THE "CORBIN"
The Leading Disk Harrow

The above shows the Harrow with Removable Seeder

STILL THEY COME

More than 40 trials are reported with other Disk Harrows, in which the "Corbin" was sold and certified for the past two seasons. The simple fact of the matter is that the "Corbin" is **THE STRONGEST.**

THE MOST FLEXIBLE

THE MOST DURABLE

THE LIGHTEST DRAUGHT

and the only Disk Harrow that is reversible and cultivates all the land under the tongue and leaves the land level, and its work in the field quickly progresses.

THE "CORBIN"

is made by men who have made a specialty of Disk Harrows for years, and they know what is necessary in a perfectly working Disk Harrow. In this respect they have a great advantage over inexperienced manufacturers.

SEND FOR 1889 CIRCULAR

which has some interesting facts and description of a new Harrow.

Mr. Theo. Shaw writes in *The Star* Journal of March 28: "The reason this firm (St. Lawrence Manufacturing Co.) has done so well is because they have manufactured a good article, the usefulness of which we have verified on our own farm."

ABOUT THE SEEDER

This has now a perfected drive gear and gave excellent satisfaction last season. As it greatly adds to the utility of the Harrow at a small cost demand for it is rapidly increasing.

The Corbin Steel Drum Roller, with Grass Seeder.
