"What is the price of this, please?" inquired the woman, peering critically at the wave and feeling a coin between her thumb and first finger.

The new salesman hurriedly consulted the tag.

"Fifteen," he replied, with cheerful vagueness.

"Fifteen," murmured the woman, thoughtfully. "Um. It isn't very wide."

The new salesman surveyed the goods a moment with a frown. Then his face brightened.

"Madam, it isn't," he exclaimed, in a burst of candor, "but look at the length of it."

## Had Weak Back.

Would Often Lie in Bed For Days, Scarcely Able To Turn Herself.

Mrs. Arch. Schnare, Black Point, N.B., writes:—"For years I was troubled with weak back. Oftentimes I have lain in bed for days, being scarcely able to turn myself, and I have also been a great sufferer while trying to perform my household duties. I had doctors attending me without avail and tried liniments and plasters, but nothing seemed to do me any good. I was about to give up in despair when my husband induced me to try Doan's Kidney Pills, and after using two boxes I am now well and able to do my work. I am positive Doan's Kidney Pills are all that you claim for them, and I would advise all kidney sufferers to give them a fair trial."

DOAN'S KIDNEY PILLS are a purely vegetable medicine, realizing quick, permanent relief, without any after ill effects. A medicine that will absolutely cure Backache and all forms of Kidney and Bladder Disease.

Price, 50 cents per box, or 3 for \$1.25, at all dealers or The T. Milburn Co., Limited, Toronto, Ont.

to increase the life of the whitewash. If convenient, they should be added, but boiling is not essential where light coats are put on often as indicated above. When once understood, whitewash can be made and applied with little trouble, yielding a large return in the improved condition of the stable. Best satisfaction is obtained by keeping the mixture well agitated and making light applications."

Notwithstanding the author's criticism of more elaborate whitewash mixtures, we venture to suggest, on the strength of our experience, that a much better whitewash, one that will stick and not rub off, and that is very easily brushed on, even over rough-board surfaces, is prepared as follows:

Take one-half bushel of lime, slake with boiling water, make into a milk and strain through a fine sieve. Add to this a peck of salt, dissolved in warm water; three pounds ground rice, boiled to a paste and stirred in while hot; half a pound of whiting, and one pound of glue, previously dissolved in a glue pot over a slow fire. To this mixture add five gallons of hot water, stir it well, cover, and let stand for a few days. This mixture is best applied hot, with a brush, and a pint will cover a square yard.

## PRESENT TRAPPING VS. PIONEER TRAPPING

Contrary to the general belief there are more fur-bearing animals in Canada and North America now than there were a hundred years ago. And with the increased number of animals has come an increased number of advantages for their capture. While the march of civilization has taken away many of the hardships and dangers of pioneer trapping, it has greatly increased the profits of the business.

In the early days the trapper started out usually with a pack horse loaded with traps and supplies. He made his long tedious pilgrimage in the wilds to his trapping grounds to stay for a year or more. Sometimes he was successful in bringing in a good catch, other times his luck was bad; and many, many times he never returned from these lonely, treacherous expeditions. In those days the trapper and hunter were usually out for the bigger game, such as the bear, buffalo and similar kinds. The smaller animals, such as the mink, coon, muskrat and skunk were not sought for in most sections.

There is more trapping done now than in the pioneer days for several reasons: Strange as it may seem, there are more fur-bearing animals to-day than there were a hundred years ago. It is a fact well known in the fur trade that fur-bearing animals of certain kinds increase with civilization up to a certain point. The principal reason is on account of the increased food supply for these animals, as they live on products of the farmer and ranchman and have cunning means of protecting themselves by keeping under cover in holes and otherwise.

Another reason for the increased interest in trapping is that the trapper of to-day has improved methods, such as perfected traps and irresistible baits and scents that draw animals to their traps in spite of all their wiles and cunning. Then, too, the high prices that furs bring nowadays makes the occupation of trapping a very profitable one, even for the man who devotes only part of his time to the business.

Many people not familiar with trapping are of the opinion that there are only a few kinds of furs that have a value. While the facts are, all kinds of furs and skins have a market value—and in most cases they bring high values. The skins from the raccoon, mink, skunk, opossum, beaver, otter, muskrat, foxes, wolves, lynx, marten and even the pelt of the humble domestic house cat is in demand and at better prices than they have ever been known to reach.

With the increased number of fur-bearing animals, the added facilities for their capture and the alluring prices paid for their skins, the trapping business to-day is not to be compared with the trapping business in pioneer days. Instead of trapping being a trade of the past, as many people believe it is, it's a trade of the present and the future.

## Here Is Strength

With strength and health as the sole foundation, many a man has built fame and fortune. For lack of it, many a budding genius has passed into oblivion, many high hopes have been shattered, many hours of misery spent. The world is full of half-sick, half-well, half-successful men, any one of whom could become a power in life with vigorous strength as a fundamental asset—could find happiness where he now sees nothing but gloom.

## I CAN RESTORE YOUR STRENGTH

There is no medicine, no mystery, no magic in my treatment. It is founded on the great basic truth that electricity is the motive power of the human body, and that effort causes an expenditure of this power.

Success is possible in this world to any man who has the energy to strive for what he wants. A man without strength has no inclination to work. The vital energy of the human body is electricity. This has been proven. The way to become strong, to keep strong, and to stimulate ambition is to give your body a charge of electricity every day giving you a good reserve fund of vitality to draw on.

The newest device for electrifying the human body is the Dr. Sanden Hercules Body Battery, composed of series of cells arranged in the form of a girdle, to be worn comfortably about the body at night while you sleep. It is the most convenient, most comfortable, and most effective means of applying galvanic electricity for curative purposes.
