COBALT --- Mining Markets Weak From Trethewey Announcement --- COBALT

MINING MARKETS QUIET PRICES ARE IRREGULAR

New Find Strengthens Nipissing Shares, But Other Issues Are Irregular and Weak.

The news from the Cobalt camp recently is highly encouraging to those looking beyond the immediate present for the values of the various securities of the better class of properties in this district. The premier mining property in the camp, the Nipissing, has again come to the front with an exceedingly valuable find, which was uncovered only a few days ago. The new vein is believed to be almost as good as the Bonanza strike, which made this property so famous, and which has given such great wealth to the company. The vein is understood to have been immediately adjacent to the McKinley-Darragh property, and is naturally expected to make big money for the shareholders of this property.

On the University a strike is also reported, and altho the width of the vein is small it has served the purpose of attracting attention more to this part of the camp. Only in the case of Nipissing stock has any recognition been made of the recent strikes, the shares of this company showing an appreciating of upwards of $2 a share since the find was reported.

The Toronto market for the mining securities is still in a very dull condition, and trading is largely restricted to a few properties, of which Trethewey and Foster are the principal. A small improvement in the price of both of these issues occurred early in the week, in the one case by reason of buying for London accounts, and, in the other, that of Foster, for the reason that the expert report on this mine is believed to be more favorable than the opinions recently held of the claim.

The confidence which appears to have been lost in the camp because of the slump in the various stocks is gradually being restored in a substantial way; that is by actual development, which gives a better basis of value to the mines than has hitherto been the case. The shares, which are not active features of the market, are dull and more depressed than the others, and where liquidation has to be effected the prices show a gradual decline. Many of the local brokers spent the end of last week and the beginning of this in the camp, and the development activity now going on, as witnessed during this visit, has made a good impression and improved sentiment in the market.

The weak undertone at the end of the week was due to the decision of the Trethewey directors to pay no further dividends for a time. The passing of dividends until the property is thoroly prospected is a protective measure that appears commendable under existing conditions.

On Boston curb: Silver Leaf closed 10 to 11, high 11, low 10½, 5500; Abitibi, 14 to 16, 900 sold at 15; Cleveland, 85 to 90, 200 sold at 90.

No Report on Foster.

The expected report on Foster Mine was not made on Saturday and slight weakness was shown in the stock.

MASSANOGA.

A lake shaped something like a pair of spectacles, rather a pair of lakes joined by a passage some few feet wide. A lake immensely deep in parts, with sunny bathing beaches, perfectly safe, along its shores. Beautiful woods all round, full of native life, unspoilt and largely untrodden. And, beetling over the water, just at the bridge of the spectacles, is the grand old rock, the crowning glory of Lake Massanoga. "The Gibraltar of Canada," it has been called, and fitly enough. A mile and more long, hundreds of feet high, rising sheer out of the calm waters of the lake, impressively beautiful by day, positively awe-inspiring in the moonlight, is this great stone mountain. In its shadow nestles Bon Echo Inn, as nearly perfect a summer hotel as one could wish to find. Hotel seems scarcely the word for Bon Echo, so homelike is it—the hotel feeling lasts no longer than it takes our genial host to express his welcome. Canoeing, sailing, rowing, swimming, all may be enjoyed at Massanoga, and down in the depths lurk gamey salmon-trout. Massanoga is a resort recently discovered, and known to comparatively few Canadians. But for people who want to get near to nature, and yet not out of touch of civilization, who want to enjoy glorious air, brilliant sunshine, cool waters and all the fascinations of a primitive region combined with the comforts of a modern summer resort, Massanoga is the place. The nearest railway station is Kaladar, 150 miles east of Toronto on the C.P.R. Illustrated folder and full particulars will be gladly mailed upon request by C. B. Foster, district passenger agent, C.P.R., Toronto. ed

Gas and Oil Stock.

The Confederation Mines Co., Toronto, report considerable demand for stock in the Owen Sound Natural Gas and Oil Co. This company is well reported on, and the directorate is very strong. Those desiring any stock should apply for same at once.

