

Every Farmer and Stockman Needs a Good Pulper and Slicer

And here are two first-class machines. This one has six reversible knives for pulping and slicing. The drive wheels are large and heavy, and we use roller and ball bearings, ensuring first-class work and easy operation.

We also make a Pulper and Slicer in this same style with a double hopper, which is divided, one side for slicing and the other for pulping. A convenient dividing leaf shuts off either side as desired. This is a strong, well-built machine.

Easily Operated---Have Roller and Ball Bearings

This style is very popular. It is so constructed that turnips and other roots are firmly held in place, so that there is no chance of their rolling when they come in contact with the knives. It cuts up all kinds of roots thoroughly, saves time and stock and is much more efficient than other makes.

Send for our catalogue to-day and be sure you buy all your farm tools from that catalogue—it pays.
