Dear Sir

It is perhaps inopportune to write to you now when I know you have so much work on hand, but we are in trouble (Political) here, and it is human you know, to wish to tell our troubles to some one. In this instance, I have chosen you as the subject for torture.

The trouble is this - At the recent municipal elections in this Township the Liberal Party has "gone to pieces", not a single grip from the rear down has been elected, and I am sure that the old fraud with much added ^{power} (powder) is imminent.

The mere political complexion of the Municipal Council would not mean much but the causes which led to the throw-down of the Liberal candidates will I fear produce results many times multiplied, against anything supported by the "Causes".
