THE FARMERS' INNINGS

A Good One Before the Tariff Commission in Toronto.

What Representatives of the Farmers' Association and the Dominion Grange Demanded—The Vegetable Growers' Plea—Boons Asked For In Several Branches of Manufacturing Industries—Soap Men Want Free Cotton Seed Oil.

Toronto, Nov. 14.—Members of the Farmers' Association and the Dominion Grange had a good innings yesterday, on the occasion of the first session of the Tariff Commission, held at the Board of Trade, and those who spoke on behalf of those bodies presented the facts lucidly. The commissioners present were Hon. W. S. Fielding, who presided; Sir Richard Cartwright, Hon. William Paterson, Hon. L. P. Brodeur and Hon. Sydney Fisher, with Secretary John Bain. The net result of the representations made by various bodies yesterday may be summed up as below:

By the Farmers.
A maximum tariff not higher than the present average tariff.
A considerable lowering of the minimum tariff.

A substantial preference to send farm produce to England.

By Vegetable Growers.

The vegetable growers desire a protective duty on stuffs from the States.

By the Manufacturers.

Manufacturers of baby carriages want relief from the duty on reeds and other materials not made in Canada.

The soap manufacturers seek relief from the toll on cotton seed oil.

Men's clothing manufacturers object to any advance on the duty on British wools.

Wicker basket manufacturers want protection against outside goods, and allege that foreign baskets are prison made.

Lithographers ask for better discrimination on articles that are dutiable.

Alphedut Manufacturing Co. want relief on products of manufacture.

NORSE VOTE FOR KING.

Prince Charles of Denmark Gets 233,935 Votes—Republicans Get Only 21 Per Cent.

Christiania, Nov. 14.—At 2 o'clock this morning the returns of the plebiscite were still incomplete, but no change in its main features is now possible.

The results in 518 constituencies show 233,935 votes in favor of Prince

NEW KING OF NORWAY.

Charles of Denmark as King of Norway and 62,739 against him. The Republicans expected to poll 33 per cent. of the votes, but only obtained 21 per cent.

After midnight a great crowd cheered Premier Michelsen and President Berner of the Storting. The Premier addressed the people from a window of the palace and congratulated them on the result of the plebiscite.

STRIKE IN FRENCH DOCKYARDS.

Employees In Various Naval Headquarters to Quit Work To-day.

Paris, Nov. 14.—The union of the Government employees of the arsenals and dockyards at Toulon, Brest, and other naval headquarters, has ordered a general strike beginning to-day.

Military forces are being concentrated to preserve order at the ports.

The strikers claim that liberty of speech is denied them by the dismissal of workmen who criticize the naval administration.

The federation of Government employees has issued an appeal to the employees of the post and telegraph department, the mine, military arsenals and tobacco and match and other state industries to give their moral support to the naval strike.

NEW JAP LOAN.

An Immediate Issue of \$250,000,000 at 4 Per Cent.

London, Nov. 14.—The Associated Press is informed that the Japanese Government has decided to issue immediately a new foreign loan of \$250,000,000 at 4 per cent. which will be used partly for converting the external six per cent. loan and partly for the redemption of the internal loans.

It is understood that France will participate to a considerable amount, the Rothschild's Paris house being the issuing house there.

The exact rate of issue has not yet been decided upon.

Condemn the Indemnity Increases.

Port Hope, Nov. 14.—At the annual meeting of the Port Hope Conservative Association last night, a resolution was unanimously passed against the recent increase in members' indemnities and the pensions to ex-Ministers.

Cuban Budget.

Havana, Nov. 14.—The budget for the year beginning July 1 next has been submitted by President Palma to Congress. It estimates the receipts at \$23,000,000 and the expenses at \$21,500,000.

TALES OF TAMAGNO.

Some of the Great Singer's Peculiarities In Money Matters.

Despite the fabulous sums Tamagno received the great singer had a reputation for extreme parsimony. When staying in Moscow he noticed that the waiters in the hotel furnished him daily with fresh candles, although the old ones had been barely used. This vexed him, and, seeing that remonstrances were of no avail—the candles, he learned, formed a waiter's perquisite—he began to collect the candles himself. On leaving the hotel he gathered up the whole collection and distributed them among the waiters when they lined up to receive their tips.

