and Kditor. John Cameron

London, Saturday, Oct. 7.

The Fire-Eaters.

The Montreal Star, with a fine mixture of patriotism and politics, is raving over "Canada's disgrace" in not mobilizing a force for the Transvaal, and scarifies the Dominion Government Toronto University. The lecture and each public school, if not in the buildwith a pen dipped in hot blood of the Star's own brew. The Canadian people parison, as they present studies of competent teacher would be required. have been quite unaware of this stain technical education in two different At the outset a specially trained male on their escutcheon, which shows the counties. Compulsory Arbitration.

The Advertiser has frequently advocated the completion of the present Ontario law providing for compulsory arbitration in labor disputes, and particularly labor disputes in connection with public franchises. An arbitration can now be legally set in motion on certain conditions, on the application of either party to the dispute. But no way has been provided-beyond the effect on public opinion of a formulated finding-to enforce the decision arrived

at by the arbitrators. We observe that Mr. W. P. Reeves, the author of the New Zealand law for compulsory arbitration is in New York, having come to attend the National Export Exposition and Commercial Congress, which opens in Philadelphia next Tuesday. When interviewed by a New York newspaper he said:

"I look upon compulsory arbitration as the only safeguard against labor troubles, and I'm glad to see your journal is using its influence to secure laws to that effect in this country. I consider a law necessary if the United States wishes to avoid the recurrence of conditions that amount, practically, to civil war.

"In New Zealand the law of which I was the author compels arbitration in all cases of dispute between any employer and organized labor-the organized labor being represented by trades

It took more than a year to get the machinery of the law working smoothly, but since then there have been no labor troubles in New Zealand. The emplayer, whether an individual or a corporation, is the unit on one side. The trades union is the unit on the other. It would not do to allow any individual workman to make his private grievance the basis for a public hearing.

"New Zealand is divided into distriets, and in each is a 'conciliation, board,' elected by employers and trades unions in equal representation, with an Impartial person, frequently a magistrate, to act as chairman. Any case may be appealed from the decision of this board and tried by the central court of arbitration. Whenever there is dispute or threatened trouble, either the employer or the trade union may ask for arbitration. But the workmen cannot strike, nor can the employer discharge them, while the case is pending, under penalties provided by the law.

"Fines are provided by law if either olde fails to observe the decision of the erbitrators."

The departure of a corps of British nurses for the Transvaal is grimly suggestive. This is a branch of modern military service which the Boers do not possess and may badly need.

The Free Press declares that oil of reports from localities where experiments were made; but it has since German system. Mr. Millar says he been found that an oil road is a positive danger because of its liability to take fire. This is a fatal defect in an otherwise good pavement.

cal Education. Two valuable contributions to the of Technical Education have just been made, one by Principal Loudon, of Toronto University, in the form an address, the other by Mr. John Millar, B.A., Deputy Minister of Education for Ontario, in a report of his visit to the schools of Massachusetts. The outline of Mr. Millar's report was published some time ago, but

curriculum is correspondingly elastic. shut out non-residents. In smaller Next above the Fortbildungsschule places, a room in the high school or came a higher class of technical collegiate institute should be provided schools, the Hohere industrieschulen, for manual training in woodwork. that might be divided into four classes -schools for classes of trades, schools

for artistic trades, schools for single

trade, and commercial schools.

The highest grade in the system was the Technische Hochschule, or technical high school, known also as the Polytechnicum, which ranks with the universities, and trains men as engineers, architects, chemists, physicists, etc. They correspond to Toronto's School of Practical Science, and of them Germany has nine. In addition there are about 21 universities, which are intimately connected through their scientific departments with the highest interests of trade.

An idea of the general diffusion of technical education might be gained from the statistics regarding Saxony, with its 4,000,000 inhabitants. It possesses 112 Fortbildungsschulen, with 10,-000 pupils; 39 Hohere Industrieschulen. with 10,000 pupils; 44 Commercial Industrieschulen, with 4,800 pupils; 11 Agricultural Industrieschulen, with 700 pupils; 25 technical schools for women and girls, with 4,000 pupils.

