

# HOE

## SINGLE LARGE CYLINDER PRINTING PRESS.

THIS Press is adapted to fine newspaper work and to every kind of job work, from colored posters to the most delicate script on dry paper. It is provided with all modern conveniences, as registering apparatus, taper bearers regulated by set screws, adjustable feed guides and open fountain, as well as some new devices for taking up wear, so as to render the press both more accurate and more durable. It will print from one thousand to twenty-five hundred impressions per hour, according to the size of the press, and the quality of the work. With each press are sent two sets of roller stocks, two roller moulds, one set of blankets, countershaft, hangers, driving pulley, and two cone pulleys. When small sizes are desired to run by hand power, a fly-wheel and stand of suitable size will be furnished instead of the countershaft. Both rollers go over the entire form.

We have one of these excellent Presses in Stock. Size Bed 29 x 42. Price, \$2750.
