## The Sea Gives Them Up

and the mountains send them home— in September— This is the month people look round for Fall and Winter underwear and we again commence, thro' the daily papers to attract the attention of the purchasing public to The "Health" Brand of Ladies' and Childrens' underwear, which you will be freely asked for because the public now recognize after three years experience that nothing better is made, either in Quality, or Finish, and prices compare favourably with all other makes

Any Retail dealers desiring electro types of above cuts for their own local papers, can obtain them free of charge of any wholesale dealer, or from the manufacturers—

Remember this— An article of recognized merit such as the Health Brand now is, kept well before the Public, is half sold to anyone who comes into your store for Ladies' or Childrens' Underwear.

The Montreal Silk Mills Company, Montreal.
