## COBALT

Cobalt is the richest silver field in the world.

Experts say so, and smelter returns prove it.

The ore runs as high as \$100,000 to the carload, and more than

one Company has paid back several times its entire subscribed

capital in its first dividend.

New and rich discoveries are being made weekly.

These are facts—cold facts—and the field yet in its infancy.

Now is the time to get in—before the best opportunities for big

profits have slipped by.

I am a practical mining man, and was one of the first in the

Cobalt field.

This has enabled me to secure for my clients opportunities that

have, without exception, afforded them large profits—as high as

3500 per cent.

MAY I COUNT YOU AMONG THEM? I am presenting an exceptional

opportunity this week, and there are large profits to be made.

Write or Call To-day for Full Particulars. Booklet, Map

and Weekly News-Letter, furnishing full and up-to-date infor-

mation, free on request.

## SHARP RISE IN CALL MONEY.

World Office, Friday, Aug. 31.

Call money advanced to 12 per cent. at New York to-day with-

out having any marked influence on stock quotations. The reac-

tion of Thursday was proceeded with, and lower prices were

touched, but the shading in prices was orderly, and corrobor-

ative of the opinion that the Wall-street market leaders are proof

against any and every immediate contingency. Wall-street has

shown more irregularity this week than at any time since the bull

movement started, and it is pointed out that prices are becom-

ing much harder to bull. With prices at the present eminence,

nothing but rampant outside speculation or short selling can re-

tain prices or improve them. The former is not yet available,

and, courting a short interest for further market sustenance is

thought to be the play of the manipulators. Temporary setbacks

have accomplished this purpose before, and may again be success-

ful. The attractive money rates on Wall-street are likely to take

care of any immediately available spare funds that Canadian

banks have, and further prevent any extension of call loans on

the home market.