Tamagno's one interest of the stage was his only daughter and her children. It was for her that he hoarded his wealth, which she appears to have feared might slip away. With his daughter near him, however, he kept open house at his villa in Varese, near Milan. Once, in St. Petersburg, he dispensed a fee of 3 francs for the forwarding of a telegram, but on hearing that his daughter was ill he left St. Petersburg and 40,000 rubles (\$20,400) to hurry to Milan.

In a Berlin hotel, after appearing in "The Prophet," for which he received \$1,250, he ordered for his supper two poached eggs and a bottle of mineral water. Eventually he drew from one of his pockets a bottle of wine, some of which he poured into the mineral water. It was a bottle which he had contrived to secrete at a banquet given in his honor two days before in Prague.

Backed up by over a third of a century of remarkable and uniform cures, a record such as that of Dr. Pierce's Favorite Prescription is unique in the history of medicine. No other medicine than Dr. Pierce's Favorite Prescription could possibly "win out" as the saying goes, on such a proposition. But they know whereof they speak. They have the most remarkable record of cures made by this world-famed remedy ever placed to the credit of any preparation, especially designed for the cure of woman's peculiar ailments.

"I believe that I suffered from every disease that any overworked, run-down woman could," writes Mrs. Ida Martin, of Berry, Ky.; "was not able to do anything. Could not get one good night's sleep. Suffered from womanly trouble through change of life, a disordered liver and trouble with my heart. I suffered excruciating pain in breast and shoulders. Had no appetite. I took Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery,' and they did more for me than all the medical treatment that I have ever taken. All suffering women should take Dr. Pierce's medicines and be healed."

How to preserve health and beauty is told in Dr. Pierce's Common Sense Medical Advice. For a paper-covered copy send Dr. R. V. Pierce, Buffalo, N. Y., 31 one-cent stamps to pay customs and mailing only; cloth binding 50 stamps.

TO BE SECRET FOR YEAR

BEHRING'S CURE FOR CONSUMPTION AND WHY HE SO DESIRES.

Hope Expressed That "White Plague" May Be Stamped Out in Civilized Countries—Prof. Von Behring Was the Discoverer of Diphtheria Antitoxin, and Spent \$40,000, Amount of Nobel Prize, in Experiments.

"If the present knowledge concerning the means of preventing tuberculosis were generally applied, it is safe to say that tuberculosis would be stamped out of civilized countries within twenty-five years." So declared one of the delegates to the International Tuberculosis Congress at Paris, at which Professor Emil von Behring announced his cure for tuberculosis. Dr. Flick lays more stress upon proper alimentation and plenty of open air and exercise in the cure of tuberculosis than he does upon a specific remedy for the disease, but he and other conservative physicians express hope that Professor von Behring's discovery will prove of great value in the treatment of consumption. His claim that he has found a real consumptive cure may inspire the more confidence because it was he who discovered the anti-toxin now used so widely and successfully in the prevention and cure of diphtheria. In giving to the world this remedy for dreaded diphtheria he conferred a great

PROF. EMIL VON BEHRING.
benefit upon mankind. The debt of the world to him would be heavy indeed should his consumption cure prove as successful as expected, thus making it possible to write down to his credit two of the most important discoveries of the age in the world of medicine.

There has been some criticism of Professor von Behring because of his announced intention of keeping the character of his consumption cure a secret from the world at large for a year in order that he may reap pecuniary benefit from his discovery. In explanation of this course it is stated that his experiments in the prosecution of his researches have been very costly. He is a poorly paid scholar of Prussia, receiving from the Government an allowance to enable him to prosecute his studies. It takes every cent he can get to carry them on. In 1901 he received the Nobel prize of \$40,000 for the discovery of a vaccine for the immunization of cattle from tuberculosis. It is said that every dollar of this sum went toward his expenses in making experiments. In withholding for a time the secret of his anti-toxin for diphtheria he was able to make money to apply in the same way. It is also urged in explanation of his course that he desires to keep the use of the cure under his own observation for a time in order that confidence in its value may not be impaired by premature general use. Representatives of the professor say that the new cure will be ready for the general public by next August; that it will then be cheap, so that any physician can obtain it, and that special rates will be made to philanthropic institutions and to the poor. A wealthy citizen of New York has offered Professor von Behring \$50,000 if he will announce the secret of his cure at once. He suggests that this be made a part of a fund to be contributed to the Paris physician, and the only qualification to the offer is that the treatment must first be pronounced successful by a committee of competent medical men. There is talk in Paris of making up a popular subscription to reimburse the professor if he will make his cure public, and it is said if the remedy is a success he will come into possession of an income of 40,000 francs from the Prix Lacaze reserved by the French academy for the conqueror of tuberculosis and will also get 10,000 francs set apart for the same purpose by a wealthy Brazilian.

