

**CANADIAN POSITION**

Canada is pleased with the interest displayed by Korean business persons in settling in Canada, and values the economic and cultural contributions made by those who have taken up residence here. We also appreciate the measures taken by the Government of Korea in facilitating the movement of such persons, particularly through the easing of exchange controls and by changes to travel regulations which now allow emigrants to obtain passports and visas without registering with an approved "emigration corporation". We look forward to continued growth in our entrepreneurial and investor immigrant programs in Korea.
