

LOCAL AND PROVINCIAL.

The Knights Templar of Washington and Charlotte counties are contemplating a pilgrimage to this city in September.

It is reported that the river steamer Springfield will be replaced next year by a new steamer to be built here during the winter.

Some heads of timothy were received last night from John Vaughan, Primrose Settlement, Barnesville. The heads were very large, one being more than 10 inches.

The New Brunswick Southern Railway Company has asked permission from the city to build a pier from the beach at Beattie's Rocks to the mud cutting near the Negrotown Point road.

The department of marine has taken preliminary steps towards prosecuting the city for violating the laws by carrying more passengers on the ferryboat than the law allows.

Hugh W. Watson of this city, and Miss Josephine Goodie, of Fredericton, were married in Boston on August 11. Rev. William S. Kelsey performed the ceremony.

At the last meeting of the board of governors of the Montreal General Hospital, Dr. J. W. Macleod, of this city, was appointed one of the house staff. Doctor Macleod graduated from McGill Medical College this year.

George Hastings Hackett, of North Sydney (C. B.), has been granted a patent for a machine for producing perforated telegraphic paper.

There were nine marriages and 11 births registered in the city last week. The deaths numbered six, being caused by acute indigestion, pneumonia, diphtheria, scarlet fever, influenza, nephritis, chronic disease of liver.

The "Fidelity Hotel" at Bass River, Colchester county, (N. S.) was totally destroyed by fire, which started in a barn, on Friday night last; insurance \$1,500 on buildings and \$500 on furniture. It had been operated by Geo. W. Lewis.

The American fishing schooner Howard Holbrook, which was seized at Osoyoos at Clark's Harbor and seven pairs of rubber boots and a box of tobacco at Wrayton's Harbor without paying duty, has been released on the payment of \$400.

W. H. C. Mackay has purchased the Bankers' residence, and will build a summer cottage. Another cottage to be built for next summer will be by F. P. Schofield. Harris H. Field, Apple River (N. S.), has been granted a patent at Ottawa for a ditching machine.

David S. J. Keefe of this city, who has been a newspaper man for the past five years, and is the Ottawa correspondent of the Montreal Gazette, will be home today. It is Mr. Keefe's intention to study for the priesthood and will enter upon his theological course early in September. During his short journalistic career his advance was quite rapid. He is a son of P. J. Keefe, of the customs.

Miss Munro, who severed her connection with the G. P. Hospital last week Monday morning for her home in Nova Scotia. Speaking of the recent trouble at the Institution she said her reason for leaving was that she was unable to find out what she had to apologize for and in what way she had been disrespectful to Miss Mitchell.

T. R. Price, who was at one time connected with the engineering department of the I. C. R. and who, until recently, occupied the position of general manager of the Cape Colony government railways, has been appointed general manager of the Central South African railways, under Sir Percy Girouard. Mr. Price's new position places him in charge of the railways in the Transvaal and Orange River Colony.

The Chicago Canadian-American of Aug. 23 says: Rev. Doctor Macleod, of the First Methodist church, Evanston, whose resignation was the cause of some recent comment, has decided to go to St. John (New Brunswick), to live. He has relatives and friends living there. He will not take up ministerial work again until at least he has had a long rest and his health is restored.

Douglas McArthur's bookstore, King street, was burglarized some time between Saturday night and Monday morning. A sum of money was gained at the rear by the removal of a pane of glass. So well was this done that the glass was not injured. Ten dollars in cash was taken together with goods worth about \$75. The burglar was seen by a woman who lives in the building.

SEMI-WEEKLY TELEGRAPH'S PICTURE PUZZLE

"HERE COMES A BULL DOG." WHERE IS IT?

JOINS HIGH SCHOOL STAFF.

WILLIAM BRODIE WILL BEGIN WITH NEW TERM.

Has Had Successful Career in St. Andrews and at Sussex—Is Son of a St. John Resident—Was Student at U. N. B. and Harvard Universities.

William Brodie, who succeeds Miss Narrows (now Mrs. Sanford) on the high school staff, St. John, has won a splendid reputation as a teacher. Through his work; conscientious to a fault; firm yet not severe with his pupils; well grounded in the school curriculum and with an intimate knowledge of current events; studious; of literary tastes—these are some of the qualities which have placed Mr. Brodie in the front rank of the educationalists of the province.

