

## DEVOE TOOK 9½ GALLONS LESS

Judge I. D. Fairchild of Lufkin, Texas, had two houses painted, both same size. One was painted with a leading top-price paint, and took 25 gallons. The other was painted with Devoe, and took only 15½ gallons. The "leading paint" referred to is adulterated 15%, but is sold at the same price as Devoe.

The most economical paint always is the one that takes least gallons and wears longest, and that's Devoe.

PROVE IT YOURSELF.

### NOTICE:

These Paints are strictly pure, and are sold subject to chemical analysis.

### NOTICE:

These Paints are made ONLY of:  
Pure White Lead,  
Pure White Zinc,  
Pure Linseed Oil,  
Pure Turpentine Dryer,  
Pure Tinting Colors,  
AND NOTHING ELSE.

### NOTICE:

These Paints are put up strictly full measure.

# PAINT YOUR HOUSE WITH DEVOE LEAD AND ZINC PAINT.

READY FOR USE.

## THE ROYAL STORES LIMITED

Takes Fewer Gallons and Wears Longer.

### THREE CAUTIONS:

ANY PAINT will crack and peel if put on in damp weather, or when the woodwork is damp.

ANY PAINT will crack and peel if applied too thickly—Brush the paint out.

ANY PAINT will crack and peel if cheap primers are used.

## Some Special JOBS and BARGAINS.

Children's Dainty Muslin Dresses, slightly tossed and ruffled, Wonderful Value..... \$1.40, 2.20, 3.50  
Pound Tweeds, long lengths, suitable for suits and costumes..... 50c. & 80c. lb.  
A splendid range of Zephyrs, Muslins, Linens and Cottons..... 9c. & 30c.  
Something Special: Paper and Envelopes, in boxes, Good Quality..... 6c., 10c. & 15c.

Have you seen our Job Room Papers? You must have heard of them. Other shops have Job Papers, but there is none as good as

## TEMPLETON'S.

## GO CARTS and CARRIAGES.

The new Go Carts and Carriages, all the new 1910 models are now on display. New styles and patterns. The finest line we have ever shown

in Rattan, Leather and Cloth Hood Carriages, Reclining Go Carts and Automobile Carriages. We have the greatest line of low priced Collapsible Go Carts ever shown here, simple in construction and durable, lightweight. Price, from \$3.75 up. See our window display.

U. S. PICTURE & PORTRAIT CO.,  
HOUSE FURNISHERS.

## THE GENUINE INGERSOLL IS O. K.

An acceptable Gift for Boy or Girl, Man or Woman, is an Ingersoll Watch. You make no mistake in buying one.

### Note the Special Prices:

Men's Nickel, \$1.25; Oxydised, \$1.75; Gold Plated, \$1.75.  
Boys' Special Extra Strong Nickel, \$2.50.  
Ladies' Nickel, \$2.50; Oxydised, \$3.00; Gold Plated, \$3.

Sent per registered parcel post (carefully packed) on receipt of price. We are the one store in Newfoundland where you are sure to get a Genuine Ingersoll Watch.

## The Tail of Comet Will Hit Venus.

PARIS, April 19. — M. Flammarion, the noted astronomer says: — Halley's comet creates a noble excitement in all scientific minds, and different expeditions are being organized in order to observe it in the best possible conditions, especially about the time when it will attain its greatest proximity to the earth. I have just received on this subject a very interesting letter from Professor Birkeland, of the University of Christiania, informing me of his plan to go with his assistant, Mons. O. Krogness, to Kaafjord, in the Province of Finnmark, in about 70 degrees latitude, in the most northern part of Norway, to make magnetic and meteorological observations there from May 7 to June 1, during the period when the comet will be nearest to us, and notably on May 18 and 19, during its passage before the solar disk at the moment when its caudal appendage thrown back by the repulsive force of the day star, will reach out in our direction and meet the earth if the length of this appendage is not less than twenty-three million kilometres.

