Edmonton's New Y. M. C. A. Building

(Which will be Opened Jan. 1st, 1908 and Which Cost \$90,000.)

The Edmonton Y. M. C. A. is a link in a chain of 8,000, which circle the globe, and a ticket issued here is accepted for its face value anywhere. During the last twelve months there has been an average of one new building opened every week in America. The inception of the parent association was unostentatious. Its origin was humble. At first it confined its efforts to the clerks of old London, and contented itself for a decade with religious rooms only. Then the coffee and reading rooms features were introduced, and from this modest beginning the wonderful organization, whose influence is world-wide, was evolved.

Montreal had the first association in America, followed by one a week later in Boston. About this time the need was felt for a broader and more comprehensive work to meet the demands of the American continent, and Robert McBurney, then secretary of the New York Central Y. M. C. A., introduced the gymnasium, which today is by no means the least important feature of the association. This was considered an anomalous feature for a number of years, owing to the association's inability to secure men of moral fibre to act as physical directors.

The physical work was first given a good start at San Francisco, and carried on successfully for a number of years, but it was abandoned on account of the death of the physical director, Dr. R. J. Roberts, one of the best physical directors ever known, then took hold of the Boston association's gymnasium, and trained many strong and able men to take charge of the various associations where the demand for physical work was most pronounced.

About this time the educational work of the association began its development, and classes were offered offering a supplemental education in the common branches of English. Following the demand for trained secretaries, who could handle the business end of the association, led to the establishment of a special training school at Springfield, N. Y. This school has grown from five men to a university with 300 men enrolled in the study of association methods, and possibly has been the great factor in the development of the special or departmental ideas of the association.

The average student who enters the association's work is first grounded on the common branches of the art, and is then asked to make his choice of the various departments with the view to becoming physical director, educational director, work director, religious director, or secretary. The men sent to smaller fields are in charge of the work, whereas a man who wishes to devote his energies in the city is given a special training in the department of his choice.

NEWS OF MERRY OLD ENGLAND

Record of Occurrences in the Land That Reigns Supreme in the Commercial World.

Upon the summit of Snowdon a baby has just been born—the first to arrive on the top of the Welsh mountain.

Flying at a great height, a flock of wild geese, directed by a pilot, passed over Cleisford Park recently.

For the return of a lost Bank of England £2 note, called "Edna May," a Strand firm of outfitters are offering a reward.

Great inconvenience is being experienced in consequence of so many thoroughfares in London now undergoing renovation.

Mr. Edward Charles Burton, a well-known sportsman, who rowed the "Oxford" in 1846-7-8-9, has died at Davenport, Northampton.

Elizabeth Gorton, six year old, fell from an electric tram on Folslow pier into the sea, and was drowned on Thursday night.

Miss Lizzie Bell, nee Weaver, of Heywood, had from a snake bite, in a shuttle which fell out of her loom and struck her on the forehead.

Four horses were burned to death and sixteen vehicles destroyed at a fire which occurred in a job master's premises at Alexandria, Scotland.

A debt of over 50s. per head of the population in the jurisdiction of the Middlesex County Council is shown by the annual report of the county finance committee.

When a boy was fined 1s. 6d. at West Hartlepool for sliding down the sea-wall one of the magistrates left the bench as a protest against the severity of the penalty.

The executive of the Swansea Harbour Trusts decided to make extensions to the King's dock now being built, at an additional cost of about £110,000.

Of the 618 samples of food and drugs analyzed in the past quarter by the Lambeth Borough Council, as many as 18.21 per cent. were found to be unsatisfactory.

At a meeting of the Nottingham Guardians it was reported that 300 persons who did lace work at home, only earned an average of 2s. 2½d. per week.

Under the will of a lady, lately deceased, who desired to remain anonymous, a sum of \$10,000 has been be-

Edmonton's New Building. The building in Edmonton has been planned along the lines of sister associations throughout the world, and is the result of a comparison of the plans of the most modern associations. The architectural effect has been sacrificed to utility and comfort. It is situated at the head of Howard street, and is a solid brick building. It is of four stories and basement, with dimensions of 50 by 100 feet.

The basement will contain bowling alleys, wrestling rooms and locker rooms for boys, young men, and business men, each set of lockers being kept by itself. The lockers will be of expanded metal, and fitted with combination locks. The basement will also have eight shower-baths, easily accessible to the plunge bath. The plunge will be a brick wall pool, 15 by 32 feet. Next to the plunge bath will be located a laundry and heating apparatus. The boiler will be a steam tubular apparatus fitted with auxiliary boiler and hot water tank, which will supply hot water for the hand basins, and the circular system for the plunge bath.

