"Right. It was a presentation, but of a somewhat unusual sort."

"I grow curious. Let us have the story."

Very good. It is a story I have had to tell more than once. You must know, then, that I began my journalistic life in the colonies as editor of that able and distinguished organ of public opinion, the Burragundi Beacon. I had been conducting it for six months, to the satisfaction of the proprietors, when that oulbreak of bushranging, which was headed by the notorious F ank Gardiner, began to keep the country in a state of continued exoitement and terrorism. At last, £2000 was set on his had, alive or dead. O e morning I received a short letter, something like the following, addressed to the eaitor of the B year.

Catarrh-A New Treatment. Perhaps the most extraordinary success that has been achieved in modern science has been ttained by the Dixon treatment for catarrh Out of 2000 patients treated during the past six months, fully ninety per cent have been oured of this stubborn malady. This is none oured of this stubborn malady. This is none the less startling when it is remembered that not the pot cent of the patients presenting themselves to the regular practitioner are benefitted, while the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally elieved by the most scientific men that the disease is due to the presence of living parasites in the tissues, Mr. Dixon at once adapted his cure to their extermination; this-accomplished, the catarrh is practically cured, and the peruanency is unquestioned, as cures effected by him four years ago are cures still. No one else has ever attempted to cure catarrin in this manner, and no other treatment nasever cured catarrh. The application of the remedy is simple and can be done at home, and the present season of the year is the most favorable for a speedy and permanent cure, he majority of cases being cured at one treatment. Sufferers should correspond with Messrs. A. H. DIXON & SON, 305 King street west, Toronto, Canada, and enclose stamp for their treatise on catarrh.—Montreal Star. 36
