LOCAL SUMMARY.

ATHENS AND NEIGHBORING LOCALITIES BRIEFLY WRITTEN UP.

Events as Seen by Our Knights of the Pen: Local Announcements

Miss A. Kincaid is visiting friends in Brockville.

Forty-two factories send cheese to Brockville over the B. & W.

Miss H. Rowsome, of Wiltstown, returned to Brockville on Saturday.

Mrs. (Dr.) Hart is visiting friends at Union Park, on the St. Lawrence.

Mr. and Mrs. H. H. Arnold left Athens on Friday last for the World's Fair.

Miss J. Jordan, of Westport, and Mr. Empey, of Addison, will attend the Ottawa normal school this term.

Carriages built to order, repairing and painting done in first class style at moderate prices.—A. J. James.

The hunting season opens on Friday next. Duck, quail and black squirrels promise to be an average crop.

Mr. B. J. Saunders, of Brockville, has gone to the Nepean River district to survey a township for the Ontario government.

Thompson Bros., the cheese men, are said to be in business again under the name of "The Union Produce Company."

Mr. Madden, of Kingston, buyer, is said to have been in this district last week offering to contract for July, August and September cheese at 10c.

Only 2549 cheese were registered on the Brockville board on Thursday. Of these, but few were sold. White brought 9¢ and colored 9¢.

Colored cheddar sets—pink, brown, blue and grey—only \$2, and full dinner sets in all the new colors for \$6.50, at Chas. Hall, Brockville. T. W. DENNIS.

F. W. French, first assistant in Pembroke high school, signed an agreement to return after the holidays. He accepted another situation, and now the matter is to be brought before the Minister of Education.

Buyers have begun negotiations with owners of gentian root properties for a supply of the root for the American market. The crop will be ready for shipment in September. The price will not be as high in New York this season as it has been in previous seasons. It once sold as high as \$7 per lb. in that city, but is only worth \$2.70 per lb. now.

An exchange tells of a fellow who every time he goes on a spree insists on paying a year's subscription to his town paper. He has already paid for his paper to January 1st 1929. Efforts will be made at the next press convention to ascertain the brand of whiskey that fellow is drinking, in order that it may be more generally placed on the market.

Newspaper advertising is ahead of every other method. There is nothing lasting about signs painted on fences. There is little that is impressive about the sandwich man. A page in a pamphlet which is opened but once and then laid aside is no good. The newspaper is ever before the people. Its contents—advertisements and all—are read and discussed, and it is a well known fact that the reader puts more faith in the statements made in the advertising columns of a reputable paper than in what they see elsewhere.

Military.

Miss A. Hanna will be found, personally, in her place of business after August 28th.

\$50.00 Prize.
Given by the BROCKVILLE BUSINESS COLLEGE at the Delta Fair. Send for particulars to Gay & McCord, Brockville, Ont.

Backward Turn Backward.
Some poor dyspeptic evidently, waits out his anguish in this way: Backward, turn backward, oh! I'm in thy flight, feed me grub again just for to-night; I am so weary of sole leather stako, petted doughnuts and volunteer cake, oysters that sleep in a water bath; butter as strong as Goliath of Geth; weary of paying for what I can't eat; chewing up rubber and calling it meat. Backward, turn backward for worry I am! Give me a whack at grandmother's jam; let me drink milk that has never been skimmed; let me eat butter whose hair has been trimmed; let me once more have old-fashioned pie, and then I'll be willing to curl up and die.

The Whig says that G. G. Pablow, inspector of the eastern Ontario dairy-men's association, unexpectedly paid a visit a few days ago and made himself acquainted with two patrons of Maple Grange cheese factory, located at Spring Valley, suspected of skimming and adulterating milk. They acknowledged the offense and were assessed \$22.50 each, which they paid.

Church Anniversary.

The fifty first anniversary of the Methodist church in Athens, will be held on Sunday and Monday, Sept. 3rd and 4th.

On Sabbath, 3rd Sept., two sermons will be preached at 10.30 and 7 by the Rev. John Scanlon, the popular and efficient pastor of George street church, Brockville. A special collection at the close of each service.

"Wisdom and folly in home life" is the subject of the celebrated and popular lecture to be delivered on Monday evening by the Rev. C. O. Johnson of Kingston, Ont., who is one of the most original and talented speakers in the Dominion.

A new departure is observed in the admission to the lecture. The lecture will be free to all, and all are most cordially invited. No entrance fee, no tickets, but an opportunity will be given at the door, for those who have not already contributed to the funds of the anniversary—to give what they please. Don't miss this great intellectual treat.

