

W. A. MURRAY & CO.

Beg to announce that they have just completed the negotiations for the purchase, at a very liberal discount for cash, of the

ENTIRE STOCK OF JAMES SCOTT & SON

91 TO 93 KING-ST. EAST, WHO ARE NOW RETIRING FROM BUSINESS,

and as we have decided to run off as quickly as possible this

First-Class Stock of Staple and Fancy Drygoods

At their present premises, 91 to 93 King-Street East, we will begin

TO-DAY, FRIDAY, THE 13TH INST.

A Gigantic Closing Out Sale

of the whole stock, with prices in all lines marked to actually less than one-half the Regular Wholesale Importer's Cost

We consider it quite unnecessary to call your attention to the class of Goods kept by Messrs. Scott & Son, but point to their justly high reputation of the past half-century for straightforward, legitimate dealing, which is a sufficient guarantee that nothing but the Best and Most Reliable Goods will be found in their Stock.

It is impossible for us to give in this advertisement a list of Special Bargains, which in reality is no criterion of value, but simply say that everything has been reduced to the most ridiculously low prices in order to attain our object of an immediate closing out.

We may also remind you of the fact that as the Fall season is now just beginning, the stock of Messrs. Scott & Son is exceptionally well assorted and the bulk of the goods practically new and representing every line of Drygoods, including

Silks, Dress Goods, Flannels, Hosiery and Underwear, Housefurnishing Goods and Every Description of Staple and Fancy Drygoods.

Remember that this Great Sale begins this, Friday, morning, and advise all Buyers to come early and make their purchases, and avoid the Great Rush.

W. A. MURRAY & CO.

Dead Shot Powder

We are Canadian agents for this well-known and popular powder, unequalled for pattern, penetration and cleanliness.

Special prices for quantities.

The Griffiths' Corporation,
LIMITED,
81 YONGE-STREET, TORONTO.

TO-DAY WILL WIND IT UP.

THE INDUSTRIAL AGAIN THROGGLED WITH PEOPLE.

Yesterday's Attendance Was a Record

The Speaker in the King.

The Crowd at the Exhibition Yesterday

The Minister of Education was Brief

The Government was not Directly

Doing much for the Exhibition, it was

Indirectly doing a great deal by stimu-

lating the agricultural development of

the province. His own department

trained all teachers in agriculture and

the subject was incorporated in the

school instruction in those districts

where the local boards of trustees de-

sired it.

The Government as an Exhibitor.

Hon. John Dryden followed, and

promised that the Government exhibits

in agriculture, first introduced this

year, would be increased hereafter.

He also suggested that Mr. Ross pro-

vide in future an exhibit from the

Department.

Home Circles; Lees, Royal Templars; Brown, of St. ... With reference to the crush at the entrance to the grand stand on Wednesday evening, Manager Hill offers the explanation that it was due to mistakes of some of the visitors rather than the inadequacy of the facilities. ... The Industrial Information Bureau has done excellent service in providing accommodation for visitors. ... The great influx which poured into the city on Wednesday was satisfactorily provided for, and even a larger rush could have been accommodated. ... The American visitors availed themselves of its services more generally than Canadians. It is the intention of the management to reorganise it as a permanent adjunct to the Fair, as the experience of the present week has thoroughly tested its utility.

The result of the milk test conducted by Prof. Day of the Guelph Agricultural College, in which nine competitors took part, was in favor of entry 725-Holstein cow, entered by C. J. Gilroy & Son, Glen Euse, Ont. Yield of milk in 48 hours 122 pounds 10 oz.; highest percentage of fat during the test 3; lowest 2.64; total solids 4.85 pounds. The second place was accorded to entry 735, Ayrshire, by R. Reardon, St. Anne de Bellevue, Ont. Much has been done at the Fair in the way of organizing the Toronto Milk Exchange, with James Chester of Scarborough as president, for the promotion of better business principles between the buyer and producer and consumer. The secretary is J. R. Benson of 290 Bathurst-street, and the exchange is the outcome of the organization of the dairy farmers, who supply Toronto with milk.

