

# *Power and Telephone Cables*

The Standard in  
Canada for : :  
Over 25 Years

For more than a quarter of century we have been making wires and cables of unquestioned quality and reliability. We have one of the most up-to-date and best equipped plants in the country. Our workmen are skilled and many of them are sons of our older employees. Our chemistry department is manned by capable and expert chemists who co-operate with our purchasing department in seeing that nothing but absolutely unimpeachable materials enter our works. We use the best of pure new lead, the finest Sea Island yarns and Italian silks, the highest grades of asbestos, etc., etc.