Card of Condolence.

Rising Sun No. 85 A. F. & A. M. Aug. 24th, A. L. 5898.

Dear Mrs. ARMSTRONG,
We the officers and members of Rising Sun No. 85 A. F. & A. M., desire to express our sympathy with you in this your hour of great affliction. The death of your beloved husband has removed from our circle a brother whose constant aim was to promote the welfare of our order and the prosperity of the community.

Your cares and sorrows are remembered by brethren who for many years labored with him who can no longer minister to your wants. May the Gracious Giver of all Good enable you to sustain with fortitude your heavy burden! May the Most High God be to a husband to the widow! And, may we all so live that when the Gavel of Death calls us from our earthly labor, we may enter into that Everlasting Rest prepared for the faithful laborer in the Master's vineyard.

Signed on behalf of the Lodges by
Wm. JONESTON,
J. B. SAUNDERS,
M. L. DIXON.

Lynchburg Fair.

Following is a list of the judges for the annual fair of Rear Leeds and Lansdowne Agricultural Society, to be held at Lynchburg on Sept. 21 and 22.

Class A, Horses—Henry Mulvaugh, Lansdowne; John Hudson, Seely's Bay; Sheldon Bullis, Athens.

Class B, C, D, and E, Cattle—John Cook, Warburton; Charles Rowsome, Athens; John Bower, Seely's Bay.

Class F, Sheep—West Johnson, Morton; Robert Gardner, Seely's Bay; Torrance Soper, Delta.

Class G and H, Swine and Poultry—Alexander Wood, Lynchburg; Marsh Ripley, Elgin; Wm. Dunn, Sweet's Corners.

Class I, Grain—Wm. Green, Oak Leaf; Richard Harvey, Lynchburg; John Con, Morton.

Class J, Vegetables—McMillan Steacy, Warburton, Janes McMillan, Ellenville; Uzeby Kendrick, Soper.

Class K, Dairy—Andrew Grey, Morton; Wm. Bracken, Ellenville; Col. Barlow, Delta.

Class L, Manufacturers—Alex. Stevens, Delta; D. Fisher, Athens; L. Sly, Morton.

Class M, Domestic—Mrs. John Gibson, Lynchburg; Mrs. Asa Wing, Lynchburg; Omer Brown, Delta.

Class N, Ladies' Work—Mrs. R. J. Green, Mrs. Preston, Seely's Bay; Mrs. Jos. Barlow, Delta.

D. W. GREEN, Sec'y-Treas.

Wounded, Hungry and Alone.

Newborn Standard: Great excitement prevailed in the village this week over the disappearance of Wm. French, author of "Visions of Hell and Heaven." French left last Monday morning in an old punt and was caught up Mid Lake on a fishing excursion. Wrapped up in his thoughts of better things he rowed on regardless of time, and at noon found himself in Indian Lake. Feeling hungry he landed on an island situated in reeds and grapes. He climbed a tree to secure some of the luscious fruit, but missing his hold in some way he fell to the ground injuring his back very severely. He managed to crawl back to the landing place, but to his great dismay found his boat had broken loose and drifted down the lake. This left him without any means of escape, and as the island was out of the line of travel, the prospect of getting away from it seemed hopeless. As a last resort he took a large piece of birch bark and writing upon it his whereabouts, cast it out upon the water. After two days it was picked up by some campers and brought to his father, who immediately went to his rescue. He found him lying on the island in a stupor and unable to speak. With great difficulty he got him into his boat and brought him home. He is now progressing favorably and will probably be able to resume work in a few days.

English Spavin Liniment removes all hard spots or bony Lumps and Blisters from horses, Blood Spavin, Curbs, Splints, Ring Bone, Sweeney, Stiffles, Sprains, Sore and Swollen Throat, Coughs, etc. Save \$50 by use of one bottle. Warranted by J. P. Lamb.

RHEUMATISM CURED IN A DAY—South American Rheumatic Cure for Rheumatism and Neuralgia radically cures in 1 to 3 days. Its action upon the system is remarkable and any case of Rheumatism, no matter how severe, and the disease immediately disappears. The first dose greatly benefits. 75 cents. Warranted by J. P. Lamb.

Avoid All Injurious Health.

Tea drinking is an injurious habit, and nervous people should be careful in the use of it. It is not a food, it is a tonic, and if drunk strong it may be as harmful in its effects as brandy would be. Anyone who feels as if they were a bundle of nerves should give up both tea and tobacco, and use Membray's Kidney and Liver Cure, which will help them to exist in comfort without them.