**Conclusions Expected.**  
If, according to the present cometary theory, this tail is composed of cosmic particles electrically illuminated by the cathodic rays emanating from the sun, it may be presumed that, by the action of the terrestrial magnetism, its radiant matter will be powerfully attracted and concentrated about the polar regions of our globe in the zones where the aurora borealis spreads its most beautiful luminous draperies and projects its phosphorescent jets. These cometary radiations will then give birth to electric and magnetic phenomena which it will be particularly interesting for us to study. Moreover, if such is really the physical constitution of this comet's tail it is probable that its form will show considerable modifications and we will doubtless, adds Mons. Birkeland, witness luminous effects analogous to those that are obtained on a small sphere. He recalls, on this point, how these rays gather in rings which unfold in fluorescent spirals about the magnetic poles of the earth, but in an opposite manner, and to the regions in which the polar aurora are produced.

**Magnetic Effects.**  
Sometimes these magnetic circles appear in the shape of a wide, continuous, uninterrupted band; sometimes, too, the rays appear in three lines clearly limited whose positions are well defined about the poles. Some experiments have been an equatorial ring, truly magnificent, but fleeting. It appears suddenly and vanishes almost at once, for the rays which circulate about the equator are difficult to concentrate, and the fluorescence is not easily obtained in very rarefied gases. In some cases there is noticed a characteristic point of light, as a sort of bridge between the source of the emanation of the rays and the points at which they end, on the little globe, showing the manner in which they are transmitted. It may then be not impossible that the cometary radiations produce on a large scale on the earth from May 18 to 19 phenomena resembling those we have just described.

**The Example of Venus.**  
As a prelude to that which may happen to us on the date of our meeting with the comet, a unique event is going to take place in the heavens on the morning of May 2, for Venus, which now appears as a morning star, will probably herself be plunged in the comet's tail. That will be an observation of the greatest interest. Perhaps we may see spindles of light starting from the polar regions of Venus, in form like a gigantic magnetic bridge thrown over the space between the comet and the planet, and realizing on a colossal scale the curious laboratory experiment of which we spoke a little while ago. The phenomena observed on Venus in this instance will be doubly interesting for us, because that world is almost identical with ours as to size, mass and density, and we shall have there under our eyes an image of what may happen in our case some days later. It is very probable, in fact, that the cathodic rays and those imps of ions and electrons which now play such a bizarre role in the theories of contemporary physics are keeping back for us some surprises in this famous meeting.

## Itching Piles For 27 Yrs

Despaired of ever getting relief until cure came 3 years ago with use of DR. CHASE'S OINTMENT.

Mr. John Johnson, Cawley, Alta writes: "Three years ago I was cured of blind, itching piles of twenty-seven years' standing by using Dr. Chase's Ointment. I used to think that death would be the only relief I could ever get from the terrible misery of piles. Dr. Chase's Ointment is worth sixty dollars a box instead of six cents. I am a different man since using it. I am farming all the time now and never miss a day. Words fail to express my gratitude for the cure this Ointment made for me. I cannot tell half as much about it as it deserves. Any one doubting this can write direct to me."

Do not accept an imitation or substitute in place of Dr. Chase's Ointment, for there has yet to be discovered a treatment which so promptly gives relief from itching and so thoroughly cures every form of piles. 60 cents a box, at all dealers, or Edmondson, Bates & Co., Toronto. Write for a free copy of Dr. Chase's Recipes.

## Apples as Cure for Intemperance.

The forbidden fruit of the Garden of Eden which brought sin into the world is now looked on as the means of driving sin out of the world. No less an august body than the Iowa State Horticultural Society is standing sponsor for the movement to remove the stigma from the apple.

When Eve, sorely tempted, partook of the luscious fruit which she had been forbidden to touch, she all unwittingly cast a blight on the apple which centuries of cultivation and two national shows at Spokane have been unable to remove. It has remained for an apple-loving country doctor to discover that not only can the world be fed until it has secured the necessary calories of energy, but that the craving for liquor—conceded to be the greatest cause of misery and crime—can be eradicated from the human body by the apple. As if this were not miracle enough, it is contended, that General Grant might have won the siege of Vicksburg and the battle of Appomattox by munching on a Ber Davis, a Spitzenburg or a Jonathan just as well as by puffing on a cigar.

