paralysis From Lead-Poisoning—"We Are All Rascals"—"Drink Evil Among Poor"—Any Atrocity to Gain Money—Chicago Meat Horrors—Poverty Breeds Crime.

Mr. George Bernard Shaw preached a sermon on socialism recently in Caxton Hall to an audience composed of many of the elite of the west end. His text was, "Poisoning the proletariat," and the address was delivered under the auspices of the Christian Social Union, London branch, who are engaged in a crusade against the lead-glass industry. Mr. Shaw wanted to know if his audience really cared whether the plate off which he ate dinner had or had not given the poor wretch who made it paralysis from lead poisoning. If they did care they were getting on.

"The great majority of industrial people are rascals," he went on. "We are all more or less rascals—(laughter)—even you good people who have what you facetiously call 'independent means.' A great deal of the profit which you enjoy is made in a rascally way, those profits which I see in so many beautiful hats and costumes before me to-day."

### Severe Bob For Beezer.

Mr. Shaw said he had heard of a family in London living on 21s. a week, and wondered how they did it. He later found they lived on 14s. a week, for the father required 7s. a week for drink. "I would like some of the richer members of this audience," said Mr. Shaw, "to say how much a week they spend on drink. The wine for the family would probably come to more than 7s. a week."

If a family spent a guinea a week on liquors, then on the basis of the treatment that the misery of the poor was wholly due to drink, a family five times poorer than that family should spend five guineas a week. The fact was that the very people who talked most about the drink evil among the poor, and who attributed their impoverished condition to that cause alone, spent out all proportion more on drink than any laboring man.

### Commit Any Atrocity.

Vice and virtue, he said, tended to get distributed very much according to the view point of the person—the rich thought vice the peculiar attribute of poverty and virtue of the well-to-do.

"Provided you don't ask us to be poor, we'll exercise every known or possible virtue, we'll be perfectly charming people, but we must have money—to get it we'll commit any atrocity—(laughter)—we'll turn helpless people out of their homes in the dead of winter, tear the sick from their beds and evict them in the roadside snow, but we must have money or we can't be virtuous."

"Then, again," went on Mr. Shaw, "there are other ways of getting this kind of money—by making human beings work at deadly trades in the dead of winter, tear the sick from their beds and evict them in the roadside snow, but we must have money or we can't be virtuous."

We were throwing away about 800 millions a year on extravagances of every sort, much of it, that was so badly wanted at home, being spent abroad. There must be a better distribution of wealth, for it was the poverty of men who made them helpless and led to sweating, misery and crime.

Turning to a consideration of "the life of pleasure" lived by idle rich, Mr. Shaw said that he was now in a position to live that life; he possessed all the material concomitants, but he would infinitely rather sweep a crossing. (Laughter.) He thanked heaven he had strength of mind enough, sanity enough, to despise that life which riches could enable him to live, and he pitied, not envied, those who lived the life of luxury and so-called pleasure.

Referring to the Chicago meat horrors, Mr. Shaw said it was most curious to observe that not one note of concern was uttered or printed about the poor wretches who tinned the meat; it was all for the consumer, and about the beef itself.

"Your own interests will yet force you to do what my words will never persuade you to do," was Mr. Shaw's parting shot.

### Chinamen In Australia.

A traveler in northern Queensland, Mr. Hanford, a Melbourne lawyer, brings a story of a hitherto unknown colony of Chinamen in the country near the Gulf of Carpentaria. The news, which has been confirmed, came as a shock to the advocates of a "White Australia."

The Chinamen, who are said to number thousands, are, it appears, camping on arable river flats, and are growing vast quantities of opium, which is now a prohibited article in the Commonwealth, except for medicinal purposes. Presumably a market for the drug is found among the rich Chinese storekeepers of the north.

The interlopers have made their way to Australia by way of the East Indian Islands, and the Commonwealth Government is now being called upon to turn them out.

### Another Kipling Yarn.

Among the amusing stories told about Kipling is one of a young woman admirer who after years of waiting at last met the man of the "Plain Tales."

"You," she cried, staring at the author. "You, you are Rudyard Kipling!"

Naturally Kipling felt embarrassed. "Yes," he murmured modestly.

The lady continued to marvel. "But I thought you were—oh, how shall I say it?—something quite, quite different!"

"Oh, I am," Kipling hastened to tell her in a very confidential tone. "I am, madam. Only, you see, this is my day off."—Book News.

If you were a grocer—and you had recommended St. George's to your customers—and they had tried it—and had come back to tell you that it was BETTER than you said it was—

—now, wouldn't you smile?"

"That's the way I feel about

## St. George's Baking Powder

"Use St. George's—and smile on baking days."

"If you write The National Drug & Chemical Co. of Canada Limited, Montreal—they will send you, FREE, a handsome cook book, brimful of excellent recipes."

### The Great Dipper.

The seven stars in the constellation known as the "great dipper" are, say the scientists, seven magnificent suns probably very much larger than our own and glowing with intense lustre. Their massive globes whirl through space with inconceivable velocity. Five of the stars are receding from us at the rate of seventeen miles a second, and the other two are travelling in an opposite direction. Thirty-six thousand years from now the seven stars of the "dipper" will have dissolved partnership, and its appearance will have entirely changed.

Fattening Lambs. Cornmeal is an excellent feed for the young lambs that are to be fattened quickly. After this comes bran. Linseed meal may be fed in small quantities.

## It's The Tone That Proves the Quality Of A Piano . . . .

In outward appearance one make of piano may resemble another very closely. The real difference lies in the tone, which is concealed within the case.

It's the tone every time that proves the quality of a piano. Run your fingers over the keyboard of a "Nordheimer" and just listen to the superb tone. No doubt about the quality of the "Nordheimer" piano with such a tone as it possesses.

Those who know the real value of tone-quality naturally select the "Nordheimer"—the unrivalled Canadian piano. Will you not come in and play over a selection and judge the quality of the "Nordheimer" tone from what your own ear tells you?

Our Mr. R. V. Carter will visit Chatham frequently in our interests, and will be pleased to furnish you with any information you may desire. Correspondence addressed to him, in care of the Garner House, will receive careful attention.

"NORDHEIMER" Limited, London.
