Provide State

Construction of the state of th

tions, except where affected by weather conditions, are exceptionally good and a large majority of cities report payments fair to good. fair to good. At eastern centres, jobbing business has naturally quieted somewhat. Cotton goods are firm, despite the slight weakness in the raw product, while woolen goods are quiet and prices remain firm and the raw product is very closely held. The lumber trade is still quite active. The outlook is for the end of the year to find sticks reduced close to the miti-

The outlook is for the end of the year to find stocks reduced close to the mini-mum. The boot and shoe business is in good shape. Some shading in hide prices is reported at Boston, birt other markets note little or no change. Sharp differences are noted in the iron and steel trade. Talk of over-production of some finished products is as marked as ever. The cut in the price of tin plates is said to have not brought out as many orders as anticipated. Wheat was in active demand early this

Wheat was in active demand early this Wheat was in active gemand early this week on export account, the continent being reported a free buyer for the first time on the present crop. Corn also noted some improvement in export demand early and strengthened on wet weather west, light receipts and talk of poor grading. The flour market is apparently in good ishare shape.

Wheat, including flour, experts for the week aggregate 4,440,160 bushels against 5,715,555 last week, 4,983,704 bushels last year. Corn exports, 291,781 bushels against 130,847 last week and 629,924 last year. Business failures for the week ending Nov. 13 number 205 as against 148 last

week and 213 last year. Canadian Trade. In Canada failures number 10 as against
