Diploma at Huron Centre Fair, Blyth

THIS is a model outfit for apple spraying, and will be found to meet all the requirements where only one line of hose is needed. With the addition of the Y connection and two nozzles, we provide an effective means by which one man can do the work of two under old conditions. This is a strictly high-class outfit, and will repay the cost of the entire outfit in one season by saving of labor.

DEPARTMENT OF AGRICULTURE
Toronto, Feb. 18th, 1896.

W. H. HEARD, ESQ.,
Spiramotor Co., London, Ont.

Dear Sir,—I am in receipt of the catalogue you sent me. I have looked through it casually and should like to congratulate you on its completeness. You appear to have given thorough information both as to your spraying outfit and also in reference to diseases affecting fruit trees and their remedies.

I am sure your catalogue will be highly valued and much sought for.

Yours very truly,
JOHN DRYDEN, Minister of Agriculture.

Spiramotor Co., London.

Dear Sirs,—Thanks for your interesting and instructive catalogue received a few days ago.

It is full of very valuable information to all interested in a warfare against insects and fungous pests.

Yours respectfully,
J. HAYES PANTON.

Patented in Canada and U.S., Sept. 21, 1893; July 17, 1894; and Dec. 3, 1895.

Agents Wanted. Send a three-cent stamp for treatise on Spraying.
