Warner's Rust-Proof Corsets.
A Work-a-Day Corset
as well as for Dress.

Warner's Corsets are made to wear, not to rust, break or tear. You may pay all kinds of money for a Corset but you will never have a better fitting, a better wearing, or a more comfortable Corset than a Warner's.

We can give you any Warner's style that is correct for fashion and your figure, and we confidently expect to fill every Corset requirement with a Warner's Rust-Proof, so remarkable are they in shape, comfort and wear.

Price: \$1.50 per pair up.

ROYAL FLYING CORPS.
Squadron R. F. C.
B. E. F. Franca,
December —

Dear Mother and Dad.—Things are going on O.K. round here just at present. I am getting my full share of the war or at least it is as full of fun as I care to have it. We get very patrols a day to do and are very thankful that the job is done. I have had two rather exciting patrols in the last couple of days. On one of them five of us went up and all went well for about 20 minutes. Then we saw a patrol of four Huns below us. Our leader went after them and we all followed. When we dived there were two Hun scouts above us, and this gave them a chance to join in, so a general scrap followed. In the mix-up our two last men were attacked by the scouts above us, got away from the rest of us and we didn't see them again. The three of us continued down, and the leader engaged one Hun and the other fellow and I each took one. We all fired a burst and the result was that the four Huns went down in a spin. This does not mean that we got four birds with three stones, but we are sure that we got one because one of them burst into flames. It was the one our leader fired at. We don't know about the others, we may have hit them. Personally, I don't think I hit my man as he went under me and I couldn't dive any steeper as I was going about 190 miles an hour and that is near the limit. Also my gun got jammed after about 20 rounds, so the Hun, I imagine got away unharmed unless one of the first shots hit him. The three of us formed a fairly representative colonial outfit as the leader was a Canadian, the man on my left an Australian and myself, of course, a Newfoundland. The little scrap was more or less of a success as far as we could see. We had spotted their work (which was registering for their guns) and we had "done" in one and possibly hit one or both of the others. On the other hand there were two of our original five missing.

Our trouble was not over yet, however, we started back towards our lines (about 3 miles) and when almost up to them I saw a piece break away from our leader's machine and he went down — but completely under control. There were no Huns about so we followed him down to 500 feet from the ground and saw him land in shell holes and turn completely over. As we were getting fired at from the ground and as we were also in the zone which our own shells frequent on their journey over to Hunland, we very soon got up. Luckily our time for patrol was just over so we went off home.

Tin Plates,
14 x 20.

Just arrived a small quantity 14 x 20 TIN PLATES, which we are selling at REASONABLE PRICES.

GEO. M. BARR.

We have been getting bombed a good bit by night lately but no damage has been done and I guess we will manage to have a pretty fair Xmas here if it is not too fine a night. Last night we got old Fritz in the searchlight and believe me he had a pretty thin time. He dropped all his eggs in the field and went home by the shortest route.

The above mentioned little incidents are not supposed to be chronicled amongst "hairbreadth escapes"—they are quite tame, but their execution interests me, and their relation will probably interest you. They have at least one redeeming feature—truthfulness.

LATER. December —
Since I last wrote you I did one patrol which was quite uneventful. There was nothing beyond a very bad exhibition of Hun Archie, which never came within a mile of us. Yesterday I went to one of our headquarters parks and flew back a new machine to replace one which we lost recently. A trip like that, however, is less eventful than walking across the road, after having done war flying. It was quite a nice little joy ride of about 40 miles and as the wind was with me I did it in a little over 20 minutes. Kalligrews and back in 20 minutes wouldn't be bad going, would it?

In Five Minutes! No Indigestion, Gas Or Sour, Acid Stomach

The moment "Pape's Diapiespin" reaches the stomach all distress goes.

"Really does" put bad stomach in order—"really does" overcome indigestion, dyspepsia, gas, heartburn and sourness in five minutes—that's just that—makes Pape's Diapiespin the largest selling stomach regulator in the world. If what you eat ferments into stubborn lumps, you belch gas and eructate sour, undigested food and acid; head is dizzy and aches; breath foul; tongue coated; your insides filled with bile and indigestible waste, remember the moment "Pape's Diapiespin" comes in contact with the stomach all such distress vanishes. It's truly astonishing—almost marvelous, and the joy is its harmlessness.

A large fifty-cent case of Pape's Diapiespin will give you a hundred dollars worth of satisfaction or your druggist hands you your money back. It's worth its weight in gold to men and women who can't get their stomachs regulated. It belongs in your home—should always be kept handy in case of a sick, sour, upset stomach during the day or night. It's the quickest, surest and most harmless stomach regulator in the world.

Your Boys and Girls.

One busy mother has solved to her entire satisfaction the problem of fresh air for her baby. Busy all day with her work, she has only a short half hour to take care for a ride in his carriage, but fresh air the boy must have and lots of it, so she bundles him up in his warm coat and bonnet, puts on his thick mittens, places a hot water bottle at his feet and deposits him in the big clothes basket in front of an open window.