Cleared 5 Ft. 2 1/2 In. The judging in the ring was finished yesterday and all the prizes in the various classes awarded. A most pleasing wind-up was the contest for the best leaper, which aroused considerable enthusiasm and resulted in a tie for first honors between Adam Beck's Hurricane and Robert Kilgour's The Duke, the highest cleared being 5 feet 2 1/2 inches. Capt. Laurier's Lorna

Doone captured third by clearing 5 feet 10 inches, and Dr. E. A. Campbell the Waterloo fourth, jumping 5 feet 8 inches. Mr. Adam Beck also carried off the sweepstakes prize for the best saddle horse on the grounds with the bay gelding Long Run, by Longitude. The Running Races. The following are the entries for today's races: Open handicap race, 1-1 mile and 150 yard heats, best 2 in 3, purse \$125. Mr. Maher, Achilveer, Toronto; R. J. Hewitt, Varsella, Brighton; W. J. Rolston, Miferella, Windsor; T. F. Rolan, Ebilis, Toronto; W. J. Cowan, Ad. Westness, Toronto; G.W. Decker, Tom Nye, Pickering; R. McWilliams, Conlonist, Drayton; James Hayward, Wood, Feterboro; James Hayward, Meg Dimmout, Eastwood; E. Phair, Blue Wing, Toronto; G. Kennedy, Ad. die B., Oakville; H. Hulse, Little X, Bradford; H. E. Simpson, Tulip, Toronto; A. E. Simpson, Furnace, Toronto. Half-breed race, for horses which have never won public money, heavy water-weights, purse \$125-W. Bulmer, Jr., Victor, Yatton; Dr. Mills, Melbourne, Toronto; Perry Davis, Delaware, Onondago; J. Doane, Strathely, Toronto; B. Hulse, Bondhead, Bradford.

Go to the Fair To-Day. To-day is the best day for visiting the Fair. Toronto is free from visitors, everything is on view, and there will be no crowding. The following is the program to be given in front of the grand stand at 2 p.m.; there will be a parade of prize cattle around the ring. In the order of their respective classes: At 2.30 p.m. open horse and carriage race, half mile, and 150 yard heats, best 2 in 3. At 3 p.m. Royal Dragons' grand musical grand parade of prize horses around the ring in the order of their classes, followed by the half-breed running race, with special attractions. At 7 p.m. will be given the water-fete, with all the features and specialties complete, followed by the great military pageant, "The Relief of Lucknow," with a brilliant concluding display of fireworks. The grounds will be specially illuminated, and all buildings open until 10 p.m.

FAIR NOTICES. ADD Exhibition. A Pleasant Reminis. The Wrought Iron Range Company recognize that their great success is not wholly due to the superiority of their goods, but in a great measure to the zeal, enterprise and work of their salesmen; and in recognition of this fact make it a rule to at least once a year have a reunion of all their traveling men at Toronto's great Industrial Exhibition. The gentlemen are brought from all parts of the Dominion and returned to their respective homes at the expense of the company. This affords them an opportunity to inspect the progress of manufacturing of the range and other goods, and enables them to talk more intelligently of the articles they are selling. These reunions are mixed with both pleasure and business, and make a night of it a theatre party, which took place last night, the company providing seats at the Princess Theatre to see Mr. Hart in "A Gay Old Boy," for more than 40 of their salesmen.

Mendelssohn Piano Co. The unanimous verdict of those visiting the exhibit of the Mendelssohn Piano Company in the Musical Annex is that these instruments surpass all others in the world. Such a verdict is quite in accordance with the facts, and the Mendelssohn has taken first prize wherever shown, not the least in the display in glass-front boxes, with a pleasing effect. In fact,

no artistic has it been found that nothing else is necessary to the decoration of the exhibit. The name of those who visit the Musical Annex is legion. It is a staple article as familiar to the ordinary consumer's eye as grass in the fields. So large has the demand proved to be that now 250 hands are constantly employed supplying the demand for these beautiful instruments. The name of those who visit the Musical Annex is legion. It is a staple article as familiar to the ordinary consumer's eye as grass in the fields. So large has the demand proved to be that now 250 hands are constantly employed supplying the demand for these beautiful instruments. The name of those who visit the Musical Annex is legion. So large has the demand proved to be that now 250 hands are constantly employed supplying the demand for these beautiful instruments.

