The Election Scandals.

The Premier thought it unwise to dwell too much on the late election scandals. He said they left a bad taste in the mouth. In this the speaker agreed with him, and he denounced in vigorous terms the remissness of the Government in setting into motion the machinery of justice for the punishment of their employes, who had been guilty of such terrible maifeasance of office as lately disclosed in West Eigin and elsewhere. As fir back as 1887 he (Mr. Whitney) had tried to have the House pass his bill making bribery punishable by imprisonment as well as by fine, but in that and the two or three following years the Government had baulked his efforts. In 1887 Mr. Whitney himself prosecuted in his own constituency five men for bribery, and four pleaded guilty, and the other skipped the country. In face of all this Mr. Ross, however, would declare that the Eiberals were the first to make any efforts to punish bribery in elections.

Cold Storage and Other Planks. The Election Scandals.

Other planks of this new platform were old storage, transportation and the home nanufacture of the raw article, in which atter Mr. Whitney say the "cloven foot" of protection, and with these Mr. Ross had no more to do than any other citizen had,

Mr. Whitney's Speech.

Mr. Whitney's Speech.

Mr. Whitney expressed his great pleasure at the presence of so many ladies, as theirs was always an influence for good. Before addressing himself to the speech delivered by the Premier here yesterday, Mr. Whitney described the recent election in South Renfrew, where the Government's majority was so greatly reduced, as "the first gun in the last fight." He denied Mr. Ross' statement that this was a new Government simply because one man had gone out and two new men had come in. He reminded the audience that Mr. Hardy had himself, on becoming Premier, after his first Cabinet meeting, announced his Government. This new Government is nothing but the remains of the Hardy Government, and the action of Mr. Ross and such of the Liberal press as the great Christian paper, The Monireal Witness, in trying to cast on the refirring Premier the odium of the late election scandals, was cowardly and mean. The effort of writing up Mr. Ross at the expense of Mr. Hardy reminded the speaker "that a live jackass could always kick at a dend llon."

Mr. Ross' Speech Dissected.

Taking up Mr. Ross' program, Mr. Whitney had 'ast'? reflection on the integrity of the bench by stating to a newspaper reporter that the proposed cominission to inquire into the late bye-elections sind to inquire into the late bye-elections in the House.

received here from Pretoria, under date of Thursday, Nov. 9, says the reports received there from Ladysmith said heavy cannonading started at daybreak, that some of the Boer forces were within 1500 yards of the British when the cannonading ceased and rifle fire commenced.

The Pretoria despatch also announced that all was quiet at Mafeking and Kimberley.

Tasted the whole light through the whole light through the manual time. "There has been a tremendous waste of ammunition. Indeed, it is estimated that 20,000 rounds of ball cartridges were wasted on the occasion of the night attack on the Boer treaches. Double rations have been served out to the men who are under shelter, so as to be on the safe side if the Boers should sweep the town by a long range rifle fire. The garrison is hanging on finely. Col. Baden-Powell has the full-est confidence in everybody, especially in the matter of implicit obedience to the order to hold the fire until the Boers get to close range.

"Then end came," says the correspondent,
"after five hours' fighting. The enemy retired, being heavily beaten for all time so
far as Mafeking is concerned. It was the
hottest day of the slege and the firing
was terrific, the Boers evidently recognizing that the way into Mafeking, if any, is
by a kopje, which was gallantly defended
by Col. Walford's men. The garrison is
jubilant, while the Boers have been hurled
back in disorder on the laager, and will
have to content themselves with a long
range bombardment, unless they are strongly reinforced.

Boers Lost Heavily. Boers Lost Heavily.

"The enemy lest heavily. For hours after their fighting line had been rolled back, two wagons went slowly along their position, picking up the dead and wounded, the kopje resembled a shambles after the fight. All the men were killed by bullets or shells. The lookout tower was shot to pieces, while even the saddles of the horses were fearfully battered. The whole place was simply smashed up by the concentrated fire of seven guns and a thousand rifes.

on Ladysmith? London, Nov. 15 .- To successfully vance so close to Ladysmith, it is pointed out, the Boers must have been most active out, the Boers must have been most active in entrenching, and the nearness of the besieging lines, it is added, indicates their readiness for the assault, which there is a disposition, in military circles, to believe the Boers were not willing to undertake. It must, however, have been patent to Gen. Joubert that Ladysmith would not fall to the fire of his artillery, and, therefore, he had no choice but to assault the place or retire to the passes of the Drakensberg, in the hope of involving the pursuing British in the intricate fastnesses of the mountains.

The cessation of cannonading mentioned in the despatch, and the opening of musketry fire, implies, it is claimed, that the Boers were obliged to stop their artillery for fear of hitting their own men, and that nothing further has been heard from this movement is, regarded here as an indication either that the threatened assault was postponed or that the result was indecisive. Otherwise, it is claimed, something further would have leaked out before now.

He ran towards Sherbourne-street, and was in front of the Varcoe store when someone lifted an upper window and cried out for police. Realizing what was the matter, he forced the front door, and was followed into the store by Spottiswood. The constable was in the act of striking a light when a man rushed down the stairs leading to the store. On seeing the officer the stranger returned upstairs. Then a scuffing noise was heard upstairs, followed by the cracking of glass. He looked in the direction of the sound and saw the figure of a man drop down outside the store. Dickson rushed to the door, and saw the apparently lifeless body of Williams lying on the pavement, with a revolver near his right hand. He saw the dead prisoner, Mc-Intosh, standing on the ledge over a window, two stores east of the Varcle place of business. McIntosh attempted to let himself down, but on seeing the policeman drew his revolver and snapped it at him. Dickson stepped back behind a telegraph pole to give him time to draw his own weapon. In the meantime McIntosh had started to run away. Constable Dickson called upon him to halt, and then fired. The prisoner kept on running, and when near Sherbourne street fired again.