"The use of apples as an article of diet will very much diminish, decrease and ultimately abate the appetite for alcoholic stimulants," declares Dr. Samuel Bailey of Mt. Airy, Iowa. "That this is a fact could be proved in many

## Adam: The Man Who Never Was a Boy

Of all the men the world has seen Since time his rounds began, There's one I pity every day— Earth's first and foremost man. Just think of all the fun he missed By failing to enjoy The dear delights of youthime, For—he never was a boy.

He never stubbed his naked toe Against a root or stone, He never with pin-hook fished For minnows, all alone; He never sought the humble bee Among the daisies coy, Nor felt its business end, Because—he never was a boy.

He never hockey played, nor tied A bright and shining pall, Down in the alley all alone To a trusting poodles' tail, And when he home from swimming came, No slipper interfered, His pleasure to destroy Because—he never was a boy.

He might remember splendid times In Eden's bowers—yet He never acted Romeo To a six year old Juliet, He never sent a valentine Intended to annoy His good but maiden aunt, Because—he never was a boy.

He never cut a kite string, no, Nor hid an Easter egg; He never spoiled his pantaloon A playing mumble-peg He never from the attic stole A 'coon-bunt to enjoy, Nor found the "old man" waiting, For—he never was a boy.

I pity him why should I not? I even drop a tear; He never knew how much he missed; He never will, I fear, And always when those dear old days My memories employ, I pity him earth's only man Who—never was a boy.

## Drowned While Pinned Under Heavy Logs.

The first fatal accident on the lumber drives in this section of the province this spring, occurred at Wickham, Queens County, on Thursday afternoon about 1 o'clock, when John Beatty, of Gagetown, was thrown into the river by a brow of logs and pinned down in about four feet of water, where he was drowned. The deceased and his nephew, Manford Beatty, were getting the logs out into the river and had been working on them all morning. They had hardly begun work after dinner again before the logs started rolling, and almost before he realized it, John Beatty was struck by the rolling timber and thrown into the river, preventing his escape. The injured man struggled hard to free himself, but the weight of the logs was too much, and before he reached him, life was extinct.

## Maher Will Live in Ireland.

When Danny Maher retires from the turf, at the end of the present season, in England, he will settle down among the hills of Tipperary, in Ireland. Maher has lately been negotiating for a stable at the Carragh, in County Kildare, which was formerly owned by "Boss" Croker. Should he not get it, reports say he will build an establishment of his own at Nenagh, in Tipperary. It is computed that at the end of the present racing season Maher will be \$1,000,000 to the good at his bankers.

## CAPE REPORT.

Special Evening Telegram. CAPE RACE, To-Day. Wind south-west, light, weather fine, preceded by fog. A small iceberg is in sight about 5 miles south-west. Several schooners are in sight, bound in. Bar. 30.10, ther. 39.

C. L. B.—Every member of B. Co. C. L. B. must be present to-night. Pull kit.

Instances if a little care, caution and vigilance were taken to thoroughly investigate conditions. As a rule, the habitual user of alcoholic stimulants is rarely a lover or consumer of apples. There seems to be a peculiar combination in apples, in the acid in them, or in the peculiar chemical combinations of the apple, that allays the irritation, or so-called appetite, produced by the use of liquor. I am also of the opinion that the keen appetite for tobacco is limited by the use of apples. I am thoroughly convinced that any man who is a lover of whiskey and is in a condition when he thinks he must have a drink, if he will eat an apple before he takes the drink, will find that his appetite for drink has been materially lessened, if not entirely abated for the time.

## The PEN WATERMAN'S IDEAL FOUNTAIN PEN.

You will eventually buy, All progress in Fountain-Pen making is progress towards simplicity. Waterman's Ideals are absolutely simple in construction. There are only five parts to the pen, which, when assembled, form the perfect writing implement of the present time. The parts are carefully fitted together to insure absolute safety and cleanliness in the use and carrying of Pen.

The Spoon Feed, which is the only reliable device ever placed in a Fountain Pen, is to be found only in Waterman's Ideals.

The Gold Pens in Waterman's Ideals are 14kt. gold, hand-tempered with Iridium—the hardest metal in the world.

Avoid imitations and substitutes.