The city of Hamburg alone, with a population of about 600,000, had 17 technical schools, with almost 5,000

Turning to the situation in Ontario. Principal Loudon said this Province had the basis of a system of technical education in the School of Practical Science, but the real question at present was what provision should be made for the rank and file of the industrial army. The high school, he maintained, should not be the place for technical instruction, but should be concerned in general education alone. He also deprecated the report of the special committee appointed by the boards of trade, which recommended that technical education should be part of the foundation of our general education system and that elementary technology should be introduced into all the public schools as time and circumstances would permit. The pubic school curriculum is already overpaded, Principal Loudon thinks, and why increase the burden and complexity of organization? Besides the difficulty of securing teachers for a general scheme of this kind is practically insuperable. The only subject bearing on technical education which might have a place in the public school was manual training. "If we define manual training as exercises serving to train the pupil in an elementary and general way to use his hands." remarked Principal Loudon, "I consider it a discipline profitable for general education, and one which might be taken by every child, whether he should afterward become an artisan

Turning to Mr. Millar's report, we find that in the inferences he drew from his study of the Massachusetts roads are a success. The Advertiser system, he is in substantial agreement once thought so, too, on the strength with Principal Loudon's opinions. which are based on a study of the found the educators of Massachusetis practically unanimous in favor of manual training as an adjunct to academic teaching. All cities in the state

Our School System and Techni. having a population of over 20,000 are required to maintain a manual training department, in connection with their high schools, and there is a strong movement to provide this training for the younger pupils of the public schools.

Mr. Millar's report goes on to suggest that in all cities and large towns in Ontario, the public school boards should provide instruction in sewing. cooking and manual training of an elementary character in woodwork. This much is quite feasible if municipalinow issued in extenso. Principal ties are willing to incur the necessary Loudon's address was delivered on expense. For manual training as well Tuesday at the autumn convocation of as for cooking, a room convenient to the report furnish an instructive com- ing, would be necessary, and a fully modification of the qualifications ex-

Mr. Millar admits that before his visit he was in favor of adding more advanced technical instruction to the course now given in the high schools and collegiate institutes, but he found this opinion was not shared by most American educational specialists. It had been found that separate instruction answered better, as technical education was apt to be slighted when merely an adjunct to an academic course. This is precisely in accord with the German system as outlined by Principal Loudon. Mr. Millar found that in Massachusetts the best schools for higher manual training are distinct from the high schools, though under the same board of management, the principal in each case being a good administrator and teacher of experience, and those in charge of the technical branches fully trained for the work, both as regards mechanical operations : id teaching capacity. Under the circumstances, he considers that in case the municipalities are ready to incur the cost, in Toronto, and perhaps in other cities of the size and importance of Kingston, Hamilton, London and Ottawa, separate buildings for technical teaching would be the best plan, with suitable equipof a technical school in an Ontario city, students should be required to pensed with in the case of resident pustanding that high fees should not

which could be done at a trifling cost. The appearance of this instructive and carefully considerer report will be welcomed as an evidence that the Administration is alive to the progressive educational movements prevailing elsewhere, and ready to go as rapidly in the direction of popularizing technical instruction as public opinion will admit.

The Washington correspondents have patched up a new modus vivendi on the Alaskan boundary question.

Bishop Potter has decided to go to the Philippines. If half the reports about the effect of American civilization in Manila are true, the bishop has his work cut out for him.

Sir Charles Tupper scents a Dominion general election and declares that the people are "waiting for a chance to turn the rascals out." Truly, the old war horse of Cumberland paweth in the valley, but though the glory of his nostrils is terrible, and his neck is clothed with thunder, it is very doubtful if he really rejoiceth.

ECZEMA ON FACE

Could Not Go Out. Five Months Under a Physician. Went from Bad to Worse.