Supposed to Be Burglar.

TWEED, June 2.—Constable Sedore of Actinolite brought in a man supposed to be one of the burglars that went thru R. H. Gudden's jewelry store at Alexandria on May 15. He is a man about twenty-five or thirty years of age, and is slightly lame.

CANADA SUNDAY REST LAW, MOST EFFECTIVE IN WORLD

Federation of Lord's Day Societies Congratulate Ottawa Parliament.

Rev. J. G. Shearer and Rev. T. Albert Moore have returned from Philadelphia, where they attended a meeting of the International Federation of Sunday Rest Associations of America.

The federation congratulated the parliament and people of Canada on the enactment of the Lord's Day Act, "which is recognized as at once the most effective and the most reasonable Sunday law in the world, securing the liberty of the weekly rest day to the largest number possible of Canadian workingmen," and the federation pledged itself to do all in its power to secure a similar law for the people of the other nations of the continent of America.

Another resolution noted with gratitude the movement among druggists in the United States and Canada, in the direction of voluntarily refusing to sell on Sunday anything but medicines or sickroom appliances, and toward the shortening of hours of opening.

After noting the fact that in Belgium and Switzerland there has been a reduction of more than 50 per cent. in railway accidents, caused by the mistakes of employes, since these countries stopped Sunday freight traffic, and the fact that the parliament of Canada had recently largely restricted Sunday freight traffic on Canadian roads, the federation resolved to appeal to the United States congress to enact a Sunday law similar to that recently passed in Canada.

TRYING TO HOLD THE CASH.

Until U.S. Authorities Secure Extradition of George Hern.

Every effort is being made by the U. S. federal authorities to have George Kern of Knoxville, Tenn., held to face extradition proceedings on charges of perjury and concealment of funds in bankruptcy proceedings.

The local police are exerting every effort to conserve the $5100 to his credit in the Bank of Commerce. After Kern had been arraigned in police court Saturday morning, and remanded until this morning, the general manager of the Bank of Commerce appeared before the magistrate and gave a written undertaking that the money on deposit in his bank would not be paid out, save on the order of a superior court judge.

This arose out of the effort made by J. W. Curry, K.C., counsel for Kern, to draw the money on two cheques drawn by his client.

The detectives say that while in the jail Kern was allowed to send a registered letter containing valuable papers to his wife in Knoxville.

Word has been received by Sergt. Duncan that one of the trustees in the bankruptcy proceedings will come with the U. S. marshal to take part in the extradition proceedings.

PRESERVATION OF WILD PLANTS

Address of C. L. Pollard on Utilitarian Aspect of Question.

At the university biological hall on Saturday night the subject of "Wild Plants and Their Preservation" was discussed by C. L. Pollard, secretary of the Wild Flower Society of America.

Mr. Pollard dealt with the utilitarian as well as the sentimental aspect of the question. An excellent set of lantern slides of wild flowers was exhibited.

Professor Ramsay Wright introduced the speaker, who explained the objects of the society. He referred to the depletion of many species of wild flowers at one time delightfully common and ascribed the blame to the progress of building and farming operations, as well as the unsparing depredations of careless people.

In moving a vote of thanks to the speaker Principal Scott of the Normal School regretted that the city authorities, those who needed the instruction most badly, were not present. Attention to the arguments of Mr. Pollard might induce them to cease their mistaken efforts after cleanliness and orders by despoiling parks and play grounds of wild flower and under brush and making them barren and unsightly.

WILL NOT AID POLICE.

Man, Slashed by Countryman, Withholds Name of Assailant.

NEW YORK, June 2.—Admitting he knows the identity of the man who stabbed him, and declaring he is the victim of a vendetta, Carmelo Catroneo is probably dying in a hospital. He refuses, however, to give any information that would put the police on the track of his assailant. Catroneo says he will attend to the case if he recovers, and if he does not there are others who will.

Catroneo came from Sicily three years ago, but last year returned to his native land, it is said, to avenge a crime committed there by a man with whose family the Catroneos had long waged a feud.