A package of absorbent cotton will be found very useful, with boracic acid, to wash the baby's mouth and to use for the powder puff and to put on vaseline for the hair, too. It not only will remove the scabby foundation which often appears on the top of the head, but will prevent its forming. This comes from neglecting to clean thoroughly this tender place through fear of hurting the baby. It really is not so tender that it will not stand the rubbing necessary to keep it clean. In case it has already formed an application of green soap will loosen it and it can then be easily removed with the baby comb, being careful not to scratch the skin.

"Cascarets" Best If Headachy, Bilious Sick, Constipated

Best for liver and bowels, bad breath, bad colds, sour stomach.

Get a 10-cent box. Sick headache, biliousness, coated tongue, head and nose clogged up with a cold—always trace this to torpid liver; delayed, fermenting food in the bowels or sour, gassy stomach. Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, throbbing, sickening headache. Cascarets immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels. A Cascaret to-night will surely straighten you out by morning. They work while you sleep—a 10-cent box from your druggist means your head clear, stomach sweet, breath right, complexion rosy and your liver and bowels regular for months.

A pretty girdle for an evening gown is a narrow ribbon tied around the waist and tied in a bow in front.

MINARD'S LINIMENT CURES DIPHTHERIA.

Thoughts Upon the Times.

(By PATRIOT.)

"In the Government of this Commonwealth, the legislative department shall never exercise the executive and judicial powers, or either of them; the executive shall never exercise the legislative and judicial powers, or either of them; the judicial shall never exercise the legislative and executive powers, or either of them; to the end that it may be a Government of laws and not of men." Article XIX of Part I, of Constitution of Massachusetts of 1780.

This is as true of the Government of Newfoundland as it is of the State of Massachusetts and of every State in the United States. Ours is a Government of laws and not of men. It is a Government of limited powers. Every one who serves the public finds his duties defined by law. He has to keep within certain bounds. If he goes beyond them his authority is gone. His first care then is to know every rule and regulation and the path along which he must tread in order to carry out effectively his public duties. It must be conceded therefore that the man who has been educated and trained in legislative and executive departments is peculiarly fitted to discharge efficiently the duties imposed upon the legislator and executive officer. It is in such men people must repose their trust and confidence if they expect to enjoy any measure of security and the beneficent effects from responsible government. To place the machinery of government into the hands of uneducated and inexperienced men, who are biased, and bound by an oath to follow the dictation of an agitator, is like sending the ship of state on a voyage without rudder or compass. Sooner or later the results come back upon the people in the form of discontent in the operation and enforcement of its laws.

The present Government of this country is not a government of laws but of one man—a dictator—whose word to-day is law. Whilst he may be eminently fitted to manage and control a business corporation which he himself has organized, yet he is not qualified to rule this country, because his mental training and his habits of thought and study do not especially fit him to perform the kind of service which the public interest requires. To prove that this is so let me refer your readers to the Evening Advocate of 10th and 14th inst. As everyone knows the whole Empire is in a life or death struggle in defence of the principle that binds together the whole fabric of civilization. His Majesty the King, through his representatives throughout the Empire is making an appeal to the various governments of the Dominions and Colonies to provide sufficient man power to carry on the war, so that the principle for which we are fighting may be established, and a lasting and abiding peace be secured for a war-worn and weary world.

How does the actual head of the present Government of this Dominion treat this appeal of his Sovereign? By attempting to make political capital out of it, as the article in last Thursday's Advocate headed "Water Street Demands Conscription" proves. Is further proof required? Then glance at Tuesday's Advocate and see in glaring head lines "Burnt District Behind Coaker. People Invest \$5,000 in Union Trading Coy." The world is money mad. People are getting sick of it, and the present war has been caused by money mad people. Judas wanted money. He wanted it more than he wanted anything else. He went to the limit to get money, and he got it. But what price did he pay for it? What is absolutely necessary in order to wake people up to the real dangers that threaten the extinction of our race, is to have men at the head of the Government who have patriotism enough in their make-up to put their country's needs before their own selfish interests. We want men who know and understand the issues before us and can explain them in an intelligent way to the people. We want men who can construct broad-minded policies and have the courage and conviction to carry them out. We want men who will use their talents to bring together for the common good all classes and creeds, and whose influence will be given towards promoting decency and peace, courtesy and good-will in the community.

Here and There.

LLEWELLYN CLUB. — The postponed lecture to the men of the Llewellyn Club by Dr. Rendell, subject "A Cut Finger," will be given to-night at Canon Wood Hall. All men who have an hour to spare are invited to be present.

Oaten Bread Recipe

TAKE
1 sifter full of WINDSOR PATENT Flour and
1 sifter full of OGLVIE'S ROLLED OATS.

THEN
Scald the Rolled Oats with 2 cupsful of boiling water. Make sponge with 1/2 yeast cake and one cup of WINDSOR PATENT; then add the Rolled Oats—after allowing sufficient time for them to cool.

ADD
1 tablespoonful of Butter,
2 teaspoonfuls of Salt,
1 1/2 tablespoonfuls of Sugar.

Knead well, adding WINDSOR PATENT as required to give it the proper texture before proceeding to bake.

The Above Recipe Will Make a Wholesome and Delicious Bread.