Gave Up Hope. Friend Recome mends CUTICURA. Change in One Night. Cured One Month.

I was troubled with eczema on the face fer five months, during which time I was in care of physicians. My face was in such a condition that I could not go out. It was going from bad to worse and I gave up all hope, when a friend of mine highly recommended Cutteura REMA-DIES. The first night after I washed my face with CUTICURA SOAP and used CUTICURA (cintment) and CUTICURA RESOLVENT it changed wonderfully, and continuing the treatment is removed all scales and scales. From that day I was able to go out, and in a month my face THOMAS J. SOTH. July 28, 1808. 212 Stagg St., Brooklyn, N. Y.

EVERLASTING ITCHING

And Burning of the Shin Cured by CUTICURA. For the last three most he I have been troubled skin on my face, and did not know what to do to cure it. I was prevailed upon to try Curi-cura Remedies. The result was simply wonderful. In one week after using the CUTICUEA rid of it, and my skin is in a healthy condition.
D. H. VAN GLAHN, 721 Stockton st., San Fran, Cal.

CUTICURA Begins with the Blood and Ends with The Skin and Scalp.

That is to say, it purifies the blood and circulating finish of Hunoh Grans, and thus removes the cause, while warm baths with Currottan Soap, and geatle anolatings with Currottan (olatiment), greatest of emolitent skin cures, cleanse the skin and sealp of crasts and scales, allay itching, burning, and infiammently, such economically cured the most torturing, disagning humors of the skin, soalp, and blood, with less of hair, when the best physicians and all other remodies fail.

Any coward can fight a battle when he's sure of winning, but give me the man who has pluck to fight when he's sure of losing.-George Eliot.

The Gentleman from Chicago-Stran can you tell me where is a good place to stop at? The Citizen of Boston-Just before the "at."-Indianapolis Journal.

Penelope-I hear your engagement with Paul is broken off. Is that right? Patience-Yep.

'Have you returned his ring yet?" "No. I told him he'd have to come around and pick it out; I really don't know which is his."-Yonkers States

"Were there no servants in the intelligence office?" asked the wife.
"It was full of 'em," returned the
lonely husband, "but they had all worked for us before."

A turbulent peasant was a witness in a trial before Chief Baron O'Grady. The counsel, after pestering him for some time, put a question to him which reflected on the witness' character. "If ye ax me that again I'll give ye a kick," was the answer.

The counsel appealed to the court, stating that an answer was necessary to his client's case, and ending with the query? "What would your lordship advise me

"If you are resolved to repeal the question," replied the court. "I'd advise you to move a little from the witness."

SEPARATE SCHOOL PRIZE WINNERS

The Children Visited by the Bishop-His Lordship Welcomed-Prizes Distributed Among the Young People.

Yesterday Bishop McEvay presented the prizes merited by the pupils of the separate schools for their work throughout the term. His lordship, who was attended by Father L'Heureaux and Father McKeon, who has charge of the schools, visited St. Marys and Sacred Heart in the morning, and the Holy Angels and St. Peter's schools in the afternoon. At the latter were the separate school board, including Mr. D. Regan, Mr. R. H. Dignan, Mr. Thomas Coffey, and Mr. Philip Pocock. They all repaired to the highest form, where the children and their friends were assembled, and as they entered they were greet-ed by a song of welcome. Miss Maggie Boyle afterwards presented an address to the bishop, and the children joined in the "Queen of the Angels" chorus, under the leadership of Miss Kathleen Moore. In a few happy words the bishop told of his pleasure at being present, one reason for this being, as he humorously remarked, that at St. Peter's more prizes were won by the boys, who should be first now, because in after years it would be the girls who would have things their way. He also promised to give a prize of \$10 next year, Messrs. Po-

delivered short addresses. The following are the prizes and the winners: Entrance examination — Highest marks at the examination a gold medal, gift of T. J. Murphy—Won by