A New Era in Stoves. A new era has been reached in the manufacture of stoves. The old cast iron stove will soon be a thing of the past, for this is an age of the survival of the fittest. The truth of this will be at once apparent to any visitor to the Store Building who will take the trouble to examine the stoves of T. Doherty & Co. of St. Catharines. Mr. Doherty is the patron of a new method of making what he calls De Carbon steel, which, when used in their stoves, does not advance the price of the Doherty stove over made from cast iron. The steel is being made up of carbon with a stove or range in its tendency to crack and become generally demoralized after being subjected to a very high temperature, which is frequently attained in kitchens when baking is being done. With a range made from the De Carbon steel this is impossible, because of its transverse, tensile, impact and compact strength. While looking over this exhibit The World representative was astonished to see one of the firm's travelers, in showing their goods to a purchaser, take the lid off one of their stoves and drop over two feet with a crash on to the stove below with no resultant injury. With ordinary cast iron this would have meant a disaster. In fact, it has been demonstrated that these ranges are 50 per cent. stronger than those made of cast iron. It is explained in this way: Pig iron contains about 2 per cent. of pure iron, the rest being made up of carbon, iron, manganese, phosphorus and sulfur, which is the nature of these elements, also in the exclusion of silicon, than that of iron. Mr. Doherty's method does this and his unbreakable stoves testify to the success of his method.

Domination Piano Co. The Dominion piano, as shown at its best in the recitals of Professor Deane, the London, Eng., solo pianist, is a wonderfully sweet, true and powerful instrument, and of its brilliancy it is said by critics to retain this quality during the life of the instrument. This is in a large measure due to the independent iron frame, which is so constructed as to hold in their entirety inner works of the piano such as the action, wrent plank, tuning pins and so on. This is the principle employed in the best American grands, and in this particular the Dominion Organ and Piano Company claim that their instruments differ from any other Canadian piano.

An Excellent Wine Exhibit. The wine exhibit of George D. Dawson & Co., 15 King-street west, has had an added attraction for visitors to the Fair afraid to drink city water, and coming around in their minds for some light beverage to take its place. An examination of the exhibit and a talk with Mr. Y. E. Gianelli, who is in charge, usually settles the matter when the visitor finds that the Bosphorus and Madoc Claret handled by this firm may be had for \$3.50 per dozen quarts, on account of the constant break. The Sauternes of this firm are an especially fine line.

Christie, Brown & Co. Christie, Brown & Co. display this year at the Fair, as usual, an exhibit which will be difficult to surpass and one that provokes great admiration from passers-by. Five hundred varieties of biscuits, each differing from the other, are displayed in glass-front boxes, with a pleasing effect. In fact,

Coleman Lumber Co. Agents should take the opportunity before the Fair closes to visit the Coleman Lumber Company in the Overlow Tent and secure territory for the "Excelsior" Washer. The spotless linen turned out by this washer seems incompatible with the slight effort required. Does not wash the clothes.

Found His Bones After Five Years. Trent, Sept. 12.—A skeleton has been found on a farm near Adamsville, in the Haul-Tyrol, which has been identified as that of an American named Ruth, who disappeared in 1850.

Medical Testimony. Reputable medical men will rarely allow their names to be published, endorsing a special form of medical treatment. Often, however, there may be found at Lahrhurst, Ontario, the names of members of the "noblist" of the professions, who, being but human, have themselves fallen victims to cholera. One of these recounts his experience and observation thus: "From my own case and others I have observed, I have no hesitation in saying that your method of treatment is eminently successful. I was greatly surprised to see men of fifty years and over who had been for many years addicted to the excessive use of alcohol in the course of five or six days eating heartily, sleeping well, with no more desire for alcohol, and with a feeling of mental and bodily vigor not experienced for years—this I consider really wonderful." We might add that these results are mainly due to the care and judgment exercised in each individual case entrusted to us—features seldom discoverable in other institutions having similar objects. Full information, Bank of Commerce Building, Toronto.

The Canadian Organ and School Furniture Co. Preston, Ont., Nov. 26, 1894. Bernard Lindman, Esq., Toronto. Dear Sir,—It is now about three months ago since I first noticed that a rupture was being effected by the use of one of your Wilkison Trusses, and now, as I fully convalesced, I have a both complete and effectual. I have on several occasions within the last few weeks taken long walks without truss or support of any kind, and have every confidence that my rupture, which, as you are aware, was of a very severe description, is now permanently healed, and I can assure you that I feel deeply thankful for the beneficial results. I have already recommended your appliances to several of my friends similarly affected. Yours very sincerely, Z. E. MICKELSON, Esq.
