Well-Known Figure in Pulpwood Embargo Question Planning to Withdraw From the Dominion—Sounds Warning Note.

Editor, Canada Lumberman:—

After spending the best part of the last three years, since my retirement from active participation in business, together with a very considerable fortune in trying to arouse Canadians to a sense of their duty in connection with our fast-vanishing forest resources, I have about arrived at the conclusion that the cause of forest conservation in Canada might as well be abandoned. I realize that the public is keenly interested but I find that an unmountable stumbling-block appears when it comes to the politicians and exploiters who can see nothing beyond their own petty interests and to whom the public welfare is a joke.

When I see the cold-blooded indifference displayed by the government at Ottawa, it makes me ashamed of my Canadian citizenship. I have decided, therefore, to offer every acre of land, my pulp mills, farms, houses and whatever other property I own in Nova Scotia for sale to the first buyer who comes along and to join in the exodus to another country. I am so disgusted with recent revelations that I do this notwithstanding my conviction that timberlands will double in value within two years. When the interests become fully aware as to just how small the remaining supply really is, there will be a panic in timberland prices, but nothing will compensate one for living in a country in which he has entirely lost all faith of its future.

I am convinced that the government, after paltering with this issue for many months, has no serious intentions of dealing with it in the only way possible to bring relief, and that no restrictions will be imposed upon the shipment of unmanufactured

ed wood from freehold land so long as there is a tree left in Canada.

Personally, I have no desire to live in a treeless country, a condition which Canada is fast approaching, and when I look around and see what other countries are doing for the preservation of their forests while Canada is doing nothing, there seems to be no good reason why I should.

But before departing from the land of my birth I want to leave a few serious thoughts with my fellow countrymen. The present combination of politicians, exploiters and American gold are ruining Canada today. This combination is too powerful for the people in their present apathetic state to cope with. If the people really knew what was going on behind the scenes it would lead to a revolt. The members of the government, although paid by the people are not their servants, but their autocratic masters. Even the Bible speaks of "the servant when he reigneth." The interests of the people are entirely subservient to theirs; they must retain power regardless of its consequences to the country. When a by-election is so close as is now, it is a matter of time that it must be won no matter what the cost. Immediately Ottawa is depleted of its great galaxy of orators who proceed to the scene of action. Between their eloquence, their cajoling, their intimidation and their campaign funds, the poor voter has little chance to exercise his intelligence. The spectacle is so humiliating to red-blooded Canadians that it is small wonder that the exodus from Canada the past year has been the greatest in the history of the country.

Criminal deception is being practiced with regard to the forest resources of Canada and I challenge the Government to reveal the true situation.

Do the public know that an aerial survey of the territory north of the St. Lawrence and east of the Saguenay has revealed the astounding fact that the whole territory is seventy-five per cent burnt?

Do the public know that in the Province of Quebec alone between six and nine million acres were burned over during the single season of 1923, instead of three million acres as announced by the Government of that province (which is, God only knows, sufficiently appalling) and that despite this perfectly colossal shrinkage in our standing supply, exports of raw wood go unchecked?

Do the people know that the very existence of the great pulp and paper industry is threatened, not only through the premature exhaustion of its raw material supply—but through ruinous competition brought about by the furnishing of cheap raw material to its competitors in the United States?

Do the people know that while Canadian mills have been reduced to operating at 80 per cent, or less of their capacity, American mills, owing their existence entirely to imported Canadian wood, are running 100 per cent, and upwards?

Do the people know that there is not a pulp company in Canada that is making any profits—many being already in the hands of a receiver—or that the paper companies, if they were charging adequate amounts for depreciation and depletion of their timber limits, through insects, fungi, fire, wind and cutting, would be running at a loss?

Do the people know that pulpwood exported to the United States cost the Americans only \$9.77 per cord while the wood used by Canadian mills cost the Canadian manufacturers \$13.33 per cord? (These figures are both taken from the report of the Department of Trade and Commerce.)

Do the people know that a cord of wood manufactured into paper enriches the country to the extent of \$50.00 to \$60.00?

Do the people know that our wood-using industries are second only to Agriculture as revenue producers and that the failure of the pulp and paper industry alone would bring this country close to bankruptcy?

Do the people know that the only measure that can possibly stabilize this industry today is an embargo on the exportation of its raw material?

Nature is proclaiming on every hand that this continent has already been over-denuded of forest cover. This is seen in the alternate floods, droughts, vast forest fires, tornadoes, late and early frosts and consequent failure and loss and damage to crops. In other words, Nature's whole equilibrium is being upset by the ruthless hand of the exploiter. Small as the supply in the United

States now is, it is vastly in excess of the remaining stand in Canada, consequently this warning applies with double force to this Dominion.

I have no ambition to figure as a lone crusader. I have done what I could to call attention to conditions and to bring about an improvement. If the government is so indifferent to the country's necessities and so derelict in its own duties, there is no earthly reason why I should continue to exhaust my strength and give of my means to try to force upon them something they apparently do not want. This is why after much careful consideration and much searching of spirit, I have decided to dispose of everything I own in Canada and join the trek to another country.

DOCTOR ADVISED AN OPERATION

Read Alberta Woman's Experience with Lydia E. Pinkham's Vegetable Compound

Protest, Alberta.—"Perhaps you will remember sending me one of your books a year ago. I was in a bad condition and would suffer awful pains at times and could not do anything. The doctor said I could not have children unless I went under an operation. I read testimonials of Lydia E. Pinkham's Vegetable Compound in the papers and a friend recommended me to take it. After taking three bottles I became much better and now I have a bonny baby girl four months old. I do my housework and help a little with the chores. I recommend the Vegetable Compound to my friends and am willing for you to use this testimonial letter."—Mrs. A. A. ADAMS, Box 54, Provost, Alberta.

Pains in Left Side.
Lachine, Quebec.—"I took Lydia E. Pinkham's Vegetable Compound because I suffered with pains in my left side and back and with weakness and other troubles women so often have. I was this way about six months. I saw the Vegetable Compound advertised in the 'Montreal Standard' and I have taken four bottles of it. I was a very sick woman and I feel so much better I would not be without it. I also use Lydia E. Pinkham's Sanative Wash. I recommend the medicines to my friends and I am willing for you to use my letter as a testimonial."—Mrs. M. W. ROSS, 580 Notre Dame St., Lachine, Quebec.

NEW LAMP BURNS 94 PER CENT AIR

BEATS ELECTRIC OR GAS

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94 per cent air and 6 per cent common kerosene (coal oil).

The inventor, J. M. Johnson, 249 Craig St. W., Montreal, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.