Professor von Behring was born in 1854 at Hansdorf, Prussia; studied medicine in Berlin and in 1880 became an army surgeon. In 1884 he was appointed a professor at the University of Halle. He was called in 1885 to become director of the Hygienic Institute at Marburg. He is now a professor of the University of Berlin and a personal friend of the Kaiser and lives on a large medical farm near Marburg. The farm comprises some 400 acres, and on it are about 400 cows and several hundred horses and other animals. It is said the enterprise requires for its support about \$30,000 a year. His experiments have already accomplished a great deal in the direction of eradicating bovine tuberculosis, which, according to the opinion of those at the recent tuberculosis congress, is transmissible to the human species.

In Germany systematic methods for inoculation of cattle to prevent the spread of the disease among such animals have been for several years in process of introduction.

Sheep Notes.

Dried blood is said to be a reliable remedy for scours in calves. Why not the same trouble in lambs?

It is safe to say that no branch of farming shows better returns for money invested and labor applied than that of sheep farming, provided it is run on systematic business principles.—American Sheep Breeder.

Peninsular RANGES
Make Baking Easy and Save Fuel.

Fire box is OVAL—no dead corners—no dead ashes to heat.
Sheet fine construction insures quick, even heating of all parts of the oven.
Oven is almost square, with STEEL bottom and ends.
Perfect VENTILATION of oven prevents soggy baking.
Direct draft slide dampers give absolute control of fire.

The "Peninsular" Ranges are made in all sizes from plain 4 hole ranges, to richly nickeled 6 hole ranges with closet and reservoir.
Your stove man probably has a full line of Peninsular Ranges. If not, let us know and we will send you our handsomely illustrated catalogue and the name of the nearest dealer handling Peninsular Stoves and Ranges.

Blueberry Betty.
Remove the crust from slices of stale bread. Put the bread spread with butter into a pudding dish in layers, alternating with blueberries. Sprinkle the blueberries with sugar, a little salt, and, if desired, a dusting of nutmeg. Have generous layers of blueberries. Squeeze over the whole the juice of a lemon or add half a cup of water. Cover the dish and let bake until the berries are tender, then remove the cover to brown the top. Serve with cream and sugar.—Boston Cooking School Magazine.

Melon Fritters.
When melons are not ripe enough to eat raw they are very good converted into fritters as follows: Pare the melon, remove the seeds, then cut into circular slices, dip into fritter batter and fry in deep fat until a delicate brown; then dust with fine sugar and serve hot.

You can make people believe in you by pretending to believe in them.

A gift generally costs more than a thing you pay cash for.

Cause of Headaches

EVERY woman who has stewed and fretted and worried at a hot oven door, shifting a roast to the top shelf and back again to the bottom shelf and turning it over in a vain attempt to get it properly cooked, will appreciate the evenly distributed heat of the Imperial Oxford oven.

This even distribution of heat is secured by our diffusive flue—an exclusive feature of the Imperial Oxford Range. Top and bottom, sides and corners, the temperature of the oven is equal and steady.

Imperial Oxford Range

The oven of the Imperial Oxford Range produces light, dainty, pastry, evenly cooked, tender, juicy roasts—in fact, perfect baking and roasting.

Ask your dealer to explain to you the many exclusive features of the Imperial Oxford Range. If he doesn't handle it, write to us for our booklets and we will let you know the nearest dealer who does.