On the First Floor. The first floor will contain a large vestibule entrance, a rotunda, with pillars, finished substantially in solid oak and leather. The offices will be situated at the right side of the rotunda, and have full command of the floor and staircases. To the left and rear of the rotunda a cloak room, large enough to accommodate the members of the association, will be placed. At the front and right a large airy reading room has been provided. This will be furnished similar to the rotunda, and to be supplied with writing material and magazines.

To the left of the entrance will be the members' parlor. This room will be furnished in early English style, and has been designed to be of use as the most comfortable room in the building. Occupying the whole rear of the second floor will be the gymnasium, 45 by 50 feet, with a gallery ten feet clear of the floor. The gymnasium is to be fitted with the most modern apparatus, and will embrace the most up-to-date body-building ideas. It is expected that some twenty-two classes per week will keep this room almost continuously occupied.

On the Second Floor. From the main staircase-landing on the second floor you enter the ladies' parlor, which is directly in front. This room will be furnished in a dainty way suitable to the prospective occupants. Here it will be possible to procure tea, hot tea, coffee, and light lunches. The association does not propose opening a cafe or restaurant, but intends to try, simply to meet the de-

mands of the various charitable institutions. St. George's (Hanover Square) Guardians estimate that 1,140 pounds of tobacco and 85 pounds of snuff will be used by the paupers during the ensuing six months.

It was officially announced that as a result of the recent inquiry in connection with the Belfast police strike, five more constables have been dismissed.

"Remarkable dog," exclaimed the Greenwich magistrate yesterday when a lady summoned for allowing a dog out without a collar and the animal had eaten its collar.

South Wales coal being now 25s per ton at Italian ports, the Italian Navigazione Company have purchased 300,000 tons of American which will be delivered at 21s.

First-class passengers are rapidly disappearing from the Metropolitan District Railway, 360,741 fewer having been carried in the past six months than in the corresponding period of last year.

It was stated at a meeting of the Southport Town Council that there were parents who habitually lost their children in order to get the police to act as nannies while they themselves had a good time.

The Earl of Plymouth has consented to become the chairman of the decorating and painting section of the Franco-British Exhibition, which is to be held at Shepherd's Bush next year.

It was reported at a meeting of the East Suffolk County Council that two parishes had not elected a council, the consequence of non-response to the notice, and in the second only two electors appeared.

While playing cricket at Golgate, near Lancaster, Leonard Waddington, aged nine years, was killed instantly by a cricket ball, which was hit by his brother, and struck him on the temple.

Finding a large jar of raw whisky in military baggage which they were removing from Carnarvon railway station, some men began to drink it neat, with the result that it became helpless and one of them died.

A horse belonging to Captain Thirry bolted during a jumping competition at Thirry, knocking down thirty persons and severely injuring an old man named Thomas Dwyer.

A man whose name has not yet been ascertained died at St. Anthony's Hospital, Chelsea, from injuries caused by a collision between a van and a motor-car in London road, Chelsea.

Joseph Best, fifteen years old, of Coleman street, Chatham, was bound eyes at Dartford for shooting at four boys named Thomas, William, Michael, Palmer, Robert Sandie and Thomas Payne, at Ash, on August 11th last.

On the eve of his golden wedding, the celebration of which was arranged to take place the next day when a presentation of silver plate,

but also a sense of personal loss as well as a sense of duty. The confidence in engineers and engineering constructors and in the safety and reliability of their works in an asset of the whole engineering profession. To assure this public confidence receive such a blow as this at Quebec is a loss almost beyond estimation. For decades to come, the Quebec disaster will be quoted, in public and in private, as an unanswerable proof of the unreliability of engineers and their works—even the best engineers.

"For it cannot be said in this case that the disaster was due to the work of incompetent men or careless engineers. Often it has happened, where an engineering work has failed, that the failure has been traced to the blunders of some quack wearing the professional garb. But at Quebec the work was in charge of men of long experience and the highest professional standing; so much the more, therefore, must the profession bear the responsibility.

"There is another fact which makes this disaster a particularly heavy blow to the engineering profession. Of all bridge structures in the country which were expected to be built with absolute safety and certainly, we take it the Quebec bridge is foremost. We know of no engineering structure anywhere whose failure would have been a greater surprise to the profession than this collapse at Quebec.

"Of course, as our readers know, the structure surpassed in magnitude any bridge ever erected; but the problems involved in its design were, after all, simple, and that is more important, they were accurately determined.

"The work of erection, where ordinarily many chances enter, was in this case subjected to the most minute and exacting supervision and calculation as that required in the design itself. The work of erection, which in an ordinary erection work were eliminated, such manipulation of every piece had therefore been prescribed in detail. The magnitude of weights to be handled completed this. And the general course of the work was followed.