ACCUSED OF ASSAULT ON FIVE-YEAR-OLD CHILD.

BELLEVILLE, June 2.—David N. Fife, who is charged with criminal assault, committed on little 5-year-old Bessie Collins of this city, was brought up in the police court yesterday and was fully identified by his childish victim.

Fife was then remanded till next week.

RHEUMATISM

Munyon's Rheumatism Cure seldom fails to relieve pains in legs, arms, back, stiff or swollen joints in a few hours. Positively cures in a few days. It does not put the disease to sleep, but drives it from the system. —MUNYON.

Woman's Body Found.

SELKIRK, Man., June 2.—(Special.)—A search party found the body of Mrs. W. Chambers, who wandered away from her home at Oak Hammock, yesterday. She has been missing for nearly a week. The body was found about a mile and a half from the house, and death was apparently due to exposure.

$50 IN GOLD

In January last we offered a prize of $50 in gold for a suitable name for our silver properties, adjoining the Drummond Mine, in which 1474 persons competed, and we paid the gold to Mr. J. W. Garvin, Sparks-street, Ottawa, who suggested the now well-known name of "Silver Cross."

ANOTHER $50 IN GOLD

We have two Larder Lake gold claims, adjoining the famous Dr. Reddick mines, and the Cryderman and Proprietary mines. For these properties we want a suitable name, and will give $50 in gold to the one who first suggests the name that will be adopted.

Send at once for conditions of contest. Don't tell anyone the name you think of until you receive the information from us; then send immediately.

Dr. Reddick Larder Lake Mines, Limited
(No Personal Liability)
Head Office 10 Trust Building, Sparks Street, Ottawa
"THE ORIGINAL and FAMOUS DISCOVERIES"

We hold seven claims—the first discoveries at Larder Lake. No opposition when our claims were staked. Dr. Reddick and his associates carefully selected and staked what in the opinion of experts and others who are in a position to know, is one of the richest discoveries ever made in this country. As an evidence of this we have been daily receiving orders for our stock from parties living in the vicinity of the mines and Cobalt.

We have placed 200,000 shares of our Treasury stock for sale at $1.00 per share, a large block of which has already been sold, and intending purchasers should send in their orders before this allotment is all taken up.

—THINK THIS OVER—

FIRST in the field and the best locations;
CAREFUL and economical management;
No INJUDICIOUS or MISLEADING statements;
A STRAIGHTFORWARD proposition and your money's worth;
One dollar's worth of stock for one dollar.

Write to the company or call for prospectus and further information.

BIG MONEY IN OIL AND NATURAL GAS.

Many fortunes have been made and are being made in the Oil and Natural Gas Fields. Many a successful man owes his success to some first speculation in Gas or Oil stock.

A STRIKING FEATURE.

A striking feature about the oil business is the fact that it does not take very long to put down wells and get the enterprise on a dividend-paying footing, especially if it is compared with gold or copper mining. Taking the time needed for the development of a gold or copper mine from the time the work first commences, it usually means a delay of from two to five years to get the property opened up; while with oil, very often the same number of months will accomplish the end. In opening a mine, shafts have to be sunk, levels driven and air connections made before the property is in shape to begin producing on a large scale. In opening an oil well all that is necessary is to put down a shaft in the way of a drilled hole. One does not have to wait for levels to be driven and air connections made.

Another fact that is worthy of note is the cheapness of operating the wells, one jumping jack operated by one man works twenty or more different wells, besides the small outlay, compared with mining operation, it takes to develop the oil business. The cost of running the wells after once down is reduced to a minimum by the fact that by the aid of the jerker line one engine will pump ten to fifty wells or more, according to horsepower, although located at some distance apart, thereby enabling one man to look after a large number of wells.

YOUR OPPORTUNITY.

If you have not yet subscribed for stock in this Company do so now. Soon all the shares will be gone.

REMEMBER ours are syndicate shares of the par value of $20 each, and are fully paid and non-assessable. Our capital is only $40,000.