Born in Fredericton, Mr. Brodie received his early education in the common schools of the capital. From there he passed on to the University of New Brunswick, where he graduated with honors and received the B. A. degree. After a year as teacher of the Kent county Grammar school, he accepted an offer to take charge of the St. Andrews school, winning golden opinions from both parents and pupils. Some of the most successful young men and women of Charlotte county received the finishing touches of their education at the hands of Mr. Brodie.

Three weeks old child of Mr. and Mrs. Daniel Chisholm had a fortunate escape from having its eyes eaten out by a rat on Sunday afternoon last. Mrs. Chisholm had been in a bedroom on stairs nursing her child and being called to attend to some household duties down stairs placed the infant on the bed as she intended to be absent but a few moments. Mrs. Chisholm had been down stairs only a few minutes when her attention was attracted by the sharp cries of her offspring.

She hastened to the bed room and was horrified to find the child tossing on the bed and its face covered with blood. Mrs. Chisholm could not form any idea at the moment what had been the cause of the child's injuries, but let an older child in the room while she took the infant down stairs to look after it, and await the arrival of Dr. D. E. Berryman, who had been sent for.

A short time after the mother with the infant left the room the young fellow left behind saw a large rat run along the floor and climb up the bed clothes and go to the spot where the infant had been lying. The child's injuries were thus explained. When Doctor Berryman arrived he found that the rat had pierced the eye with its teeth, having bitten through the eye both the upper and the lower on each side, as is thought in an endeavor to reach the eyes.

The child's screaming from the pain and the rash of the mother to its aid, scared the rodent away and when all was quiet he again returned to the bed, looking for its victim. Doctor Berryman dressed the wounds, which will not prove serious though the little rat had a narrow escape from losing the sight of both eyes.

COURT NEWS.

In the Probate court Monday, the petition of Peter Lawlor was presented, praying for letters of administration of the estate of John Lawlor, deceased. The estate consists of \$2,500 real and \$400 personal property. C. H. Ferguson, proctor.

The last will and testament of John Sullivan, deceased, was admitted to probate and letters testamentary were granted to Emily S. Sullivan, widow. The estate consists of \$2,500 real and \$400 personal property. C. H. Ferguson, proctor.

The last will and testament of John Sullivan, deceased, was admitted to probate and letters testamentary were granted to John Sullivan, executor. The estate consists of \$2,500 real and \$400 personal property. C. H. Ferguson, proctor.

In the estate of Rebecca Stirling, a citation for the passing of accounts was issued to the executor, James Stirling. Letters of administration were granted to Catherine Gillis, widow. The estate consists of \$318 personal property. Barnhill and Sanford, proctors.

A citation was granted to the executor of the estate of John Sullivan, deceased, to produce the will and testament of the deceased. The estate consists of \$2,500 real and \$400 personal property. C. H. Ferguson, proctor.

The August term of the St. John County court will open this morning at 11 o'clock. Yesterday morning before Judge Forbes the case of the Sun Life Assurance Company of Canada vs. Milton T. Monteith was postponed until the November court. H. W. Robertson appeared for the plaintiff, and Bustin & Porter for the defendant.

The Roman Catholic residents of Mispeck are making efforts to secure a church edifice of their own and from present indications success will probably crown their endeavors. The first step was taken last evening when a very successful social affair was held at the home of Capt. George Cripps, proceeds of which will form the nucleus of the fund in the belief that very shortly enough will be raised to warrant their proceeding with the erection of the church. Hitherto cottages served by fathers from the city and from Silver Falls but as now there is a prospect of a congregation of 100 there is every reason to believe that a church can be maintained.

The best place to buy a, or get Watch Repairing done, is at J. W. McDuffee's, No. 6 Canterbury street, one door from King street. My workmanship is endorsed by over two hundred Railway Employees. No apprentices. No unskilled labor. Every watch receives personal attention. All are invited to call. J. W. McDUFFEE, 6 Canterbury street, St. John (N. B.).

ATTACKED BY RAT.

DORCHESTER COPPER MINE.

EXPERTS OPINION ON NEW BRUNSWICK INDUSTRY.

J. W. Revere Tells the Story of the Coxheath Mine Near Sydney, Now An Abandoned Project in Which Good Money Has Been Sunk.

Three weeks Friday at the Royal a gentleman whose discourse upon the subject of copper mines was particularly interesting because of his long experience in connection with such ores in this section of the world. A great deal of ignorance probably obtains in regard to what copper mines are, and how they are worked, and many more are applying for information to elucidate it.