At the time the structure was fully as safe as the finished bridge. Altogether the work of erection was carried out with the most scientific accuracy and more safely than in any other bridge structure ever erected.

Mrs. Hazlett was charged with violating the city ordinances which prohibit persons from obstructing the sidewalks and streets, although many Socialists who were present asserted that she produced a permit authorizing her to lecture on the streets.

SEAMANSHIP WAS DEAD.

St. Petersburg, Sept. 13.—Russian newspapers offer strong criticisms of the seamanship displayed when the Russian yacht Standard, off Horsa, Finland, on September 11, and over which there was a decided effort to maintain secrecy, the Slovo says that it is disappointing further dishonor on the men who were responsible for the Russian defeat in the sea of Japan.

MOB DEMANDED HER RELEASE

Spokane, Sept. 13.—One of the wildest demonstrations ever witnessed on the streets of Spokane occurred about 10 o'clock last night, when a mob of more than two thousand persons surged about the entrance to the police station, clamoring for the release of Mrs. Hazlett, a woman who had been arrested only a few minutes before by Patrolman Thomas Lister under circumstances that tested the officer's nerve to the utmost.

The Evening Luxury

LEAD PACKETS ONLY

Anticipated with delight by all who use it. Never sold by pedlars or in bulk.

By All Grocers. Highest Award, St. Louis, 1904.

CONSTRUCTION OF THE NEW PACKING PLANT

Being Erected by J. Y. Griffin Co. in North End of City, Delayed for Lack of Gravel. New Industry Will be One of Most Important in Province. Modern Equipment. Killing Capacity Will be 5,000 Cattle, 3,000 Hogs and 1,500 Sheep Daily.

Work on the big packing plant, which is being erected at the north end of the city by the J. Y. Griffin Co., to carry on a modern mammoth dressed meat industry, packing and canning factory, is under way at considerable construction work has been done. The work however, has progressed slowly during the last month on account of the unusually difficult encountered in obtaining gravel from the bed of the Saskatchewan river. The water in the Saskatchewan River has been at high all season that the splendid gravel bars, for which it is famous have been kept completely submerged during the greater part of the season rendering it impossible to load directly into the wagon and increasing the difficulty of raising the gravel by high all season that the splendid gravel bars, for which it is famous have been kept completely submerged during the greater part of the season rendering it impossible to load directly into the wagon and increasing the difficulty of raising the gravel by

The fifth floor of the cooling division will be used for the preparation of the by-products of beef and pork, and the curing process. The floors below the fourth, third and second are used for freezing and storing. The various floors in the manufacturing section will be used for the manufacture of the products that are cooled and stored in respective floors of the cooling section.

A section in the basement is set apart for the smoke rooms. This portion is made absolutely fireproof with steel and cement.

Close to the building now under construction a power and heating plant will be erected, 90 feet by 122 feet.

C.P.R. CONCEDES A NINE-HOUR DAY. Winnipeg, Sept. 11.—In the first conference held between the officials of the C. P. R. and a delegation of representatives of the mechanical trades, a decision was reached yesterday. As a result the nine-hour day has been conceded to the boiler makers. The past few days have been occupied with a matter of equal importance—the raising of the wage scale in such a manner that the men engaged in the boiler-making trade will receive the same day's wages as if the whole ten hours were served.

Both conferences which have been held at St. Paul and the other at Winnipeg, have made this concession to the men. In addition to this, however, the hourly rate of pay has been increased from 88c to 43c. The main point of difference has been in the matter of the reduction of the working shift from ten hours a day to 9.

Increase of Pay. Both conferences which have been held at St. Paul and the other at Winnipeg, have made this concession to the men. In addition to this, however, the hourly rate of pay has been increased from 88c to 43c. The main point of difference has been in the matter of the reduction of the working shift from ten hours a day to 9.

DEATH FACED BY GIRL THREE TIMES

Fell 50 feet From Roller Coaster and Lit on Track in Front of Approaching Car.

Los Angeles, Sept. 13.—Harold Custer fell from the second spiral coaster at Ocean park, falling unconscious on the track below, while the car containing her brother and sister whirled swiftly around the curves as she lay directly in its path, the remaining car was within fifteen feet, falling about to the sea below, only to be caught by a scaffolding above the waves, the young girl, who was sixteen years old, faced death three times yesterday afternoon, yet escaped with a few bruises.

Miss Mustachio, who lives at 1518 San Pedro street, this city, was charming her young sister and brother at the seaside resort. The younger children wanted to ride on the roller coaster, which is built out over the surf, and she accompanied them.

The car in which they rode was dragged to the top of the incline and started on its journey
