

PYRAMEIS ATALANTA—*Atalan'ta*. A celebrated beauty, who made all her lovers run races with her on the penalty of death if they could not catch her.

————— CARDUI—*Car'dui*. Feeds on thistle (*Carduus nutans*).

————— HUNTERA—*Hunt'era*. Hunter's butterfly.

LIST OF COLEOPTERA,

TAKEN AT GRIMSBY, ONTARIO, BY J. PETTIT.

(Continued from page 133.)

CURCULIONIDÆ.

- | | |
|--|---|
| Dryophthorus corticalis, <i>Say</i> . | *Anthonomus suturalis, <i>Lec.</i> |
| Rhyncolus ——— ? | quadrigibbus, <i>Say</i> . |
| Cossonus corticola, <i>Say</i> . | *Otidocephalus scrobicollis, <i>Sch</i> . |
| *Sitophilus nubilus, <i>Schr</i> . | Eirrhinus mucidus, <i>Say</i> . |
| perlinax, <i>Oliv</i> . | Magdalinus olyra, <i>Hbst</i> . |
| *cinerea, —. | Pissodes strobi, <i>Peck</i> . |
| *Ceutorhynchus septentrionalis, <i>Sch</i> . | nemorensis, <i>Germ</i> . |
| *inæqualis, —. | affinis, <i>Rand</i> . |
| *Copturus quercus, <i>Say</i> . | Lixus concavus, <i>Say</i> . |
| *oculatus, <i>Say</i> . | *Phyxelus glomeratus, <i>Sch</i> . |
| *oblongus, —. | Aphrastus ——— ? |
| Conotrachelus posticatus, <i>Sch</i> . | Phytonomus ——— ? |
| nenuphar, <i>Hbst</i> . | Hylobius pales, <i>Hbst</i> . |
| *anaglypticus, <i>Say</i> . | *picivorus, <i>Sch</i> . |
| *cratægi, —. | Listroderes ——— ? |
| *Rhyssomatus palmacollis, <i>Say</i> . | Polydrosus elegans, <i>Couper</i> . |
| Mononychus vulpeculus, <i>Fab</i> . | Sitona lepidus, <i>Sch</i> . |
| Grypidius ——— ? | Arrhenodes septentrionis, <i>Hbst</i> . |
| Cryptorhynchus luctuosus, <i>Sch</i> . | Apion ——— ? |
| obliquo-fasciatus, <i>Sch</i> . | Ithycerus curculionoides, <i>Hbst</i> . |
| Baridius ——— ? | Attelabus bipustulatus, <i>Fab</i> . |
| *Madarus undulatus, <i>Say</i> . | Cratoparis lunatus, <i>Fab</i> . |
| *Læmosaccus plagiatus, <i>Fab</i> . | *Brachytarsus variegatus, <i>Say</i> . |
| *Panscopus erinaceus, <i>Say</i> . | *Platyrhinus fasciatus. |
| Balaninus caryatipes, <i>Sch</i> . | Piaxorhinus ——— ? |
| | Bruchus pisi, <i>Linn</i> . |

The above list of *Curculionidæ* is as full as I can make it at present, but I have a number of species not yet identified; it is a family of acknowledged difficulty, the American species of which have never yet been thoroughly worked up by any competent Entomologist.

* Species marked with an asterisk have not before been included in the list of Canadian Coleoptera.