Joseph W. Revere, C. E., of Glouce Bay, the gentleman referred to was not only the original promoter of the mine at Coxheath, which is now being so prominently developed by the Intercolonial Copper Company, but was the original manager of the Coxheath copper mine 12 miles from Sydney (C. B.), where has been expended more money with less returns than in any other mining enterprise in the maritime provinces.

The Coxheath mine was first developed some 25 years ago by a local company. The ore was shown to be rich in copper, and the local capitalists, after having spent all they could afford in primary work, sold out to a Boston concern under the name of the Eastern Development Company, of which Capt. Isaac P. Gregg has been managing director, and Col. B. Granger, local superintendent.

Both these gentlemen were very much experienced in new copper mines in the United States, and were so interested in the appearance of the Coxheath ore that they gave liberal concessions in stock in their company to the original developers and seemed to have no difficulty in procuring the additional capital necessary from time to time for working the mine.

The result has been that there is at Coxheath a tremendous mass of ore upon the surface and pits and tunnels have been excavated to a depth of about 1,000 feet with levels and cross levels extending some miles in length, all the work being carried out upon the most systematic and modern scientific principles. Nevertheless, the Coxheath mine is to this day a dormant mine, and the evidence of its ever proving such a bonanza to the investors as was at first expected, does not appear to accumulate. It had been stated that this mine would prove of more value than the famous Boston and Florida mines, which have been sold for a large sum of money.

The reason for the failure to materialize these promises is said to be a peculiarity of the ore in that it cannot be worked, or smelted, or the copper got out, by any of the methods known to the world. Samples of it have been sent to Germany and all other places and a speciality has been found in the treatment of refractory ores, but so far apparently only with promise.

The work of the Intercolonial Copper Company at Coxheath, however, seems to have been developed on a different basis. Instead of being so thoroughly convinced of their having a sure thing, before extensively getting out ore, this company seem to have made sure of their practical ability to get the copper out of the ore before an extensive investment was made in making holes in the ground.

"I did the primary at the Coxheath mine back in the '60s," said Mr. Revere, "and the party" chiefly interested there was H. M. Whitney, now first president of the Dominion Coal Company. I believe that the formation of the ore, particularly with the process which will be employed in its ultimate success, is such as to make the extraction of copper a comparatively easy proceeding, particularly with the process which will be employed in its ultimate success.

The Intercolonial Copper Company seem to have made sure of their practical ability to get the copper out of the ore before an extensive investment was made in making holes in the ground.

SUNDAY SCHOOL WORKERS.

Convention at East Florenceville—Reports, Addresses, and Election of Officers.

Florenceville, Aug. 22—Teachers, officers, pastors and all assembled in East Florenceville Methodist church on the evening of Aug. 21 for their annual county convention. A large number of delegates were present at the opening. President J. K. Fleming, M. P. P., was in his place, also, Secretary J. L. Fawcett, barrister, of Hartwood.

The president's address was an excellent review of the year's work, which has been one of good activity in the several departments. Evidently the president was a teacher who was anxious to do; observance of a scholar's individuality, and a cheerful, not gloomy, presentation of service for God. This was an excellent address well mingled with illustrations.

After music, and offering, the president asked the field secretary to speak on the importance of good organization for Sunday school work. Mr. Lucas showed that organization for political election, and military campaigns was not originated by either. From old and new testament we find organization was originated by God. He showed its benefits in international, provincial, county and parish work, particularly emphasizing the latter as the president requested.

Announcements were made, committees stated, and at 10 p. m. the session was closed by Rev. Mr. Anderson. In the opening of Friday morning's session, leader and people joined in reading some of the psalms, numbers, now being studied at Sunday lessons. Lewis Young, of Woodstock, read the minutes, which were an excellent summary of the previous session.

The paper on Fossil Killed Sunday Schools, read by Miss Addie Calder, treated in an original way the various interesting methods of overcoming the difficulties instead of magnifying them. Great interest was shown in the home department conference opened by the president. Mr. S. S. Young, of this city, read the report of the executive committee. It was a unique, business like report, with a clear, concise, and convincing statement of the work done by officers, but because of some parish officers falling in with it could not present statistics with any completeness.

The third session opened at 2 p. m. when Rev. Mr. Berrie led the devotions. His brief exposition of scripture made clear application to teachers' lives. After reading of the minutes by Mr. Young, primary work came up by a clear report from R. L. Landon, the superintendent. His report was a clear, concise, and convincing statement of the work done by officers, but because of some parish officers falling in with it could not present statistics with any completeness.