SUSPENDED ANIMATION.

How an Indian Fakir Remained Buried Alive For Ten Months.

Andrew J. Seymour, whose scheme to be buried alive and remain under ground while a crop of barley is grown on his grave has attracted a good deal of attention lately, is a phrenologist and mind reader. He is said to possess the power of directing himself into a state of catalepsy at will and of determining the length of that condition, but he has never before tried the experiment.

ANDREW J. SEYMOUR.

perment of being buried alive. That the plan is practicable is alleged by travelers who claim to have seen the thing done by Indian fakirs.

Captain Osborne, a British army officer, is his work entitled "The Court and Camp of Rungeet Sing," gives a circumstantial account of a fakir who had the extraordinary power of suspending his animation for a great length of time.

According to a story which he told, a fakir who had been preparing for the purpose by order of the maharajah.

Captain Osborne tells us that on the appearance of Rungeet and his court he proceeded to the final preparation of the small dead box, which was also locked and sealed. The box was then placed in a vault, the earth thrown up on over the spot and sentries placed around it.

The maharajah, however, very skeptical on the subject, and twice in the course of the ten months that the fakir remained under ground he sent messengers to see when he was found to be in exactly the same position and in a state of perfectly suspended animation.

At the termination of the ten months Captain Wade, another British officer, accompanied the fakir to the vault and examined the box personally and minutely and was convinced that all animation was perfectly suspended.

He saw the box opened and the seals broken by the maharajah and the box brought into the open air. The man was then taken out, and on seeing his wrist and heart not the slightest pulsation was perceptible. The first thing toward restoring him to life was the forcing his tongue back to its proper position, which was done with some little difficulty by a person wearing a mask and holding up his head and continuing to hold it until it gradually resumed its natural place. Duck and water were poured over his head and he was considerably heated, but all other parts of the body were cool and healthy in appearance.

A quantity of warm water upon him constituted the only further measures for his restoration, and in two hours' time he was as well as ever.

This is only one of many testimonials on record in books of Indian travel to the same effect.

CONJURING EPILEPTICS.

A Queer Kind of Faith Cure Practiced by Hecker's "Epileptics of the Middle Ages" record the success of the most extravagant absurdities prescribed for such disorders as the violent sickness and St. Vitus' dance, but the crucial test for the sincerity of the patient's faith was the ordeal of the flagellants, who roamed from town to town.

A summer coat for wear on cool days and evenings is made of black English serge, open, and turned back in front with either the white or colored buttonhole silk revers.

The statement that very many new openwork and embroidered white silk stockings were included in Princess Mary's trousseau is doubtless much toward giving this fashion a fillip.

There is a sudden revival of all the rich and delicate shades of Coon, Marton, chestnut, vanilla, etc., through the many handsome hair tones, to beige, fawn and pale amber browns.

A summer coat for wear on cool days and evenings is made of black English serge, open, and turned back in front with either the white or colored buttonhole silk revers.

The coat is tight fitting in the back. Belted round waist, single breasted or in double-breasted fashion, with plainness and revers or yoke and girdle, are in the height of fashion, being this season almost as greatly favored by tailors as by the dress makers.

Embroidered French muslins, with delicate flower borders, are made into youthful looking evening dresses, hooded behind, the dainty borders forming a yoke and edging the round, full empire skirt either in bands or in delicate folds.

Many of the plainer English serge and hosiery goods made by the best of tailors are simply finished by two or three rows of stitching and the revers the fancy silk shirt waist for the only touch of decoration at all. Brightness about the dress.

White dresses show touches of deep color here and there, and airy textures are often used as a transparency to throw a creamy line over rose pink, corn yellow and willow green, with now and then a soubonnet provided by a toilet of black gauze, net or lace—New York Evening Post.

The Victoria cross, which we often read of having been conferred upon some British soldier for conspicuous bravery, is of the Maltese form, made from Russian cannons captured at Sebastopol.

SCIENTIFIC SCRAPPS.

One of the lost arts is the manufacture of malleable glass.

One of the most wonderful discoveries in science that has been made within the last few years is the fact that a beam of light produces sound.

The action of the food, mixed with the oxygen of the air, furnishes fuel for the body, which evolves the heat in exactly the same way that a fire or candle does.

The learned Dr. McKitterell, in his article on the rapidity of thought, says that it requires one-thirtieth of a second for the brain to distinguish between red and blue.

Jupiter's satellite is double—in other words, what has heretofore been taken for a single moon is indeed two moons—a large and a small one—the lesser slowly revolving around the greater.

