The Canadian Engineer

is THE Journal of Engineering in Canada.

The following articles amongst others, appear in the February number now ready.

The Electric Furnace—its evolution, theory and practice. By Dr. Alfred Stansfield of McGill University.

The development of the Roe Puddling Process. By James P. Roe.

Systems in Industrial Establishments. By A. J. Lavoie.

The Cost Plus-a-Fixed-Sum-Contract.

Railway Dispatch Systems.

The S. & S. Variable Speed Countershaft.

A WEEKLY EDITION

The proprietors of the "Canadian Engineer" are satisfied that the time has come when the engineering interests of Canada should be served by a Weekly Journal, and have arranged to issue a weekly edition of the "Canadian Engineer," which has been so successful a monthly for the last thirteen years. The second weekly number appeared yesterday.

It is not desirable to issue every week a publication the size of the present monthly, which is largely in the nature of a review of engineering. The weekly "Canadian Engineer" will be practically a construction news edition that will give information and advertisements that become less useful by being held over for the monthly issue.

This week's issue contains amongst other features the following:

Appointment of Montreal Harbor Engineer.

Annual Dinner, Montreal Railway Club.

News Items from all over Canada.

Specimen copies will be sent on application. The subscription rate is \$2.00 per year, payable in advance.

February 16, 1907.

John I. Chartere
 Telephone M 420

TENDER

SEALED TENDERS for Supplies and addressed to noon on Tuesday, 19th March. Printed forms of tender articles and quantities required undersigned.

No tender will be received Patterns of articles may be seen.
