GIVE PROMISE OF REDUCTIONS

UNDERWRITERS AND SALT WATER SYSTEM

Insurance Men Pledge Themselves to Cut Rates on the Installation.

(From Tuesday's Daily.) That the installation of a salt water That the installation of the protection, to pressure system for fire protection, to provide for which the ratepayers are being asked to vote \$70,000 on Thursbeing asked to vo

being asked to vote \$70,000 on Intra-day, means a reduction in insurance rates in Victoria, is the assurance given the city in black and white by the Vancouver Island Fire Underwrit-ers' Association in a letter received by Mayor Hall this morning. The reduc-tion will depend on the amount of ex-tra protection provided for and will n working order.

The whole question of this by-law is being discussed pretty generally about the city and one of the complaints that has been heard is that there has been heard is the heard no undertaking on the part of the underwriters to grant any reduction in blackmail. rates. An assurance on this point has

is why the new domestic service, from whatever source it may be drawn, nnot be made to supply the place of a high pressure system. Discussing this aspect of the matter this morning, Mayor Hall said that the two could not be combined. With the domestic system it might be possible to put on a static pressure of 80 pounds at the hydrant but as soon as the hose was attached it would drop to about 60 pounds. Then there was also the loss of pressure by friction in passing through the hose, which it is figure out amounts to about 10 pounds per hundred feet so that it was impossible to get any kind of a high pressure from this source. In the case of the salt water system there would be a pressure at the hydrants of at least 100 pounds and the pumps would be working all the time to keep this up. There would, therefore, be no comparison in the efficiency of the two systems for fire-fighting purposes.