Wanted.

Agents to sell our choice and hardy Nuremberg stock. We have many new special varieties in fruits and ornamentals, to offer, which are controlled only by us. We pay commission or cash on sale at once for terms, and secure choice of territory.

MAY BROTHERS, Nurserymen, Rochester, N. Y.

Charleston Lake.

Two or three well furnished rooms at Idle White cottage can be rented for the week. Use of kitchen, cooking utensils, wood, and bathware included. Rent, \$10.00 per week. Address, R. C. PHILLIPS, Athens, June 12th 1928.

Scientific American Agency for PATENTS

CAVEATS, TRADE MARKS, DESIGN PATENTS, COPYRIGHTS, etc., secured for inventors by the Scientific American Agency for Patents, 415 Broadway, New York City. For information and free literature, write to the Scientific American Agency for Patents, 415 Broadway, New York City. The agency gives free of charge to the inventor a complete examination of his invention and a full report on its patentability. The agency also gives a full report on the value of the invention and the best method of securing a patent therefor. The agency also gives a full report on the best method of securing a patent therefor. The agency also gives a full report on the best method of securing a patent therefor.

ANNALS OF THE LAW.

1793—The judicial system of the United States established, with John Jay of New York as chief justice.

1795—Fidel, by jury instituted in France. Established by several subsequent constitutions.

1796—The Battleground of South Carolina appointed chief justice of the United States supreme court.

1798—Oliver Ellsworth of Connecticut appointed chief justice of the United States supreme court.

1800—The first general auxiliary laws on record put in operation in France.

1805—The publication of the Code Napoleon, the civil code of France, was begun and completed in 1810. It was prepared under his supervision by the most eminent lawyers and comprised the best features of 400 previous codes.

1810—The last execution for high treason in England. Two British subjects were executed in French uniforms, were tried, hanged and beheaded.

1817—The famous Dartmouth college case, which the law respecting the power of the state over corporations was established.

1819—Courts of honor instituted in Belgium and other continental countries to prevent dueling.

1819—The right of the accused to trial by jury of twelve men, from the statute books, a case having occurred in the previous year in which it was claimed, and by reason of the refusal of the challenged jurors to accept the challenge the accused party was acquitted.—St. Louis Globe-Democrat.

WHIP AND SPUR.

Saldin drew a 48 pound fence snail when he made his record of 3894.

Delmar, 2114, and J. E. 2244, are new members of the club.

It is reported that Mand S. and Bunt will be handled this year by Charles Marv.

It is reported that Charles Reed contemplated founding a breeding stud in California.

This season's purse and stakes through the grand circuit took up over \$500,000 for nine weeks' trotting.

Eleven thousand four hundred horses were imported into the United States in 1927 at a total cost of \$2,736,000.

The pacing mare Crick, 210, is to be bred to Direct, 2244, and the produce will be the fastest "crack" on record.

Mr. Platt, the English turfman, paid \$24,000 for Kendall. His owner has taken the precaution to insure his new purchase.

Misses Girl, 220, by Chimes, will be a good one in the 4-year-old events this year. She has stepped a mile in 2:14 1/2 in her work.

In England as far back as 1849 an act of parliament made it compulsory for men of wealth to keep trotting stalls for the public good.

"I would rather get a square trotter that could not show a better snail than \$50 in preference to a mixed snail of one \$20 speed," says a prominent breeder.

The heading of the Alexandra Trotting club of England is a handsome inscription on a stone tablet, and the motto underneath, "Nil desperandum."

It is said that William Waldorf Astor and on the words "Nancy Hanks, 254," and the motto underneath, "Nil desperandum."

THE PROPER CAPER.

Delicate suits prevail largely where the devotees of fashion congregate.

Novel French skirts are shaped with many gorges, then gathered front and back, but left with a plain smooth gore at the side.

The statement that very many new openwork and embroidered white silk stockings were included in Princess Mary's trousseau is doubtless much toward giving this fashion a fillip.

There is a sudden revival of all the rich and delicate shades of Coon, Marton, chestnut, vanilla, etc., through the many handsome hair tones, to beige, fawn and pale amber browns.

A summer coat for wear on cool days and evenings is made of black English serge, open, and turned back in front with either the white or colored buttonhole silk revers.

The coat is tight fitting in the back. Belted round waist, single breasted or in double-breasted fashion, with plainness and revers or yoke and girdle, are in the height of fashion, being this season almost as greatly favored by tailors as by the dress makers.
