GIRL FOUND IN GLOVER'S HOME About 14,000,000

Hattie LeBlanc Nabbed NO TRACE OF Night

Suspicions of Undertaker Who Laid Out Victim Aroused

Girl Under Arrest Belongs to Arichat, Cape Breton

WALTHAM, Mass., Noc. 23.- Miss Hattie LeBlanc, the seventeen-year- to imagine a more heart-breaking task old domestic who was accused by than that which Mr. H.C. Read, father Clarence F. Glover, her employer, in an ante-mortem statement with shooting him, was found tonight in the Glover home, where the funeral of the dead man was held during the afternoon. Taken to the police station, the girl was questioned and then formally

placed under arrest. Since the shooting in Glover's laundry, Saturday night, the police have been searching extensively for Miss LeBlanc until tonight.

The attitude of Mrs. Glover in refus ing to visit her husband when he was making inquiries by telegraph, teledying in disclaiming relationship with phone and in person, all, so far, howthe LeBlanc girl, although the latter's ever, without avail sister claimed they were cousins and in refusing to submit to a police in- this morning, states that Hervert C. terview, had caused the authorities to explanation from her. A search of her house, in which Miss Le-Blanc was found, resulted tonight.

suspicions of an undertaker, aroused by something he had seen or heard in the house while laving out the dead body, and communicated to the police, led the authorities to search the Glover house for the girl Mrs. Glover was not consulted. It was in a room on the first floor of the house, entirely apart from the flat which the Glovers occupied on the second floor that the girl was found. Mr. Glover had used this room solely during his life. The other rooms on this floor are occupied by a minister

and his family. Laid prostrate and close against the wall, the police found the girl under the only bed in the room. She shrunk away as they probed, but when they grabbed her dress unknowingly, she could not pull or run and was forced to come out from under the hed Questions could not intelligibly be asked or answered between the young woman or the police, as she spoke very little Without informing Mrs. Glover in a room above of their discovery, the policec hurried the girl to e police station. Then a watch was set around the house.

At the station, beginning shortly after 9 o'clock, the girl was put through an exhaustive questioning an interpreter was necessary, making the inquiry a laborious one. There were present Mayor Edward A. Walker. who had employed a sister of Miss LeBlanc, his stenographer, the interpreter, and several police officials They were still closeted at midnight. and this country only fifteen months, seen a young fellow on Saturday afcomig here from Arichat, C. B., the stated, together with her sisters, that latter disclaimed any relationship She has many relatives in Massachusetts, all of the same general family, although some have changed their French name to its English equiva-

False Clues in Read Mystery

MISSING MAN

TWO DISPOSED OF

Heart - breaking Task Set Before Father of Young Man

MONTREAL, Nov. 23-It is difficult of Herbert Read, the missing M. Gill College graduate, has set himself, in the search for his son. As the fact of young Read's disappearance becomes known, clues of all sorts, possible and impossible, begin to come in. Scarcely knowing which to follow up, and torn by the desire to take that most likely to bring immediate results, the father is proceeding to 11:vestigate every story, in his endeavor to clear up the mystery, and from early morning until late at night he is

- A despatch from Fredericton, W. P. Read was a pasenger from Montreal by the C. P. R., on the evening of Friday, November 12, and struck u. friendship on the train with a red P. Colter, of the local customs house staff, at Fredericton, who happened to be a passenger also. Mr. Real the despatch says, had a pass through to

Sackville Mr. H. E. Bates, of the Quebec Bridge Company, who was the last man to see Read, and who was with him most of the time he was here, stated this morning that as far as he knows, the missing man had no pass on the C. P. R. "He always travelled by the inter-

colonial," he said. "Never by the C. P. R. unless he had to." This afternoon Mr. Bates learned that there is another young civil engineer by the name of Read in Sack. ville, who is employed by the C. P. R.

and it was probably he who was re ferred to. This despatch from Fredericton this morning aroused some uneasiness in the father's mind owing to a talegram which he received recently from St. Stephen, N. B., to the effect that young man, about 28 years of age, was in charge there in a demented condition. The particulars given, however,

were not very complete. What was thought to be a clue on to thew hereabouts of Herbert Read, was brought in this morning by Jos. H. Hawkins of 655 City Hall avenue. He said that his daughter, Miss Florence Hawkins, had known Read well in his college days, and had seen him on Prince Arthur avenue last Saturday afternoon, apparently bergaining for a cab. Miss Hawkins wa sinterviewed Miss LeBlanc has been in Watham by a reporter and stated that she had home also of Mrs. Glover. She had at a party, but she did not know his Mrs. Glover was her cousin, but the He was a McGill College student and the picture somewhat resembled him, so she thought it might have bee Read. He and a friend of his, she said. belonged to a social club called the Elite Society. She did not know whether the name of the man she met, and whom she saw on Saturday, was Read

HE HAPPENED TO SEE AN AD. H. E. Bates states positive. Read did not belong to any collety called the Elite during his college days. socially at all.

GOVERNMENT LANDS

MAKE HIGH PRICES

Selling Now at Thousands Which Five Years Ago Made Hundreds.

VANCOUVER, B.C., Nov. 28 .- Selling for thousands of dollars per acre, where five years ago figures were in hundreds, three quarters of a million dollars worth of property have been disposed of at the government auction of Point Gray lands, adjoining the western limits of the city. Another million dollars worth is expected to go at once, and another half million be fore long, according to an estimate by Trites and Leslie, the vendors for the government. A great proportion of the government lands went to Winnipeg people, and residents of Saskatchewan and Alberta, who made their purchases through brokers. Five year's ago prices ranging from two to five hundred dollars an acre were paid. Today a sin-gle acre sold as high as \$5,250. The government still has 1,300 acres in the district, which is estimated to be worth more than enough to pay for the total bonded indebtedness of the Province of British Columbia,

NO DANGER TO EARTH FROM HALLEY COMET, FATHER SEARLE'S OPINION

Miles Away

SOME PHENOMENA

World Pretty Certain to be in Tail of the Comet Next

NEW YORK, Nov. 23.-Just how close to the earth the much discussed Halley's comet is going to get on its travels is told in a statement made today by the Rev. Father George M. Searle, supervisor general of the Order of Paulist Fathers in this city. Father Searle, who is acknowledged to be an authority on astronomy and mathematics, scoffed at the idea that either the nebulae or the tail of the comet -would come in contact with the earth.

According to predictions made recently the Halley comet is likely to strike the earth , enveloping it with gaseous and material substances. While Father Searle admits that the earth and the comet may be near enough together so that some phenomena may occur, he declares it impossible from any gaseous or matchial substance to penetrate the atmosphere. The prediction made by Father Searle is as follows:

"The nearest approach of Halley's comet to the earth will be very nearly at the time (the night of May 18) when t comes between us and the sun. It will then be about fourteen million miles away. As the coma or head will be hardly a million miles in diameter, at the very outside possibility, there is no danger whatever of our coming in contet with it.

"It is now extremely probable, according to my own calculations, that it will come directly between us and the sun; probably at about midnight of our time. Of course we cannot see of our time. Of course we cannot see the phenomena here, but it may be the phenomena here, but it may be the earth passed through one was in Harvard Observatory. In 1868 he joinvisible in Europe and Asia, also in the 1861, and it was not until we were ed the Paulist Fathers, and was or-"We shall pretty certainly be in the

ticed, but there is no probable serious danger. "Possibly some magnetic or electrical phenomena may occur, but any
