A MECHANICAL WONDER!

THE ONLY SELF-ACTING WASHING MACHINE IN THE WORLD.

A New Motive Power Discovered—Expansion of Heat Does it All.

A cylinder made to revolve under water at the rate of 30 to 60 revolutions per minute. A thing never accomplished before. Clothes made to pass rapidly through water boiling hot in this manner, are washed most speedily and thoroughly in thirty (30) minutes without labour, wear or tear. No skill required. A child can operate it, and it cannot get out of order. The most wonderful labour-saving machine or device ever invented. We want every family in the United States to know us for further information regarding this greatest discovery of the age. We earnestly request everyone who has bought any of the washers so largely advertised by other companies in the United States, to write to us. We will place this Self-Acting Washer in the hands of every family in the land, and offer extraordinary inducements to good men to engage in the business of selling it for a limited time.
